USING THE UNIT SAFELY

INSTRUCTIONS FOR THE PREVENTION OF FIRE, ELECTRIC SHOCK, OR INJURY TO PERSONS

About ⚠ WARNING and ⚠ CAUTION Notices

⚠ WARNING	Used for instructions intended to alert the user to the risk of death or severe injury should the unit be used improperly.
⚠ CAUTION	Used for instructions intended to alert the user to the risk of injury or material damage should the unit be used improperly. * Material damage refers to damage or other adverse effects caused with respect to the home and all its furnishings, as well to domestic animals or pets.

About the Symbols

	The ⚠ symbol alerts the user to important instructions or warnings. The specific meaning of the symbol is determined by the design contained within the triangle. In the case of the symbol at left, it is used for general cautions, warnings, or alerts to danger.
	The ⚡ symbol alerts the user to items that must never be carried out (are forbidden). The specific thing that must not be done is indicated by the design contained within the circle. In the case of the symbol at left, it means that the unit must never be disassembled.
	The Ⓜ symbol alerts the user to things that must be carried out. The specific thing that must be done is indicated by the design contained within the circle. In the case of the symbol at left, it means that the power-cord plug must be unplugged from the outlet.

ALWAYS OBSERVE THE FOLLOWING

⚠ WARNING

To completely turn off power to the unit, pull out the plug from the outlet

Even with the power switch turned off, this unit is not completely separated from its main source of power. When the power needs to be completely turned off, turn off the power switch on the unit, then pull out the plug from the outlet. For this reason, the outlet into which you choose to connect the power cord's plug should be one that is within easy reach and readily accessible.

Concerning the Auto Off function

The power to this unit will be turned off automatically after a predetermined amount of time has passed since it was last used for playing music, or its buttons or controls were operated (Auto Off function). If you do not want the power to be turned off automatically, disengage the Auto Off function (p. 11).

Do not disassemble or modify by yourself

Do not carry out anything unless you are instructed to do so in the owner's manual. Otherwise, you risk causing malfunction.

Do not repair or replace parts by yourself

Be sure to contact your dealer, a Roland service center, or an official Roland dealer.

For a list of Roland service centers and official Roland dealers, refer to the Roland website.

⚠ WARNING

Do not use or store in the following types of locations

- Subject to temperature extremes (e.g., direct sunlight in an enclosed vehicle, near a heating duct, on top of heat-generating equipment); or are
- Damp (e.g., baths, washrooms, on wet floors); or are
- Exposed to steam or smoke; or are
- Subject to salt exposure; or are
- Exposed to rain; or are
- Dusty or sandy; or are
- Subject to high levels of vibration and shakiness; or are
- Placed in a poorly ventilated location.

Use only the stand that is recommended

This unit should be used only with a stand that is recommended by Roland.

Do not place in a location that is unstable

When using the unit with a stand recommended by Roland, the stand must be carefully placed so it is level and sure to remain stable. If not using a stand, you still need to make sure that any location you choose for placing the unit provides a level surface that will properly support the unit, and keep it from wobbling.

Precautions regarding placement of this unit on a stand

Be sure to follow the instructions in the Owner's Manual carefully when placing this unit on a stand (p. 6).

If it is not set up properly, you risk creating an unstable situation which could lead to the unit falling or the stand toppling, and may result in injury.

⚠ WARNING

Use only the supplied AC adaptor and the correct voltage

Be sure to use only the AC adaptor supplied with the unit. Also, make sure the line voltage at the installation matches the input voltage specified on the AC adaptor's body. Other AC adaptors may use a different polarity, or be designed for a different voltage, so their use could result in damage, malfunction, or electric shock.

Use only the supplied power cord

Use only the attached power cord. Also, the supplied power cord must not be used with any other device.

Do not bend the power cord or place heavy objects on it

Otherwise, fire or electric shock may result.

Avoid extended use at high volume

Use of the unit at high volume for extended periods of time may cause hearing loss. If you ever experience any hearing loss or ringing in the ears, you should immediately stop using the unit and consult a specialized physician.

Do not allow foreign objects or liquids to enter unit; never place containers with liquid on unit

Do not place containers containing liquid (e.g., flower vases) on this product. Never allow foreign objects (e.g., flammable objects, coins, wires) or liquids (e.g., water or juice) to enter this product. Doing so may cause short circuits, faulty operation, or other malfunctions.

WARNING

Turn off the unit if an abnormality or malfunction occurs

In the following cases, immediately turn off the power, remove the AC adaptor from the outlet, and contact your dealer, a Roland service center, or an official Roland dealer for service.

- The AC adaptor or the power cord has been damaged; or
- If smoke or unusual odor occurs; or
- Objects have fallen into, or liquid has been spilled onto the unit; or
- The unit has been exposed to rain (or otherwise has become wet); or
- The unit does not appear to operate normally or exhibits a marked change in performance.

For a list of Roland service centers and official Roland dealers, refer to the Roland website.

Be cautious to protect children from injury

Always make sure that an adult is on hand to provide supervision and guidance when using the unit in places where children are present, or when a child will be using the unit.

Do not drop or subject to strong impact

Otherwise, you risk causing damage or malfunction.

Do not share an outlet with an unreasonable number of other devices

Otherwise, you risk overheating or fire.

Do not use overseas

Before using the unit in overseas, consult with your retailer, the nearest Roland service center, or an authorized Roland distributor.

For a list of Roland service centers and official Roland dealers, refer to the Roland website.

CAUTION

Use only the specified stand(s)

This unit is designed to be used in combination with specific stands (KS-20X, KS-G8B, KS-10Z, KS-12) manufactured by Roland. If used in combination with other stands, you risk sustaining injuries as the result of this product dropping down or toppling over due to a lack of stability.

* The KS-G8B is used only for the FANTOM-08.

Evaluate safety issues before using stands

Even if you observe the cautions given in the owner's manual, certain types of handling may allow this product to fall from the stand, or cause the stand to overturn. Please be mindful of any safety issues before using this product.

When disconnecting the power cord, grasp it by the plug

To prevent conductor damage, always grasp the power cord by its plug when disconnecting it.

Periodically clean the power plug

An accumulation of dust or foreign objects between the power plug and the power outlet can lead to fire or electric shock.

At regular intervals, be sure to pull out the power plug, and using a dry cloth, wipe away any dust or foreign objects that may have accumulated.

Disconnect the power plug whenever the unit will not be used for an extended period of time

Fire may result in the unlikely event that a breakdown occurs.

Route all power cords and cables in such a way as to prevent them from getting entangled

Injury could result if someone were to trip on a cable and cause the unit to fall or topple.

Avoid climbing on top of the unit, or placing heavy objects on it

Otherwise, you risk injury as the result of the unit toppling over or dropping down.

CAUTION

Never connect/disconnect a power plug if your hands are wet

Otherwise, you could receive an electric shock.

Disconnect all cords/cables before moving the unit

Before moving the unit, disconnect the power plug from the outlet, and pull out all cords from external devices.

Cautions when moving this unit (FANTOM-07, FANTOM-08 only)

If you need to move the instrument, take note of the precautions listed below. At least two persons are required to safely lift and move the unit. It should be handled carefully, all the while keeping it level. Make sure to have a firm grip, to protect yourself from injury and the instrument from damage.

- Disconnect the power cord.
- Disconnect all cords coming from external devices.

Before cleaning the unit, disconnect the power plug from the outlet

If the power plug is not removed from the outlet, you risk receiving an electric shock.

Whenever there is a threat of lightning, disconnect the power plug from the outlet

If the power plug is not removed from the outlet, you risk causing malfunction or receiving an electric shock.

Handle the ground terminal carefully

If you remove the screw from the ground terminal, be sure to replace it; don't leave it lying around where it could accidentally be swallowed by small children. When refastening the screw, make that it is firmly fastened, so it won't come loose.

IMPORTANT NOTES

Power Supply

- Do not connect this unit to same electrical outlet that is being used by an electrical appliance that is controlled by an inverter or a motor (such as a refrigerator, washing machine, microwave oven, or air conditioner). Depending on the way in which the electrical appliance is used, power supply noise may cause this unit to malfunction or may produce audible noise. If it is not practical to use a separate electrical outlet, connect a power supply noise filter between this unit and the electrical outlet.
- The AC adaptor will begin to generate heat after long hours of consecutive use. This is normal, and is not a cause for concern.
- Place the AC adaptor so that the side with text is downward.

Placement

- Using the unit near power amplifiers (or other equipment containing large power transformers) may induce hum. To alleviate the problem, change the orientation of this unit; or move it farther away from the source of interference.
- This unit may interfere with radio and television reception. Do not use this unit in the vicinity of such receivers.
- Noise may be produced if wireless communications devices, such as cell phones, are operated in the vicinity of this unit. Such noise could occur when receiving or initiating a call, or while conversing. Should you experience such problems, you should relocate such wireless devices so they are at a greater distance from this unit, or switch them off.
- When moved from one location to another where the temperature and/or humidity is very different, water droplets (condensation) may form inside the unit. Damage or malfunction may result if you attempt to use the unit in this condition. Therefore, before using the unit, you must allow it to stand for several hours, until the condensation has completely evaporated.
- Do not allow objects to remain on top of the keyboard. This can be the cause of malfunction, such as keys ceasing to produce sound.
- Depending on the material and temperature of the surface on which you place the unit, its rubber feet may discolor or mar the surface.

- Do not place containers or anything else containing liquid on top of this unit. Also, whenever any liquid has been spilled on the surface of this unit, be sure to promptly wipe it away using a soft, dry cloth.

Maintenance

- Never use benzine, thinners, alcohol or solvents of any kind, to avoid the possibility of discoloration and/or deformation.

Care of the Keyboard (FANTOM-08 only)

- Do not write on the keyboard with any pen or other implement, and do not stamp or place any marking on the instrument. Ink will seep into the surface lines and become unremovable.
- Do not affix stickers on the keyboard. You may be unable to remove stickers that use strong adhesives, and the adhesive may cause discoloration.
- To remove stubborn dirt, use a commercially available keyboard cleaner that does not contain abrasives. Start by wiping lightly. If the dirt does not come off, wipe using gradually increasing amounts of pressure while taking care not to scratch the keys.

Repairs and Data

- Before sending the unit away for repairs, be sure to make a backup of the data stored within it; or you may prefer to write down the needed information. Although we will do our utmost to preserve the data stored in your unit when we carry out repairs, in some cases, such as when the memory section is physically damaged, restoration of the stored content may be impossible. Roland assumes no liability concerning the restoration of any stored content that has been lost.

Additional Precautions

- Any data stored within the unit can be lost as the result of equipment failure, incorrect operation, etc. To protect yourself against the irretrievable loss of data, try to make a habit of creating regular backups of the data you've stored in the unit.
- Roland assumes no liability concerning the restoration of any stored content that has been lost.
- Use a reasonable amount of care when using the unit's buttons, sliders, or other controls; and when using its jacks and connectors. Rough handling can lead to malfunctions.
- Never strike or apply strong pressure to the display.

