ATTACHING/REMOVING THE FLAT BEATER, FLEX EDGE BEATER*, WIRE WHIP, OR DOUGH HOOK

! WARNING

Injury Hazard

Unplug mixer before touching beaters.

Failure to do so can result in broken bones, cuts, or bruises.

To attach accessory: Turn speed control to "0". Unplug Stand Mixer.

Unlock and lift the Motor Head. Then, lock** the head to keep it lifted.

Slip accessory onto beater shaft and press upward as far as possible. Then, turn accessory to the right, hooking accessory over the pin on the shaft.

**Locking option is available on selected models.

USING THE STAND MIXER

BEATER TO BOWL CLEARANCE

Your Stand Mixer is adjusted at the factory so the Flat Beater just clears the bottom of the Bowl. If, for any reason, the Flat Beater hits the bottom of the Bowl or is too far away from the Bowl, you can correct clearance easily.

Turn speed control to "0". Unplug Stand Mixer.

Lift motor head. Turn screw slightly counterclockwise (left) to raise Flat Beater or clockwise (right) to lower Flat Beater. Make adjustment with Flat Beater, so it just clears surface of Bowl. If you overadjust the screw, the Bowl lock lever may not lock into place.

NOTE: When properly adjusted, the Flat Beater will not strike on the bottom or side of the Bowl. If the Flat Beater or the Wire Whip is so close that it strikes the bottom of the Bowl, coating may wear off the beater or wires on whip may wear.

PLACING/REMOVING THE POURING SHIELD*

To place Pouring Shield: Turn speed control to "0". Unplug Stand Mixer. Attach your chosen accessory. See the "Attaching/removing the Flat Beater, Wire Whip, or Dough Hook" section.

From the front of the Stand Mixer, slide the Pouring Shield over the Bowl until the shield is centred. The bottom rim of the shield should fit within the bowl.

*Included with select models only. Also available as an optional accessory.

USING THE STAND MIXER

To remove Pouring Shield: Turn speed control to "0". Unplug Stand Mixer.

Lift the front of the Pouring Shield clear of the Bowl rim and pull forward. Remove attachment and Bowl.

USING THE POURING SHIELD*

Use the Pouring Shield to avoid having ingredients splashing out of the Bowl when mixing, as well as to easily pour ingredients in the Bowl while mixing.

For best results, rotate the shield so the motor head covers the U-shaped gap in the shield. The pouring chute will be just to the right of the attachment hub as you face the Stand Mixer.

Pour the ingredients into the Bowl through the pouring chute.

*Included with select models only. Also available as an optional accessory.

USING THE STAND MIXER

OPERATING THE SPEED CONTROL

NOTE: The Stand Mixer may warm up during use. Under heavy loads with extended mixing time, the top of the unit may become hot. This is normal.

Plug Stand Mixer into proper electrical outlet. Always set speed control lever on lowest speed to start, then gradually increase speed to avoid splashing ingredients. See "Speed control guide" chart.

Do not scrape Bowl while Stand Mixer is operating. The Bowl and beater are designed to provide thorough mixing without frequent scraping. Scraping the Bowl once or twice during mixing is usually sufficient.

OPTIONAL ATTACHMENTS

KitchenAid offers a wide range of optional attachments such as food grinders or pasta makers. They may be attached to the Stand Mixer attachment power shaft, as shown here.

To attach: Turn speed control to "0". Unplug Stand Mixer.

Loosen attachment knob by turning it counterclockwise. Remove attachment hub cover.

USING THE STAND MIXER

Insert attachment shaft housing into attachment hub, making certain that attachment power shaft fits into square attachment hub socket. It may be necessary to rotate attachment back and forth. When attachment is in proper position, the pin on the attachment will fit into the notch on the hub rim.

Tighten attachment knob by turning clockwise until attachment is completely secured to Stand Mixer. Plug into proper electrical outlet.

Plug into proper electrical outlet.

To remove: Turn speed control to "0". Unplug Stand Mixer.

Loosen attachment knob by turning it counterclockwise. Rotate attachment slightly back and forth while pulling out.

Problem	Solution
If Stand Mixer warms up during use:	Under heavy loads with extended mixing time periods, you may not be able to comfortably touch the top of the unit. This is normal.
The Stand Mixer emit a pungent odor:	This is common with electric motors, especially when new.
If the Flat Beater hits the Bowl:	Stop the Stand Mixer. See the "Beater to Bowl clearance" section and adjust the beater to Bowl clearance.
If your Stand Mixer should fail to operate, please check the following:	Is the Stand Mixer plugged in?
	Is the fuse in the circuit to the Stand Mixer in working order? If you have a circuit breaker box, be sure the circuit is closed.
	Turn off the Stand Mixer for 10-15 seconds, then turn it back on. If the Stand Mixer still does not start, allow it to cool for 30 minutes before turning it back on.
If the problem cannot be corrected:	See the "Terms of KitchenAid Guarantee ("Guarantee")" section.
	Do not return the Stand Mixer to the retailer; retailers do not provide service.
