Step 1

Step 2

Step 3

Step 4

Step 5

Final Assembly

Step 6

1. The position of the track center is equal to the height of the door plus 1.57in (40mm) (Figure 1) (this will leave approximately 9mm gap between the floor and the bottom of the door)
2. Use a high-quality pencil and gently draw a pencil line on the wall to indicate the center position of the fixed track (Figure 2).
3. Mark the line where the guide rail spacing holes are located, and drill the fastener holes in advance using a 0.354in (9mm) drill bit on the wall.
4. Install the guide rail using the provided self tapping screws, pipe clamps, and guide rail washers.

Attention: Even if there is solid wood behind, do not directly install the guide rail gasket on the gypsum board. Otherwise, the guide rail gasket may be compressed. Crushed gypsum board may cause malfunctions in the track system.

Step 7

1. Install the hanging wheel according to the hole position.(Figure 3)

Figure 3a

Figure 3b

2. install a sleeve at the bottom of the door (Fiaure 4), insert the sleeve.

Figure 4

Step 8

1. install the bottom stopper, The position of this bottom stopper is crucial for the normal operation of the double folding compartment door. Gently pull out the door insert the bottom stopper (Figure 5a) into the sleeve located at the bottom of the positioning door and reposition the door.
2. Use a leveling tool and pencil to mark the front and outer edges of the door on the bottom door panel of the door position (see Figure 5b)

Step 9

1. Lift the door up close to the wall, pull it forward, and connect it with the top connecting plate. The top of the door is equipped with fixed and adjustable rollers (See Figure 6a). (Ensure that the fixing screws on the side of the fixed roller and adjustable wheel are inserted into the slot)
2. Use the provided 2.5mm hex wrench to tighten the fixing screws to lock the adjustable meterscrew assembly on the top connecting plate (see Figure 6b). Setting this screw to a depth of approximately 9.5mm will ensure proper holding position.
3. Slide the door to the desired position on the track (Figure 6c)

Figure 6a

Figure 6b

Figure 6c

Step 10

1. Hang the roller on the guide rail and slide it to the appropriate position, then hook the back of the fixed bracket onto the back of the guide rail. Align the front screw hole with the roller for installation and fixation (Figure 7b)
2. Use a 13mm open-end wrench to tighten the M8 * 25mm screw between the roller and the fixed bracket (Figure 7c)
3. Use a 2.5mm hex wrench to tighten the fixing screws on the back of the bracket (Figure 7d)