- When disconnecting all cables, grasp the connector itself—never pull on the cable. This way you will avoid causing shorts, or damage to the cable's internal elements.
- To avoid disturbing others nearby, try to keep the unit's volume at reasonable levels.
- The sound of keys being struck and vibrations produced by playing an instrument can be transmitted through a floor or wall to an unexpected extent. Please take care not to cause annoyance to others nearby.
- When disposing of the packing carton or cushioning material in which this unit was packed, you must observe the waste disposal regulations that apply to your locality.
- Do not use connection cables that contain a built-in resistor.

Using External Memories

- Please observe the following precautions when handling external memory devices. Also, make sure to carefully observe all the precautions that were supplied with the external memory device.
 - Do not remove the device while reading/writing is in progress.
- To prevent damage from static electricity, discharge all static electricity from your person before handling the device.

Intellectual Property Right

- It is forbidden by law to make an audio recording, video recording, copy or revision of a third party's copyrighted work (musical work, video work, broadcast, live performance, or other work), whether in whole or in part, and distribute, sell, lease, perform or broadcast it without the permission of the copyright owner.
- Do not use this product for purposes that could infringe on a copyright held by a third party. We assume no responsibility whatsoever with regard to any infringements of third-party copyrights arising through your use of this product.
- The copyright of content in this product (the sound waveform data, style data, accompaniment patterns, phrase data, audio loops and image data) is reserved by Roland Corporation.
- Purchasers of this product are permitted to utilize said content (except song data such as Demo Songs) for the creating, performing, recording and distributing original musical works.
- Purchasers of this product are NOT permitted to extract said content in original or modified form, for the purpose of distributing recorded medium of said content or making them available on a computer network.

PDF Manuals Available for Download

In addition to the Owner's Manual (this publication), the following PDF manuals are available for this product.

Reference Manual

This explains all functions of the FANTOM.

Parameter Guide

This explains all parameters of the FANTOM.

Sound List

A list of all internal tones.

DAW Control Guide

Explains how to control your DAW from the FANTOM.

MIDI Implementation

This is detailed information about MIDI messages.

Owner's Manual (latest version)

The PDF version of this Owner's Manual.

Download Instructions

- Enter the following URL in your computer.
<https://www.roland.com/manuals/>

- Choose "FANTOM-06/FANTOM-07/FANTOM-08" as the product name.

Placing This Unit on a Stand

Be careful not to pinch your fingers when setting up the stand. Place the instrument on the stand as follows.

* When using the KS-10Z, ensure that the height of the unit is one meter or lower.

If You're Using the FANTOM-06/FANTOM-07

If you want to place the FANTOM-06/FANTOM-07 on a stand, please use the KS-12, KS-10Z or KS-20X stands manufactured by Roland.

* The illustration shows the FANTOM-06.

KS-10Z

KS-12

KS-20X

If You're Using the FANTOM-08

If you want to place the FANTOM-08 on a stand, please use the KS-12, KS-10Z, KS-G8B, or KS-20X stands manufactured by Roland.

Panel Descriptions

Top Panel

1 Controller section

Controller	Explanation
WHEEL1 WHEEL2	You can assign various parameters or functions to these wheels. To use the assigned function, move a wheel while you perform. If you operate the controller while holding down the [SHIFT] button, the setting screen appears.
[S1] [S2] button	Various parameters or functions can be assigned to these buttons. Hold down the [SHIFT] button and press one of these buttons to access a screen that lets you assign a function.
Pitch bend/modulation lever	This allows you to control pitch bend or apply vibrato.

2 Zone section

Controller	Explanation
[MASTER VOLUME] knob	Adjusts the volume that is output from the MAIN OUT jacks and the PHONES jack.
[PAN/LEVEL] button	If you press the button to make it light, control knobs [1]–[8] adjust the pan of each zone, and sliders [1]–[8] adjust the volume of each zone. Press this button while holding down the [SHIFT] button to display the MIXER screen.
[CTRL] button	Pressing the button to make it light up lets you use control knobs [1]–[8] to control the parameters of the current zone in real time.
[ASSIGN] button	Assign other functions to sliders [1]–[8] and control knobs [1]–[8]. ASSIGN1 assigns parameters that you set for a scene, and ASSIGN2 assigns parameters that you edit in system settings. Hold down the [SHIFT] button and press one of these buttons to access a screen that lets you assign a function.
	How to switch between ASSIGN1 and ASSIGN2
	ASSIGN1 (SCENE) [ASSIGN] button
	ASSIGN2 (SYSTEM) [ASSIGN] button + [PAN/LEVEL] button

Controller	Explanation
[ZONE 9-16] button	Switches the zones that you're operating. Unlit: 1–8 Lit: 9–16
[ZONE SELECT] button	Select the zone that you want to control (the current zone). The selected zone becomes the current zone. When ZONE SELECT is on, use the ZONE INT/EXT [1]–[8] buttons to select the current zone.
Control knobs [1]–[8]	Various parameters or functions can be assigned to these knobs. The parameters that can be controlled depend on the function select buttons located at the left.
ZONE INT/EXT buttons [1]–[8]	Specify whether the applicable zone does sound or does not sound when you play the keyboard. In conjunction with the current zone, this determines how the internal sound engine (external sound module) produces sound. When ZONE SELECT is on, the buttons operate as ZONE SELECT [1]–[8] buttons.
Sliders [1]–[8]	Various parameters or functions can be assigned to these sliders. The parameters that can be controlled depend on the function select buttons located at the left.
[SPLIT] button	Turns the split function on/off.
[CHORD MEMORY] button	Turns the chord memory function on/off.
[ARPEGGIO] button	Turns the arpeggiator on/off.
[TRANPOSE] button	Hold down this button and use the OCTAVE [DOWN] [UP] buttons to raise or lower the pitch range in semitone steps.
OCTAVE [DOWN] [UP] button	Raise or lower the pitch range in steps of an octave.

3 Common section

Controller	Explanation
[WRITE] button	The WRITE screen appears. Saves a scene or tone.

Controller	Explanation
[MASTER FX] button	The MASTER FX screen appears. If you hold down the [SHIFT] button and press this button, the MASTER EQ editing screen appears.
[MOTIONAL PAD] button	The MOTIONAL PAD screen appears.
[DAW CTRL] button	Lets you use this unit as a DAW controller.
[MENU] button	The MENU screen appears.
Display	Shows various information depending on operation.
FUNCTION knobs [E1]–[E6]	Turning a knob modifies the function or parameter value that is shown below in the screen. You can also press these knobs in to execute an operation or confirm a value.
[TEMPO] button	The TEMPO screen appears. You can set the tempo by repeatedly pressing the button at the desired interval.
[VALUE] dial	Changes a value. If you hold down the [SHIFT] button and turn the [VALUE] dial, the value changes more greatly.
[DEC] [INC] button	Changes a value. If you press one of these buttons while holding down the other, the value changes more rapidly. If you press one of these buttons while holding down the [SHIFT] button, the value changes more greatly.
Cursor [▲] [▼] [◀] [▶] buttons	Move the cursor position up/down/left/right. These buttons also switch between screens.
[SHIFT] button	Accesses the corresponding edit screen when pressed together with another button.
[EXIT] button	This button returns to the previous screen or closes the open window. If you press this button while holding down the [SHIFT] button, an all note-off message is output to the sound engine and via MIDI. This is useful for muting sounds including the sounds of external devices that keep playing, and in other similar instances.
[ENTER] button	Used to confirm a value, execute an operation, or view lists or other items.

4 Scene section

Controller	Explanation
[SCENE SELECT] button	The SCENE SELECT screen appears. Here you can select a scene.
[SCENE CHAIN] button	The SCENE CHAIN screen appears. This lets you recall scenes in a specified order.
[ZONE VIEW] button	The ZONE VIEW screen appears. Here you can check the state of each zone.
[SINGLE TONE] button	Recalls a piano sound to zone 1. Zones other than 1 are turned off. NOTE Note that when you press this button, unsaved scene settings are lost.

5 SYNTH control section

Controller	Explanation
[OSC] button	Accesses the OSC setting screen of the TONE EDIT ZOOM screen.
[CUTOFF] knob	Specifies the cutoff frequency of filter.
[RESONANCE] knob	Specifies the resonance of filter. 
[FILTER TYPE] button	Specifies the type of filter.
[PARAM] button	Accesses the FILTER setting screen of the TONE EDIT ZOOM screen.
[AMP] button	Accesses the AMP ENV screen.
[FX] button	Accesses the MFX EDIT screen.
[LFO] button	Accesses the LFO1 screen.

6 Sequencer section

Controller	Explanation
[PATTERN] button	The PATTERN screen appears.
[GROUP] button	The GROUP screen appears.
[SONG] button	The SONG screen appears.
[TR-REC] button	Enables TR-REC. (p. 29)
[RHYTHM PTN] button	The RHYTHM PATTERN screen appears.
[■STOP] button	Stops pattern playback or recording, or stops playback of the group or song.
[▶PLAY] button	Plays the pattern, group, or song.
[●REC] button	Enters the record-standby condition.
Tone category buttons [1]–[16]	Select tones in each category. Depending on the situation, these buttons are also used for other things such as TR-REC input or as a selector for the SCENE CHAIN function.

7 Pad section

Controller	Explanation
[SAMPLING] button	Lets you sample.
[PAD MODE] button	Specifies the functions that are assigned to the pads. Hold down the [SHIFT] button and press this button to access the edit screen for the currently selected pad mode and related screens.
[CLIP BOARD] button	Lets you move or copy a sample from one pad to another.
[BANK] button	Switches the pad bank.
[HOLD] button	Turns hold on/off (allowing the sound to continue even after you release the pad).
Pads [1]–[16]	Play the samples assigned to each pad. You can make pad mode settings to assign various functions to the pads.

Rear Panel (Connecting the External Equipment)

* To prevent malfunction and equipment failure, always turn down the volume, and turn off all the units before making any connections.

A PEDAL jacks

Controller	Explanation
HOLD jack	If you connect a pedal switch (DP series, sold separately) to this jack, you can use it as a damper pedal.
CTRL2 jack	You can also assign various functions to the pedals that are connected to the CTRL 1 and CTRL 2 jacks.
CTRL1 jack	

* Use only the specified expression pedal. By connecting any other expression pedals, you risk causing malfunction and/or damage to the unit.

B MIDI connectors

Controller	Explanation
MIDI OUT connector	Transmit or receive MIDI messages to or from an external MIDI device connected here.
MIDI IN connector	

C USB port

Controller	Explanation
USB EXT DEVICE jack	Connect this to an external USB device.
USB COMPUTER port	Connect this to your computer to transfer performance data and audio signals.
USB MEMORY port	Use a commercially available USB flash drive. However, we cannot guarantee that all commercially available USB flash drives will work.

D MIC/LINE INPUT jacks

Controller	Explanation
LEVEL knob	Adjusts the input level of the MIC INPUT jack. MAX MIN
MIC jack	Connect your microphone here.
R, L/MONO jacks	Connect your audio device, external synthesizer or other equipment to these jacks.

