The TW 7005 is the new portable video system for car entertainment, walking or home entertainment.

It consists of a main unit with DVD/MPEG4/SD/USB player with large 9 "LED screen and a 9" LED Monitor.

The player is self-powered with rechargeable battery (home or car) and allows you to view on the LED screen DVD/MPEG4 movies and multimedia files recorded on SD Card and USB memory.

To use the system in the car, just simply install the two universal brackets with a convenient hook / release system on the back of the headrest. The player and the monitor must be connected to each other through a cable that allows the transfer of the signal from the player to the monitor. Connect the power of the system from the cigarette lighter socket and ... Good trip!

TREVI SF 230 HR is a valuable tool for your workout. Heart rate provides information about your body's state of health and keeps it under control to improve the quality of your workout and to see if physical activity is too intense or too light. It is important to refine the training method so that the heart rate is maintained within a given number of pulses per minute. TREVI SF 230 HR is not a medical device but an electronic device that can measure and display on the OLED display the wearer's heart rate.
