

## How do I turn up the bass for music listening?

### Prerequisites

- [Jabra Sound+ - Android](#)
- [Jabra Sound+ - iOS](#)

To turn up the bass using Jabra Sound+, you can manually adjust the **Music equalizer** or in **Music presets**, tap **Bass boost**.

Each Moment has different widgets, so depending on your selected Moment, the **Music Equalizer** and **Music presets** may not appear. You can find them by tapping **Edit widgets** at the bottom of each Moment. If you select a different Moment, you may need to repeat these steps.

Don't have Jabra Sound+ yet? You can download it from [Google Play](#) on your Android device and from the [App Store](#) on your iOS device.

### Note

For Jabra devices with earbuds, the EarGel fit and seal is essential for obtaining the full audio experience. Try out all three sizes of EarGels to find the fit that gives you the best combination of comfort and sound quality.