E SUB OUT jacks

Controller	Explanation
R, L/MONO jacks	These are output jacks for sub-out audio.
STEREO (PHONES) jack	The SUB OUT audio signal is output in stereo. You can also connect a pair of headphones here with a stereo mini plug. When doing so, set the volume from the MIXER screen, and the source you want to hear from the OUTPUT screen.

F MAIN OUT jacks

Controller	Explanation
R, L/MONO jacks (Balanced)	These are balanced output jacks for audio signals. Connect them to your mixer. * Pin assignment of MAIN OUT jack

G PHONES jack

A set of headphones can be connected to this jack.
Even if headphones are connected, an audio signal is sent from the OUTPUT jacks and BALANCED OUT jacks.

H Ground terminal

Connect this to an external earth or ground if necessary.

I [POWER] switch

Turns the power on/off.

J DC IN jack

Connect the included AC adaptor here.

K Cord hook

If the included AC adaptor is connected to the DC IN jack, secure the cord to this hook to prevent it from being accidentally disconnected.

Turning the Power On/Off**Turning on the Power****1. Minimize the volume of this unit.**

Also completely turn down the volume of any connected external devices.

2. Press the [⏻] switch.

The unit is turned on, and the display's backlighting comes on.

3. Turn on the power to connected external devices.**4. Adjust the volume of the connected external devices.****5. Adjust the volume of this unit.****Turning off the Power****1. Minimize the volume of this unit.**

Also completely turn down the volume of any connected external devices.

2. Turn off the power of the connected external devices.**3. Press the [⏻] switch.**

The unit is turned off.

* Before turning the unit on/off, always be sure to turn the volume down. Even with the volume turned down, you might hear some sound when switching the unit on/off. However, this is normal and does not indicate a malfunction.

Making the Power Automatically Turn off After a Time (Auto Off)

The power to this unit will be turned off automatically after a predetermined amount of time has passed since it was last used for playing music, or its buttons or controls were operated (Auto Off function).

If you do not want the power to be turned off automatically, disengage the Auto Off function.

NOTE

- Unsaved data is lost when the power turns off. Any data that you want to keep must be saved in advance.
- To restore power, turn the power on again.

Changing the Auto Off Setting**1. Press the [MENU] button.**

The MENU screen appears.

2. Touch <SYSTEM>.

The SYSTEM screen appears.

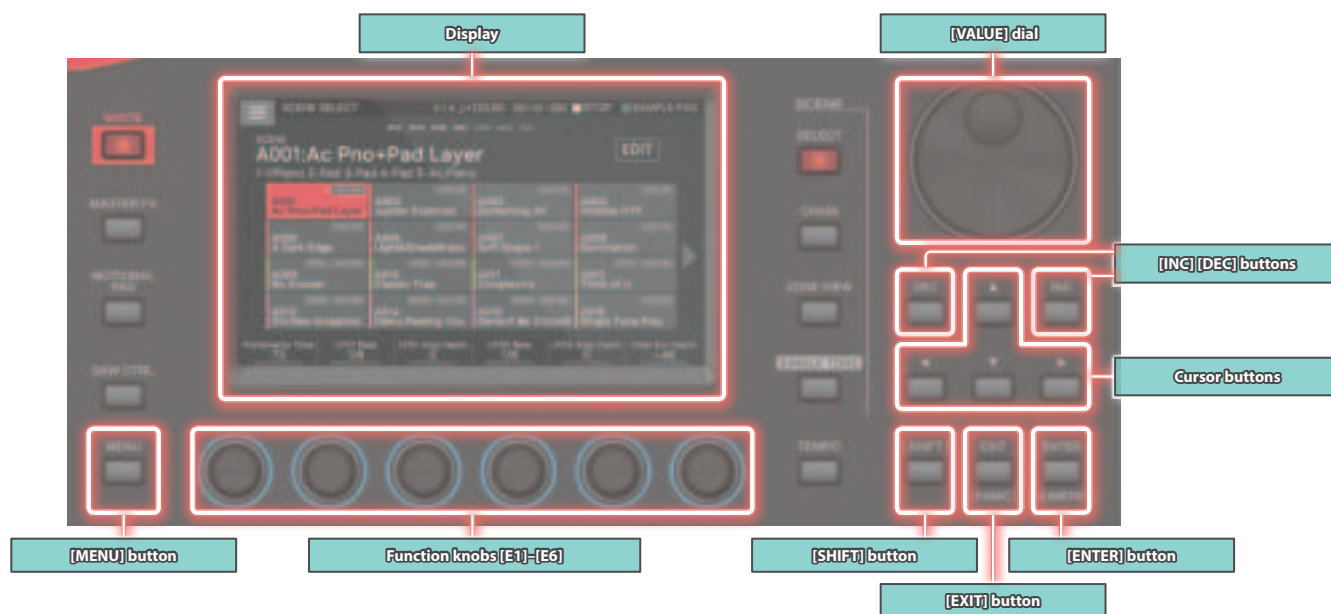

3. Touch <GENERAL>.**4. Select "Auto Off" and change the setting.**

Parameter	Value	Explanation
Auto Off	Off	The power will not turn off automatically.
	30min	The power will automatically turn off if no operation is performed for 30 minutes.
	240min (default)	The power will automatically turn off if no operation is performed for 240 minutes (four hours).

5. If you want to store the auto-off setting, press the [WRITE] button in the System screen.

Introduction

Basic Operation

Editing a Value

Use the following methods to modify a setting's value.

[INC] [DEC] buttons

Press the [INC] button to increase the value; press the [DEC] button to decrease the value.

Purpose	Operation
Modifying a value continuously	Hold down the [DEC] button or [INC] button.
Modifying a value rapidly	Hold down the [INC] button and press the [DEC] button to make the value increase faster.
	Hold down the [DEC] button and press the [INC] button to make the value decrease faster.
Modifying a value more greatly	Hold down the [SHIFT] button and press the [DEC] button.
	Hold down the [SHIFT] button and press the [INC] button.

[VALUE] dial

Turn the dial clockwise to increase the value, or counter-clockwise to decrease the value.

Purpose	Operation
Modifying a value more greatly	Hold down the [SHIFT] button and turn the [VALUE] dial.

Display (Touch panel)

You can directly touch or drag an on/off icon, knob icon, or slider icon in the screen to switch a setting on/off or to edit a value.

NUMERIC window

If you hold down the [SHIFT] button and press the [ENTER] button, the numeric window appears. This is a convenient way to directly enter a numeric parameter value from the touch panel.

NOTE

Some parameters don't support numeric input.

Moving the Cursor

Multiple setting items (parameters) or selection items are shown in a single screen or window. To edit them using the [INC] / [DEC] buttons or the [VALUE] dial, move the cursor to the location of the item you want to edit.

Use the following methods to move the cursor.

Cursor [▲] [▼] [◀] [▶] buttons

Press a cursor button to move the cursor in the corresponding direction.

Purpose	Operation
Moving the cursor continuously	Hold down the cursor button.
Moving the cursor rapidly	While continuing to hold down one cursor button, hold down the cursor button of the opposite direction.

Display (Touch panel)

By directly touching a parameter value, knob icon, or slider icon in the screen, you can move the cursor to that location.

NOTE

Some icons do not move the cursor.

Confirming or Canceling the Value

[ENTER] button

Use this button to confirm a value or execute an operation.

When you move the cursor to a tone or parameter and press the [ENTER] button, a list appears, allowing you to change the setting.

[EXIT] button

This button returns to the previous screen, or closes the open window.

Display (Touch panel)

The <OK> or <SELECT> that are shown on a confirmation screen have the same function as the [ENTER] button, and <CANCEL> or <EXIT> have the same function as the [EXIT] button.

[SHIFT] Button

This is used in conjunction with other buttons.

By holding down the [SHIFT] button and pressing another button, you can move to the related edit screen for the button that you pressed (shortcut).

Function Knobs [E1]–[E6]

These knobs perform the functions that are assigned to them in each screen, such as editing parameters or scrolling lists or tabs.

By pressing a knob, you can edit a value with a button-like operation.

Knob and Slider Operations

When you use a knob or slider to edit a setting, the edited parameter and its value are shown in a popup screen.

The popup screen closes automatically after a time.

Some parameters don't show a popup screen.

[MENU] Button

Allows you to make detailed settings for a function, or system settings. You can also access the menu screen by touching the <≡> icon located in the upper left of the SCENE SELECT screen.

Operating procedures in this manual

On this unit, operations such as "editing a value," "moving the cursor," "setting/cancelling a value," or "moving to a screen" can be performed on multiple ways, as explained earlier. (For example, "button operations," "touch panel operations," "[value] dial operations," etc.)

To avoid making the subsequent explanations in this manual unnecessarily complex, we will not always describe all of these methods, but may simply provide an abbreviated explanation such as "move the cursor to * and edit the value." In actual operation, you may use any of the above methods as is convenient for you.

Operations in the Display

This unit's display is a touch panel; you can perform various operations by directly touching the display. There are many screens, but here we explain the typical screen operations.

Text enclosed in [] indicates buttons shown in the panel. Text enclosed in < > indicates buttons or knobs shown in the screen.

NOTE

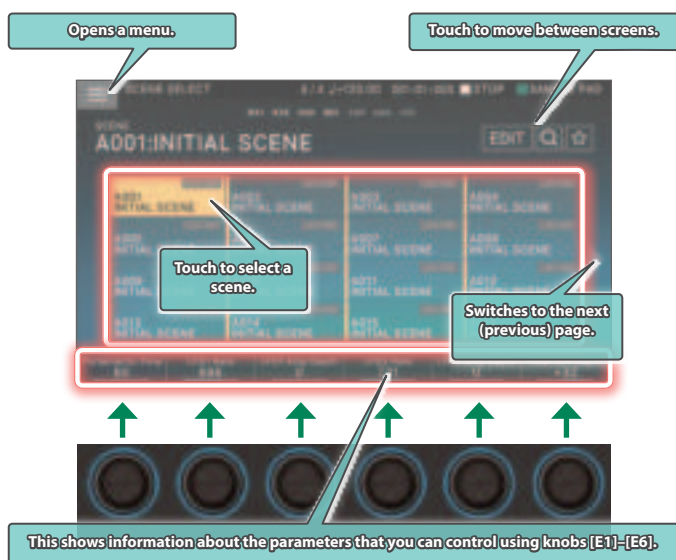

A light touch with your finger is sufficient to operate the touch panel.

The touch panel might be damaged if you press it strongly, or if you press it with a hard object. Do not use excessive force, and use only your finger to operate it.

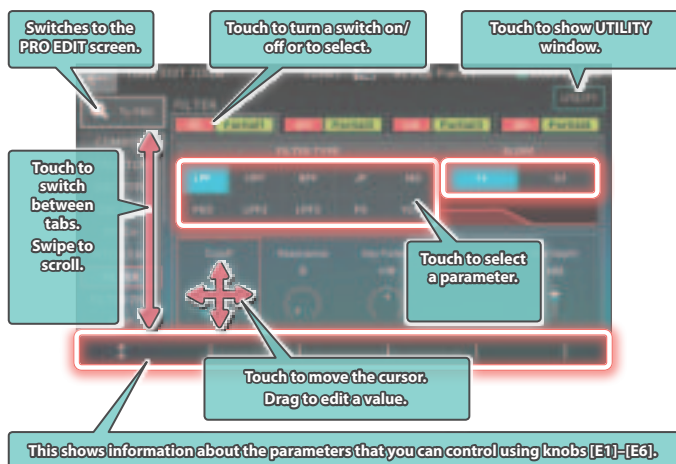

MEMO

If you lose track of which screen you're in, you can return to the SCENE SELECT screen by pressing the [EXIT] button several times or by pressing the [SCENE SELECT] button.

