Required Parts

Upper Base

Bottom Base

Process

**Connect Upperbody
with the Bottom**

After connecting
(it should look like this)

Your chair is ready now !

Congratulations !

100% Done

1. Adjusting the Seat Height:

To raise your seat, vacate the seat & pull up the lever placed below the seat.

To lower the seat, pull up the control handle while you're seated.

2. Backrest Locking:

To let your chair tilt back, pull the control handle out.

To stop your chair from tilting, sit forward, then push the control handle in.

3. Backrest Tension Control:

Turn the tilt knob clockwise to make it harder to rock your chair backward

Turn the tilt knob anti-clockwise to make it easier to rock your chair backward

Note: If your chair won't tilt back, pull out the control handle

Cleaning & Maintenance

- Periodically clean the seat cover using a vacuum cleaner. Use the correct attachment for vacuuming upholstery. Use the setting for upholstery (low suction).
- Use a dry sponge to remove dirt.
- If required, use a slightly damp cloth to clean heavily soiled areas, then wipe dry using a dry cloth.
- Occasionally, thoroughly wipe the frame using a slightly damp cloth. Then dry the frame using a dry cloth.
- Do not use strong cleaning agents or abrasives.
- Do not use the chair unless all screws are securely tightened. Screws & Joints should be re-tightened regularly.

Safety & Compliance

- Use care when handling.
- Assemble the chair on carpet to prevent scratching the chair.
- Do not use power tools.