SCENE SELECT screen

MENU screen

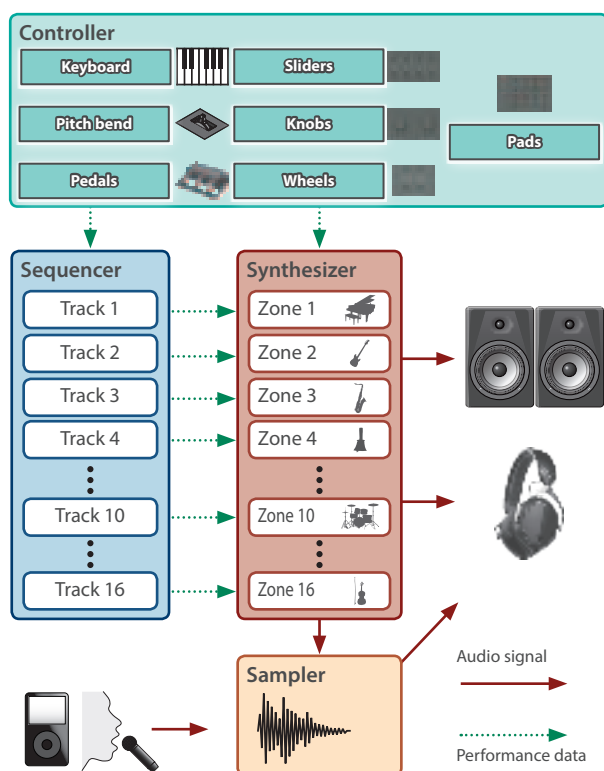

RENAME screen

An Overview of This Unit

Broadly speaking, this unit consists of four sections: controller, synthesizer, sequencer, and sampler.

Controller

This includes the keyboard, pads, pitch bend/modulation lever, wheels, panel knobs, sliders, and pedals connected to the rear panel. When you perform a performance operation such as pressing or releasing a key or pressing the damper pedal, the operation is converted into a MIDI message and transmitted to the sound engine and to an external MIDI device.

Synthesizer

This is the section that generates and modifies sound. In response to the performance data from the controller, it produces an audio signal that is output from the OUTPUT jacks and the PHONE jack. This section produces sounds ranging from piano to organ, strings, lead synths, drums and more.

Sequencer

This lets you create patterns using a 16-track MIDI sequencer (p. 26).

Tones of the 16 zones in the scene can be recorded directly using the 16 tracks. Realtime recording, step recording, and TR-REC are provided.

You can combine patterns to create groups, and place groups in the desired order to create a song.

Pattern

This is a unit of sequence data that records performance data for an individual tone. There can be up to eight patterns in one track. You can record up to 32 measures in one pattern.

Group

This records a combination of patterns for each track. You can create up to 16 groups in one scene.

Song

By placing groups in the desired order you can create a "song" that records that order. You can create one song in one scene.

Sampler

The sampler section lets you audio-record (sample) the sound of your keyboard performance or the input sound from an audio device or mic. The recorded sample can be played by pressing a pad.

This instrument features a built-in sampler that supports multisamples, whose sound can be heard via the sound engine.

➡ For details, refer to "Reference Manual" (PDF).

This manual explains about the pad sampler (p. 23).

Sample

This is a piece of sampled sound. For each sample, you can specify looping and other settings, and assign it to a pad.

Units of Sound

TONE

A “tone” is the smallest unit of sound on this unit.

A tone consists of the combination of sound engine and effects (MFX+EQ).

Use the tone category buttons [1]–[16] to select tones by their category.

You can edit a tone and then save it as a user tone.

Some tones are “drum kits” which provide a collection of percussion instrument sounds.

In a drum kit, different percussion instrument sounds are heard depending on the key (note number) that you play.

ZONE

This is a container for playing a tone.

To play a tone, you assign it to a zone. For each zone, you can specify whether it is connected to the keyboard, and make settings such as its key range, volume, pan, and controller reception.

There are 16 zones; by combining zones you can create sounds that consist of multiple tones, or create foundational performance (sound) settings for each song.

You can also use specific zones to control an external sound module (EXT ZONE) instead of the internal sound engine.

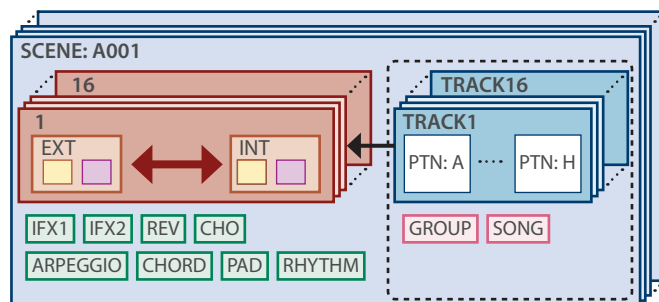

SCENE

A scene contains a favorite performing state, including settings for each zone (tone, MFX, volume, etc.), settings common to all zones (Reverb, Chorus, IFX, etc.), and sequence data for each zone.

You can store an idea for a song or phrase as a scene, and manage scenes by switching them for each song.

You can freely recall saved scenes in the SCENE SELECT screen that appears after startup.

By using the SCENE CHAIN function you can place and recall scenes in the order of the songs that you’ll be playing live, or collect frequently-used scenes for easy recall (p. 17).

MEMO

You can make this instrument stay in a scene (Scene Remain).

The icon at the top of the screen shows whether this feature is on or off.

: OFF, : ON

For details on the scene remain settings, refer to the “Reference Manual” (PDF).

Effects

This instrument features a variety of effects.

Tone Effect (MFX, COMP)

These effects are configured per tone. The COMP effect can be used for tones that are set as drum kits.

Zone Effect (EQ)

These effects are configured per zone.

Scene Effect (IFX 1, IFX 2, Chorus, Reverb)

These effects are configured per scene.

Master FX (M. COMP, M. EQ, TFX)

These effects apply to the system overall. Use these effects at the final stage of sound output.

The TFX can be controlled in real time.

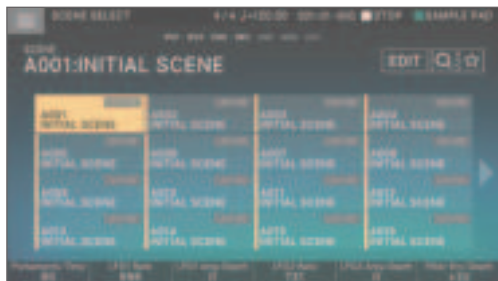

Performing

Selecting a Sound (SCENE/TONE)

Selecting a Scene

1. Press the [SCENE SELECT] button.

The SCENE SELECT screen appears.

2. Touch a scene icon in the screen to select the desired scene.

The icon of the selected scene is colored.

Sixteen scene icons are arranged in the screen as a 4 x 4 grid, and you can select one of these scenes. By touching the “◀” or “▶” icon located at the left or right edge of the screen, you can choose from the “previous” or “next” 16 scenes.

Selecting a Tone

1. Press the [ZONE VIEW] button.

The ZONE VIEW screen appears.

Each time you press the [ZONE VIEW] button, the VIEW number (the number of zones shown simultaneously) is switched.

2. When ZONE SELECT is on, use the ZONE INT/EXT [1]–[8] buttons to select the current zone (the zone to operate).
3. Press a ZONE SELECT button [1]–[8] to select the zone that you want to control.

To select zones 9–16, use the [ZONE 9-16] button to switch groups, and then press a ZONE SELECT [1]–[8] button.

4. Press a tone category button [1]–[16] to select the type (category) of tone.
5. Move the cursor to the tone name (number), and use the [VALUE] dial or the [INC][DEC] buttons to select a tone.

- When the cursor is located at the tone name (number), pressing the [ENTER] button displays the “TONE LIST.”

Layering Zones (Layer)

1. Press the ZONE INT/EXT button of the zones that you want to layer, making them light red.
2. Of the zones that are lit, press the ZONE SELECT button of one zone to specify it as the current zone.

When you play the keyboard, the zones lit red are sounded as layers.

NOTE

Zones whose ZONE INT/EXT button is lit green are controlling an external MIDI sound module.

To switch to the internal sound engine, once again hold down the [SHIFT] button and press the corresponding ZONE INT/EXT button to make the button light red (INT setting).

Dividing the Keyboard into Two Regions (Split)

1. Press the [SPLIT] button to make it light.
- The high region plays the zone 1 tone, and the low region plays the zone 4 tone.
2. To cancel split, press the [SPLIT] button to make it go dark.

When you cancel split, the high and low regions (KEY RANGE) are reset, and return to the layer state.

Changing the Keyboard's Split Point

1. While holding down the [SPLIT] button, press the key that is to become the new split point.

The split point is shown.

When you release the [SPLIT] button, the previous display will reappear.

The split-point key is included in the ZONE 1 section.

MEMO

- If you want to change the tone of the upper key range, press ZONE SELECT [1]; if you want to change the tone of the lower key range, press ZONE SELECT [4]. Then select a tone.
- By using the KEY RANGE function you can freely specify the key range for each zone.
- Hold down the [SHIFT] button and press the [SPLIT] button to switch to the KEY RANGE setting screen.

Raising/Lowering the Key Range in Semitones (Transpose)

1. Hold down the [TRANPOSE] button and press the OCTAVE [DOWN] button or [UP] button.
 - You can change this setting in a range of -5—+6 semitones.
 - To return to the original setting, hold down the [TRANPOSE] button and press the OCTAVE [DOWN] button and [UP] button simultaneously.

Raising/Lowering the Key Range in Octaves (Octave)

1. Press the OCTAVE [DOWN] button or [UP] button.
 - You can change this setting for a maximum of ± 3 octaves.
 - To restore the original setting, press the OCTAVE [DOWN] button and [UP] button simultaneously.

Playing Arpeggios

The arpeggiator is a function that automatically produces an arpeggio based on the keys that you press.

1. On ZONE VIEW, turn ARP "ON" for the applicable zone.

2. Press the [ARPEGGIO] button to make it light.

3. Play a chord on the keyboard.
According to the notes of the chord you play, an arpeggio starts playing for zones that are on.
4. Move the cursor to "STYLE" and change the style.
The arpeggio performance changes according to the selected style.
5. To turn off this function, press the [ARPEGGIO] button once again to make it dark.

MEMO

By using this in conjunction with the chord memory function, you can easily play a variety of arpeggio sounds using just one finger.

Playing Chords (Chord Memory)

Chord memory is a function that sounds a pre-registered chord form when you play a single note on the keyboard.

1. Press the [CHORD MEMORY] button to make it light.

2. Play the keyboard.
A chord sounds according to the currently selected chord form.
3. Move the cursor to "CHORD FORM" and change the chord form.
The way in which the chord plays will change.
4. To turn off this function, press the [CHORD MEMORY] button once again to make it dark.

Selecting/Playing Rhythm Patterns

This unit lets you perform while a rhythm pattern plays.

1. Press the [RHYTHM PATTERN] button.

The RHYTHM PATTERN screen appears.

2. Move the cursor to "RHYTHM GROUP."
3. Use the [VALUE] dial to select a rhythm group.
4. Touch <Intro>—<Ending> to select the rhythm pattern that you want to play.
The rhythm pattern plays.

MEMO

To stop, touch the icon of the rhythm pattern that's playing.

Changing the Tempo

1. Press the [TEMPO] button to access the TEMPO screen.
2. Use the [VALUE] dial to change the tempo.

MEMO

You can specify the tempo by pressing the [TEMPO] button at the desired timing (tap tempo). Press three times or more at quarter-note intervals of the desired tempo.

Using the Sliders and Control Knobs

1. Switch the zone (ZONE 1–16) you want to use.

MEMO

Use the [ZONE 9–16] button to switch between either the ZONE 1–8 or the ZONE 9–16.

2. Press a function select button to select the parameter that you want to control.

Button	Explanation
[PAN/LEVEL] button	The control knobs adjust the pan of each zone, and the sliders adjust the volume of each zone.
[CTRL] button	Use the control knobs [1]–[8] to control the parameters of the current zone in real time. ATTACK, RELEASE, REVERB, CHORUS, LOW GAIN, MID GAIN, HIGH GAIN, EQ ON
[ASSIGN] button	You can use the control knobs and sliders to adjust the preset parameters. SCENE settings: [ASSIGN] SYSTEM settings: [ASSIGN] + [PAN/LEVEL]
[ZONE SELECT] button	Select the zone that you want to control (the current zone). The selected zone becomes the current zone. MEMO When ZONE SELECT is on, the functions of the ZONE INT/EXT [1]–[8] buttons change so that they select the current zone.

3. Move the control knobs and sliders.

The sound changes according to the assigned function (such as pan or volume).

MEMO

You can hold down the [SHIFT] button and press the [ASSIGN] button to access the edit screen for assigning parameters.

➔ For details, refer to "Reference Manual" (PDF).

Simultaneously Modifying the Volume of Multiple Zones (Motional Pad)

The motional pad function lets you simultaneously modify the volume of four zones by dragging in the screen. By using the motional pad function, you can produce diverse tonal changes with a single finger.

1. Press the [MOTIONAL PAD] button.

The MOTIONAL PAD screen appears.

The numbers of the zones being used with the motional pad function are shown in the zone number areas at the four corners of the screen. If an applicable zone is off, press the ZONE INT/EXT button [1]–[8] to turn the zone on.

2. Drag the circle (pointer) in the center of the screen to change its position.

The volume balance of the four zones changes according to the position of the pointer, and the sound changes in real time.

Editing a Zone

There are 16 zones, and you can specify settings such as volume (Level), equalizer (EQ), and key range (KBD) for each zone.

1. **Select a scene.**
2. **Press the [MENU] button.**
The MENU screen appears.
3. **Touch <ZONE EDIT>.**
The ZONE EDIT screen appears.
4. **Press the cursor [▲] [▼] buttons to select the zone that you want to control.**
To select a zone 9–16, use the [ZONE 9-16] button to switch the group.
5. **Move the cursor to the desired parameter, and edit the value.**

You can use knobs [E1]–[E6] to scroll between tabs, move the cursor, and directly edit parameters.

NOTE

Changes that you make to the zone settings are temporary. If you turn off the power or select another zone, the changes are lost.

If you want to keep the edited settings, save the scene (p. 22).

MEMO

For details on the zone parameters, refer to “Parameter Guide” (PDF).

Editing a Tone

Here’s how to edit a tone.

1. **As described in the procedure “Selecting a Tone” (p. 17), select the tone that you want to edit.**
2. **Press the [MENU] button.**
The MENU screen appears.
3. **Touch <TONE EDIT>.**
The TONE EDIT ZOOM screen appears.

4. **Move the cursor to the desired parameter, and edit the value.**

You can use knobs [E1]–[E6] to scroll between tabs and directly edit parameters.

MEMO

- For more detailed editing, use the TONE EDIT PRO screen. For details, refer to “Reference Manual” (PDF).
- For details on the tone parameters, refer to “Parameter Guide” (PDF).
- Aside from editing using the TONE EDIT ZOOM screen, you can use the [CUTOFF] and [RESONANCE] knobs on the right side of the panel to edit the tones.
- Pressing the [OSC], [AMP], [FX] and [LFO] buttons switches the screen to the respective section on the TONE EDIT ZOOM screen.

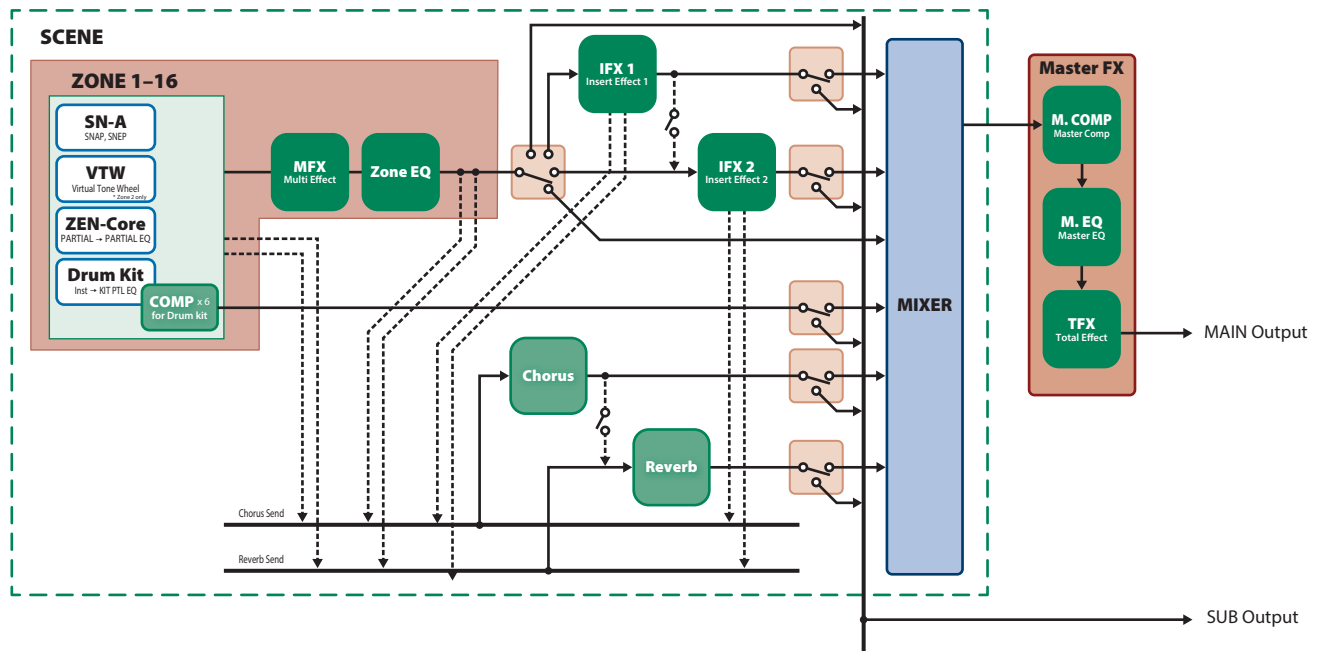

NOTE

Changes that you make to the tone settings are temporary. If you turn off the power or select another tone, the changes are lost. If you want to keep the edited settings, save the tone (p. 22).

Editing the Effects

The arrangement and signal paths for each effect are as shown below. Select the effect to match your needs, and then edit its settings. Here we'll explain how to edit the tone effects (MFX).

- For details on the IFX1/2, Chorus, Reverb and Master FX, see the "Parameter Guide" (PDF).

Editing the Tone's Effect (MFX)

Here's how to edit the tone's effect (MFX).

1. Press the [MENU] button.

The MENU screen appears.

2. Touch <EFFECTS EDIT>.

The EFFECTS EDIT screen appears.

Turning the MFX on/off

1. In the screen, touch <MFX> to turn it on/off.

Editing the MFX parameters

1. In the MFX section, touch <EDIT>.

The EFFECTS EDIT ZOOM screen appears.

2. In the MFX section, touch <EDIT>.

The MFX EDIT ZOOM screen for MFX appears.

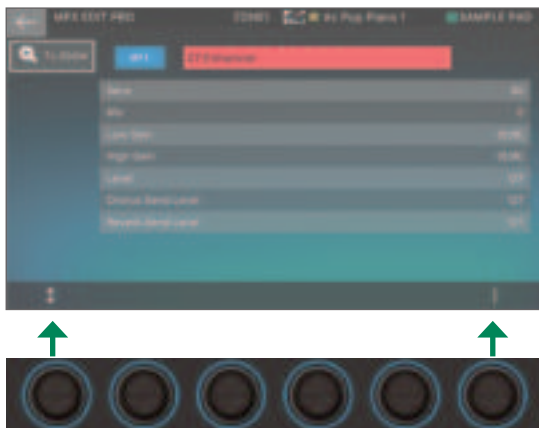

3. Move the cursor to the desired parameter, and edit the value.

You can use the knobs [E1]–[E6] to move the cursor or edit parameters directly.

4. Touch <To PRO>.

The MFX EDIT PRO screen appears.

NOTE

The edits that you make to the effect settings are temporary. They will be lost if you turn off the power or select another scene or tone. If you want to keep the changes you made, save the tone, scene, or system settings respectively.

MEMO

- In addition to editing the effect settings in the screen, you can also edit using the knobs and buttons of the EFFECTS section located in the right side of the panel (p. 9).
- For details on the parameters, refer to “Parameter Guide” (PDF).

Saving a Scene or Tone

The edited zone and tone settings, and the recorded data, are temporary. They will be lost if you turn off the power or select another scene or tone. If you want to keep your edited settings or recorded data, save them as follows.

NOTE

When you save, the data previously located in the save-destination is overwritten.

1. Press the [WRITE] button.

The WRITE MENU screen appears.

2. Touch the item that you want to save.

For example, if you touch <SCENE>, the SCENE WRITE screen appears.

3. If you want to change the name, touch <Rename> and edit the name.

After changing the name, touch <OK> to close the window.

4. Use the [VALUE] dial or the [DEC][INC] buttons to select the save-destination.

5. Touch <OK>.

A confirmation message appears.

To cancel, touch <CANCEL>.

6. Touch <OK>.

The data is saved.

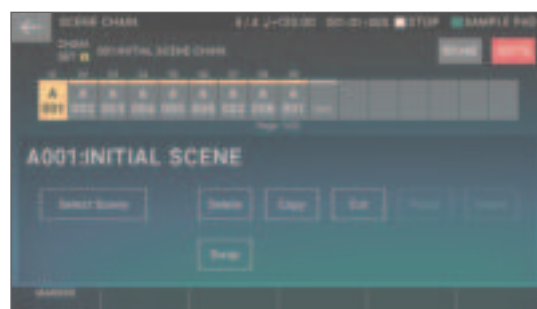

Recalling Scenes in the Order of Songs (Scene Chain)

Use the SCENE CHAIN function when you want to recall scenes in the order of the songs that you'll be playing live.

A scene chain lets you specify the desired order of the scenes that you'll be using, without changing the numbers of the scenes themselves. The order of scenes can be saved as a chain set, and by switching the chain set you can change the order of the scenes.

1. Press the [SCENE CHAIN] button.

The SCENE CHAIN screen appears.

2. Touch the “CHAIN SET” name and switch chain sets.

You can also switch the chain set by pressing the [▲] [▼] buttons while holding down the [SHIFT] buttons.

A chain set lets you register the order of scenes. This is a convenient way to arrange sounds in the order in which you'll be playing them.

3. Press a tone category button [1]–[16] to select a scene.

The 16 scenes arranged horizontally in the screen correspond to tone category buttons [1]–[16].

- You can also select a scene by directly touching a scene icon in the screen.
- By touching the “◀” or “▶” icon located at the left or right edge of the scene icons, you can select the “previous” or “next” 16 scenes.

Sampler

This unit lets you audio-record (sample) your keyboard or the input sound from an audio device or mic. The recorded sample can be played by pressing a pad.

This instrument features a built-in sampler that supports multisamples, whose sound can be heard via the sound engine.

➔ For details, refer to "Reference Manual" (PDF).

Playing a Sample by Pressing a Pad

Here we explain how you can use pads [1]–[16] to play sounds that you sampled. (Sample Pad function)

In advance, select "SAMPLE PAD" as the pad function as described in "Assigning Convenient Functions to the Pads (PAD MODE)" (p. 24).

1. Press a pad [1]–[16].

A sample plays.

You can press multiple pads to play them simultaneously.

Playing a Sample Continuously (Hold)

1. While you hold down a pad, press the [HOLD] button.

The sample continues playing even after you release the pad. To stop the sample, press the pad once again.

Switching Banks

The samples are assigned to four banks in units of 16 samples. When you switch banks, the samples assigned to each pad will also switch.

1. Press the [BANK] button.

2. Press a pad [1]–[4] to select a bank.

Moving/Copying Samples

You can move or copy a sample to another pad.

Moving a Sample

1. Hold down the pad of the sample that you want to move, and press the [CLIP BOARD] button.

2. Hold down the [CLIP BOARD] button, and press the move-destination pad.

The sample is moved.

* If there is a sample in the move-destination pad, the message "Overwrite OK?" appears. Press the [ENTER] button to overwrite, or press the [EXIT] button to cancel.

If you experience stuck notes!

Press the [HOLD] button four times in rapid succession. This stops all sounds that are being played by the pads.

Copying a Sample

1. Hold down the pad of the sample that you want to copy and the [SHIFT] button; then press the [CLIP BOARD] button.
2. Hold down the [CLIP BOARD] button and press the copy-destination pad.

The sample is copied.

* If there is a sample in the copy-destination pad, the message "Overwrite OK?" appears. Press the [ENTER] button to overwrite, or press the [EXIT] button to cancel.

Assigning convenient functions to the pads (PAD MODE)

By assigning various functions to the 16 pads, you can use them to select scenes or play samples.

In addition to playing samples or selecting scenes, you can assign various convenient functions to the pads.

1. Press the [PAD MODE] button.
2. Press a pad [1]–[16] button to select a function.

A setting screen appears according to the function you select.

MEMO

For details on each function, refer to "Reference Manual" (PDF).

SAMPLING

Function	Explanation
To Pad	Assigns the sampled sound to a pad.
To Keyboard	Assigns the sampled sound to the keyboard.
To Storage	Saves the sampled sound in internal memory.

IMPORT

Function	Explanation
To Pad	Assigns the imported sample to a pad.
To Keyboard	Assigns the imported sample to the keyboard.
To Multisample	Saves the imported sample in internal memory as a multisample.

→ For details on importing, refer to the "Reference Manual" (PDF).

3. Touch the desired function in SAMPLING.

The SAMPLING STANDBY screen appears.

4. Note that the <SAMPLE PAD> button shows the bank and number of the sample pad to which the sound will be sampled.
5. If you want to change the bank and number of the sample pad, touch the <SAMPLE PAD> button.

In the SAMPLING DESTINATION (PAD) screen, specify the sample bank and number that you want to change.

MEMO

If the pad you're sampling already contains a sample, the message "Overwrite OK?" appears. Press the [ENTER] button to overwrite, or press the [EXIT] button to cancel.

6. Touch <Sampling Mode> to select the sampling mode.

Parameter	Explanation
KBD+INPUT	The keyboard performance together with the audio input from the MIC/LINE INPUT jacks and the audio input from the USB COMPUTER port will be sampled.
KBD	The keyboard performance is sampled.
INPUT	The audio input from the MIC/LINE INPUT jacks and the audio input from the USB COMPUTER port will be sampled. * When using INPUT, you must enable AUDIO IN within the settings found in INPUT SETTING.

Sampling

This unit lets you create a sample by sampling the following sounds.

- Keyboard performance
- Input from the MIC/LINE INPUT jacks (audio device, microphone)
- Audio input from the USB COMPUTER port

1. As necessary, connect the device (audio device or mic) that you want to sample to the MIC/LINE INPUT jacks.

MEMO

- If you want to sample an audio device in stereo, connect the left channel to MIC/LINE INPUT L/MONO jack and the right channel to MIC/LINE INPUT R jack.
- Connect a dynamic mic to the MIC jack in the MIC/LINE INPUT section if you want to record samples using a microphone.

2. Press the [SAMPLING] button to make it light.

The SAMPLING MENU appears.

7. Adjust the sampling volume.

Adjust the volume as high as possible without letting the level meter reach full scale.

Device to sample	Explanation
Audio device	Adjust the audio device.
Microphone	Adjust the rear panel LEVEL knobs. 
USB COMPUTER	Adjust the USB Audio Input Level (p. 33).

8. Make settings for sampling.

Touch an on-screen parameter to turn it on/off, or select a parameter and use the [VALUE] dial to edit its value.

Parameter	Value	Explanation
Format	MONO	Samples the sound as a single waveform. Choose this if you're using one mic and sampling in mono. If you're inputting in stereo, the L and R sounds are mixed and sampled.
	STEREO	Samples the sound of L and R as two waveforms. Choose this if you're sampling in stereo from a source such as an audio device.
AUTO TRIGGER LEVEL	0–15	If Auto Trig is "ON," sampling starts when a signal that exceeds this setting is input.
AUTO TRIGGER	OFF, ON	If this is "ON," sampling starts when a signal that exceeds the AUTO TRIGGER LEVEL setting is input. If this is "OFF," sampling starts immediately when you touch <START>.

9. Produce sound on the device that's connected to this unit, and touch <START> at the moment that you want to start sampling.

During sampling, the screen indicates "NOW SAMPLING!"

If AUTO TRIGGER is set "OFF"

Sampling starts when you touch <START>.

Produce sound on the device that's connected to this unit.

If AUTO TRIGGER is set "ON"

Produce sound on the device that's connected to this unit; sampling starts when the input signal exceeds the setting specified by AUTO TRIGGER LEVEL.

10. When you want to stop sampling, touch <STOP>.

Sampling stops, and the sample is saved to the sample destination pad.

MEMO

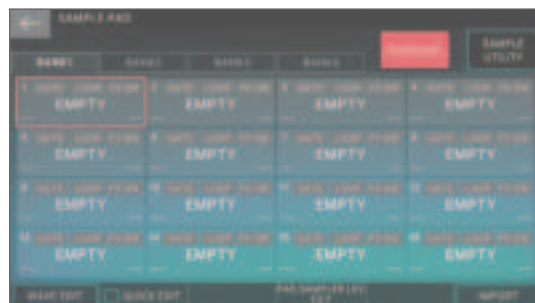

- The sampled data is saved in this unit's sample memory.
- Audio data from your computer can be loaded as samples. For details, refer to "Reference Manual" (PDF).

Deleting a Sample (Delete)

Here's how to delete a sample.

1. Hold down the [SHIFT] button and press the [PAD MODE] button.

The SAMPLE PAD screen appears.

2. Press a pad to select the sample that you want to delete.

3. Touch <SAMPLE UTILITY>.

4. Touch <DELETE>.

A confirmation message appears.

To cancel, touch <CANCEL>.

5. Touch <OK>.

The sample is deleted.

Setting the Input Volume (Input Setting)

Here's how to specify the input volume of the device connected to the MIC/LINE INPUT jacks.

1. In the SAMPLING STANDBY screen (p. 24), touch <INPUT SETTING>.

2. Move the cursor to the desired parameter, and edit the value.

MEMO

For the input volume of the device connected to the USB COMPUTER port, see "Adjusting the USB Audio Input" (p. 33).

Sequencer

How the Sequencer Is Structured

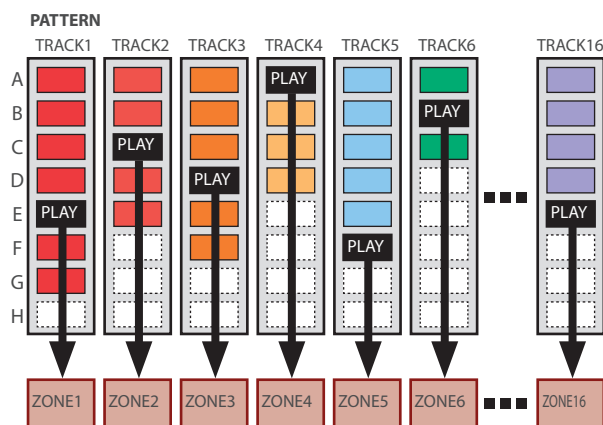

Pattern

This unit's sequencer lets you record and play back using 16 tracks which correspond to the zones.

Each track can have up to eight patterns.

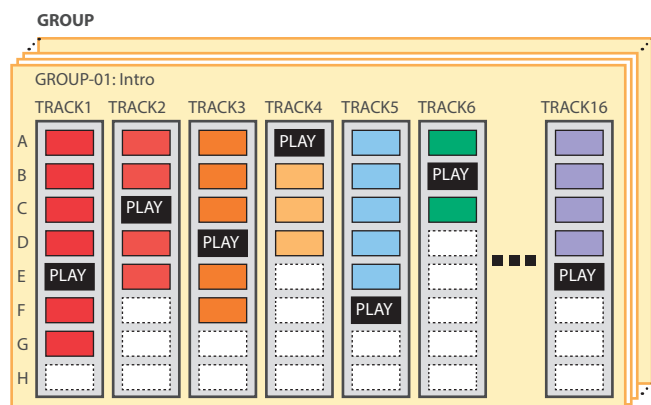

For each track, you can switch the variation during playback.

Each pattern can be up to 32 measures long, and will play as a loop of the length that is specified for each pattern.

Group

The combination of patterns created for each track is called a group. You can create groups such as "Intro," "Verse," or "Fill" corresponding to each section of your song.

Song

The groups you create can be arranged into an order that's called a song. You can specify looping (LOOP) for individual groups and for the entire song.

MEMO

Patterns, groups, and songs are all saved for each scene.

Playing the Sequencer

Playing Pattern

1. Select a scene.
2. Press the [PATTERN] button.

The PATTERN screen appears.

A box in which a phrase is recorded (pattern box) is shown in color.

If you long-touch a track's pattern box that's already recorded, the pattern box is shown highlighted. This means that it's in play-standby mode, and will play when you press the [▶PLAY] button. Only one pattern box for each track can be in play-standby mode.

3. Press the [▶PLAY] button.

Each track's pattern that's in play-standby mode will play.

- If you touch a pattern box that's not playing, the pattern you touch is played.
- By directly touching a colored pattern box in the screen, you can switch patterns for each track.

4. If you press the [■STOP] button, pattern playback stops for all tracks.

- If you touch a pattern box that's playing, only the pattern that you touched stops.
- If you change patterns, or stop/start a pattern while a different pattern is playing back, the pattern automatically stops/starts according to the Change Timing parameter settings.

Playing Group

1. Select a scene.
2. Press the [GROUP] button.
The GROUP screen appears.

- The currently selected group (current group) is indicated by the cursor.
 - At the right of the screen is shown the pattern length for each track in the current group, and you can use knob [E5] to specify the number of measures for the group.
3. Press the [▶PLAY] button.
The current group plays.
 4. Press the [■STOP] button to stop playback.
 5. To select a different group, directly touch the group name to select it.
You can also use the [E2] knob to make a selection.

Playing Song

1. Select a scene.
2. Press the [SONG] button.
The SONG screen appears.

- A succession of boxes called group boxes is shown, each with a number indicating the playback order.
- Within each group box is shown information such as the group number, group name, and the number of times it will loop. Nothing is shown in an empty group box.
3. Press the [▶PLAY] button.
The song plays, and the groups play in the order in which they are placed.
The currently playing group (the current group) is indicated by a green group box.

4. Press the [■STOP] button to stop playback.

Recording a Pattern

There are three ways to record a pattern.

Method of recording	Explanation
Realtime recording (Realtime REC)	Create a pattern by recording your keyboard performance and controller operations just as you perform them.
Step recording (Step Rec)	Create a pattern by successively recording your keyboard performance one step at a time.
TR-REC	This method lets you place notes of each instrument on the steps at which you want them to be heard. This method is suitable for creating drum patterns.

Before you record, it's a good idea to delete the existing pattern as follows.

1. Select a scene.

NOTE

If you create a pattern, and then switch to another scene or turn off the power without saving the scene, the data you created will be lost.

2. Press the [PATTERN] button.
The PATTERN screen appears.
3. Touch <PTN UTILITY>.
The PATTERN UTILITY screen appears.
4. Touch <DELETE>.
The DELETE MENU screen appears.
5. Touch <DELETE ALL>.
A confirmation message appears.
To cancel, touch <CANCEL>.
6. To execute, touch <OK>.
All patterns are deleted.

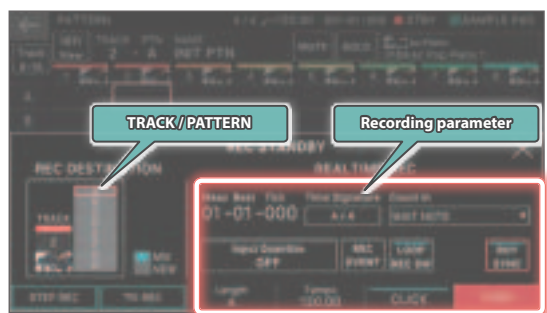

NOTE

Deleted patterns cannot be recovered.

Realtime Recording (Realtime REC)

1. Press the [●REC] button.
The REC STANDBY screen appears.
2. Make settings for recording.

Directly touch parameters in the screen to select them, or use the [VALUE] dial to edit the value.

Recording parameter	Explanation
Count In	Adds a count-in when recording starts. Specify this before you start recording (while stopped).
Time Signature	Specifies the time signature. This can be specified when all patterns are empty.
Input Quantize	Specifies the quantization that is applied during recording.
RHY SYNC	Specifies whether the currently selected rhythm pattern automatically plays back and is recorded when you start recording (ON) or is not recorded (OFF).
LOOP REC SW	ON: Continue recording even after you've recorded the measures specified by the Length setting. OFF: Transition from recording to playback when you've recorded the measures specified by the Length setting.
REC EVENT	Selects the performance data that will be recorded during realtime recording.
CLICK	Turns the click (metronome) on/off.
Tempo	Specifies the tempo.
Length	Specifies the length of the pattern.
NEW/MIX	Specifies whether to make a new recording or to overdub-record.

Since touching <TRACK/PATTERN> will take you to the PATTERN screen, use this screen to select the track (1–16) and pattern (A–H) that will be recorded.

When you change the recording-destination track, the zone played by the track moves in tandem.

(Example) Track 2: Zone 2 (Bass) → Track 10: Zone 10 (Drum)

After selecting a track and pattern in the PATTERN screen, press the [REC] button once again.

If you're creating groups or a song as described in the next section, it's a good idea to divide the recording into several tracks and create several patterns so that you can distinguish them.

Step Recording (Step REC)

1. Press the [●REC] button.

The REC STANDBY screen appears.

2. In <TRACK/PATTERN>, note the track that you'll be recording.

Since touching <TRACK/PATTERN> will take you to the PATTERN screen, use this screen to select the track (1–16) and pattern (A–H) that will be recorded.

When you change the recording-destination track, the zone played by the track moves in tandem.

(Example) Track 2: Zone 2 (Bass) → Track 10: Zone 10 (Drum)

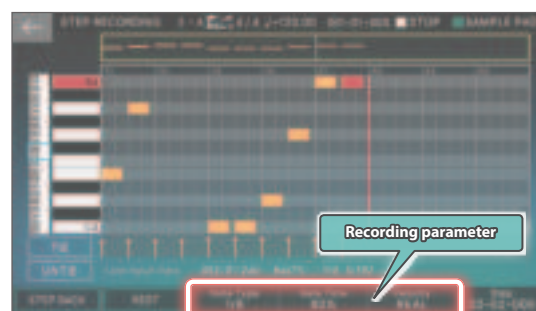

After selecting a track and pattern in the PATTERN screen, press the [REC] button once again.

3. Touch <STEP REC>.

The STEP RECORDING screen appears.

4. Specify the settings of the note that you will input.

Set the various recording parameters in the screen.

Recording parameter	Explanation
Note Type	Selects the rhythmic value of the notes that you input.
Gate Time	Specifies the gate time.
Velocity	Specifies the velocity.

5. Play a key once.

The note is recorded in step 1, and the step position in the screen automatically advances by the length of the step time.

3. Press the [▶PLAY] button to start recording.

You can also start recording by touching <START>.

4. Play the keyboard.

Knob and controller operations are also recorded.

5. Press the [■STOP] button to stop recording.

When you've finished recording, you can repeat steps 1–5 as necessary to record pattern variations on the same track or to record another track.

You can record a chord by playing multiple notes.

6. Repeat step 6 to record each step.

7. Press the [EXIT] button to end recording.

MEMO

- If you want to enter a rest, touch <REST>.
- To delete the data from a step, touch <STEP BACK>.
- To enter a tie, touch <TIE>.
- If you want to cancel the previously-entered tie, touch <UNTIE>.
- If you want to change the measure position at which you're recording, use knob [E6].
- By using the keyboard scroll bar at the left edge of the screen, you can move the displayed range of notes up or down.
- By using the piano roll type scroll bar at the top of the screen, you can move the displayed area through the measures.

Setting the Timing at Which Sounds Play for Each Step (TR-REC)

What is TR-REC?

TR-REC is the method of using the TONE CATEGORY buttons [1]–[16] to specify the timing at which each instrument will sound.

TR-REC is available any time the phrase is playing or stopped. You can use it while listening to a rhythm that you yourself created.

For example to create the drum pattern shown in figure 1, you would make the settings shown in figure 2.

FIGURE 1

FIGURE 2

Step Number	01	02	03	04	05	06	07	08	09	10	11	12	13	14	15	16
Closed Hi-Hat	lit	lit	lit	lit	lit	lit	lit	lit	lit	lit	lit	lit	lit	lit	lit	lit
Snare Drum	lit	lit	lit	lit	lit	lit	lit	lit	lit	lit	lit	lit	lit	lit	lit	lit
Bass Drum	lit	lit	lit	lit	lit	lit	lit	lit	lit	lit	lit	lit	lit	lit	lit	lit

lit Button lit
unlit Button unlit

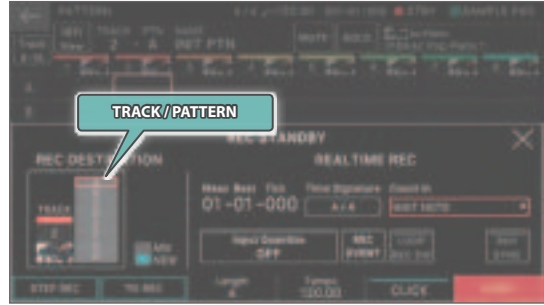

For the Drum part, playing an instrument on the keyboard makes the TONE CATEGORY buttons [1]–[16] light or go dark to indicate the steps on which that instrument will sound.

Pressing one of the TONE CATEGORY buttons [1]–[16] switches it between lit and unlit, changing whether the instrument will or will not sound on that step.

1. Press the [●REC] button.

The REC STANDBY screen appears.

2. In <TRACK/PATTERN>, note the track that you'll be recording.

Since touching <TRACK/PATTERN> will take you to the PATTERN screen, use this screen to select the track (1–16) and pattern (A–H) that will be recorded.

After selecting a track and pattern in the PATTERN screen, press the [REC] button once again.

3. Touch <TR-REC>.

The TR-REC screen appears. The [TR-REC] button is lit, and tone category buttons [1]–[16] change to operating as the TR-REC step buttons.

MEMO

You can also select the TR-REC function by pressing the [TR-REC] button instead of the [●REC] button.

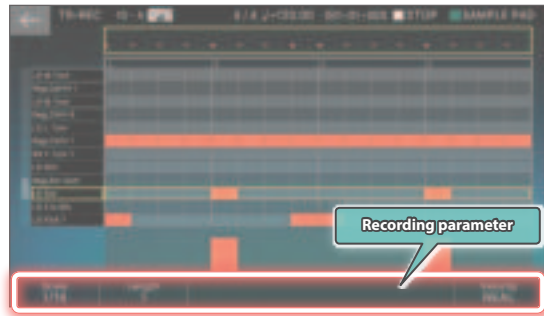

4. Make TR-REC settings.

Set the various recording parameters in the screen.

Tone

Drum Kit

Recording parameter	Explanation
Scale	Specifies the length of one step.
Gate	Specifies the gate time.
Velocity	Specifies the velocity.

5. Use the keyboard to specify the instrument that you want to record (only for a drum kit).

The instrument changes when you press a key of a different pitch.

For tones other than a drum kit, use the keyboard to specify the pitch that you want to input.

6. Press the tone category buttons [1]–[16] to illuminate the steps at which you want a note to play.

Notes are entered at the corresponding step locations in the screen.

To delete a note, press a lit tone category button [1]–[16] to make it go dark.

You can also press the [▶PLAY] button and enter notes while the pattern plays.

7. Press the lit [TR-REC] button to stop recording.

MEMO

- You can't select the TR-REC state during realtime recording or step recording.
- You can hold down the [SHIFT] button and press a tone category button [1]–[4] to change the measure or beat location. (Depending on the scale setting, use the [SHIFT] button + tone category buttons [1]–[8]).
- Scroll the keyboard (instrument) area in the left side of the screen to move the display area up or down.
- Use the piano-roll type scroll bar in the upper part of the screen to move the display area through the measures.

About the Edit Screen

Piano Roll Screen (Piano Roll Edit)

The piano roll screen shows the pitches of sounds in the music, as well as their lengths and timings on a keyboard display that's easy to visually understand.

→ "Reference Manual" (PDF)

Microscope

Use the microscope to edit single points of performance data recorded in a pattern.

→ "Reference Manual" (PDF)

Creating a Group

1. Press the [PATTERN] button.
The PATTERN screen appears.
2. Here's how to select patterns for each track to specify their combination.
3. Touch <GROUPING>.
The GROUP LIST appears.

4. Move the cursor to the number that you want to specify.
5. Touch <SET>.
A confirmation message appears.
To cancel, touch <CANCEL>.
6. To execute, touch <OK>.
The current combination of patterns for each track is registered as a group.
7. As necessary, repeat steps 2–6 to create groups.
You can touch <RENAME> and assign a name to the group that you create.

Creating a Song

1. Press the [GROUP] button.
The GROUP screen appears.
2. Touch <MAKE SONG>.
The MAKE SONG screen appears.

3. In the GROUP LIST located at the left side of the screen, touch <ADD> for the group that you want to play back first.

The group you touch is added to the SONG field at the right, and the input position advances by one.

MEMO

- If you touch <ADD/REPLACE> and use REPLACE to input, the group at the input position is replaced.
- A maximum of 32 groups can be input.
- If you touch <BACK DEL>, the group at the input position is deleted, and the input position returns by one.

4. Repeat step 3 as necessary to create your song.

NOTE

If after creating a group or song, you switch to another scene or turn off the power without saving the scene, the data you created is lost.

Performing Live with a Plug-in Synthesizer

Here's how you can use the FANTOM to play a plug-in synthesizer that's installed on your computer.

Connecting to Your Computer

The USB driver is software that transfers data between your computer software and this unit.

You must install the USB driver in order to use this unit connected to your computer.

MEMO

For details on downloading and installing the USB driver, refer to the Roland website.

<https://www.roland.com/support/>

USB Driver Settings

Here's how to specify the USB driver that's used when connecting to your computer.

1. Press the [MENU] button.
 2. Touch <SYSTEM>.
 3. Touch <GENERAL> tab.
 4. Set the "USB Driver" parameter to "VENDOR."
- | Parameter | Value | Explanation |
|------------|---------|---|
| USB Driver | VENDOR | Choose this if you want to use a USB driver downloaded from the Roland website. |
| | GENERIC | Choose this if you want to use the standard USB driver that was included with your computer.
* Only MIDI is available. |
5. Press the [WRITE] button to save the SYSTEM settings.
 6. Turn this unit's power off, and then on again.

Controlling an External MIDI Device (EXT MIDI OUT)

This unit's knob operations and keyboard performance can be transmitted as MIDI messages from the MIDI OUT connector and from USB MIDI OUT.

By setting a specific zone to "EXT," you can use that zone for controlling an external MIDI device.

1. Make the ZONE SELECT button go dark, and then press the ZONE INT/EXT [1]–[8] buttons corresponding to the zone you want to output via MIDI.

To select zones 9–16, use the [ZONE 9-16] button to switch groups, and then press a ZONE INT/EXT [1]–[8] button.

2. Press the ZONE INT/EXT [1]–[8] button of the selected zone to make it light green.

If it's not green, hold down the [SHIFT] button and press the corresponding ZONE INT/EXT button to make it light green (EXT setting).

If it is lit green (EXT setting), MIDI messages are output.

If the ZONE INT/EXT buttons of multiple zones are lit, these settings in conjunction with the zones specified by the ZONE SELECT button (current zone) determine whether MIDI is output to an external sound module (p. 17).

MEMO

You can also access the expanded settings by setting ZONE INT/EXT Control to "Advanced."

→ "Setting the ZONE INT/EXT Button (Zone Int/Ext Control)" (p. 33)

→ For Details, refer to "Reference Manual" (PDF).

Button status	When the applicable zone is the current zone	When the applicable zone is not the current zone
Unlit (COMMON)	BASIC The internal sound engine and the external sound module both produce sound when you play the keyboard.	Neither the internal sound engine nor the external sound module produce sound when you play the keyboard.
	ADVANCED The internal sound engine and external sound module play only when the ZONE INT/EXT buttons for all zones are off (unlit) and you play the keyboard.	You can use the internal sequencer or MIDI data from an external device to play the internal sound engine.

Button status	When the applicable zone is the current zone	When the applicable zone is not the current zone
Lit red (INT)	BASIC The external sound module produces sound when you play the keyboard.	Only if the ZONE INT/EXT button of another current zone is on (lit red or green), the internal sound engine produces sound when you play the keyboard.
	ADVANCED The internal sound engine produces sound when you play the keyboard.	
Lit green (EXT)	BASIC The external sound module produces sound when you play the keyboard.	Only if the ZONE INT/EXT button of another current zone is on (lit red or green), the external sound module produces sound when you play the keyboard.
	ADVANCED The external sound module produces sound when you play the keyboard.	
Lit yellow (BOTH) ADVANCED only	ADVANCED The internal sound engine and the external sound module both produce sound when you play the keyboard.	
Lit orange (MUTE)	The sound engine is muted. The internal sound engine does not produce sound. If the immediately previous state was lit green, the external sound module produces sound.	

- As desired, press the [PAN/LEVEL] button, the [CTRL] button, or the [ASSIGN] button.
- When you operate control knobs [1]–[8] and sliders [1]–[8], MIDI messages are output according to the buttons you pressed in step 3.

MEMO

- You can make detailed settings in ZONE EDIT (p. 20).
- The settings you make can be saved as scene settings “Saving a Scene” (p. 22).

Using USB Audio

Inputting USB Audio

Use the audio input from a device such as your computer that’s connected to this instrument, and adjust the audio input level to input USB audio.

- Press the [MENU] button.
- Touch <SYSTEM>.
- Touch <USB> tab.
The USB AUDIO menu screen appears.
- Use the cursor to select “USB Audio Input Switch,” and use the [VALUE] dial to turn the setting “ON.”
Audio input from the connected device turns on.

- Use the cursor to select “USB Audio Input Volume,” and use the [VALUE] dial to adjust the input level.

Outputting USB Audio

Use the audio output from this instrument and adjust the audio output level to output USB audio to a computer or other device that’s connected via USB.

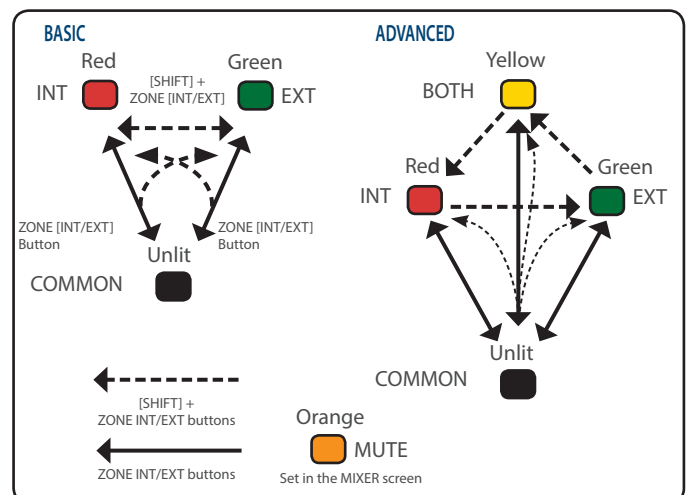

- Press the [MENU] button.
- Touch <SYSTEM>.
- Touch <USB> tab.
The USB AUDIO menu screen appears.
- Use the cursor to select “USB Audio Output Switch,” and use the [VALUE] dial to turn the setting “ON.”
Audio output to the connected device turns on.
- Use the cursor to select “USB Audio Output Volume,” and use the [VALUE] dial to adjust the output level.

Setting the ZONE INT/EXT Button (Zone Int/Ext Control)

Here’s how to set how the ZONE INT/EXT button works.

- Press the [MENU] button.
- Touch <SYSTEM>.
- Select the Zone Int/Ext Control parameter, and edit the setting.

Parameter	Value	Explanation
Zone Int/Ext Control	BASIC	Each ZONE INT/EXT button works as before.
	ADVANCED	The following states are now available for each ZONE INT/EXT button when you push them: unlit, red (INT), green (EXT), orange (MUTE) and yellow (BOTH). For the yellow (BOTH) state, both the internal sound engine and the external sound module play.

Settings

Detailed Function Settings (Menu)

1. **Press the [MENU] button.**
The MENU screen appears.
2. **Touch the desired menu item in the screen.**
3. **Edit the settings of the selected menu.**

MEMO

For details on the contents of each menu item, refer to "Reference Manual" (PDF).

Menu	Explanation
TONE EDIT	Edit a tone (p. 20)
EFFECTS EDIT	Edit the effects (p. 21)
ZONE EDIT	Edit a zone (p. 20)
SCENE EDIT	Make settings for an entire scene (p. 17)
MIXER	Adjust the pan and the volume balance.
SYSTEM	Configure the system settings.
UTILITY	Back up data or initialize this unit (p. 34)

Backing up User Data (Backup/Restore)

Here's how all settings stored in this unit's internal memory can be saved to an USB flash drive (backed up), or written back into internal memory (restored).

Saving Data to USB Flash Drive (BACKUP)

NOTE

If you back up using the same file name as backup data that already exists on the USB flash drive, the existing data will be overwritten. Assign a different name if you want to make a new backup.

1. **Press the [MENU] button.**
The MENU screen appears.
2. **Touch <UTILITY>.**
The UTILITY screen appears.
3. **Touch <BACKUP>.**
4. **If you want to rename the backup file, touch <RENAME> and assign a name (p. 14).**
After editing the name, touch <OK> to close the window.
5. **Touch <OK>.**
A confirmation message appears.
To cancel, touch <CANCEL>.
6. **To execute, touch <OK>.**

NOTE

Never turn off this instrument or pull out the external media while loading or saving data.

Restoring Saved Data from USB Flash Drive (RESTORE)

NOTE

When you execute the restore operation, all settings currently saved in this unit will be lost. If you want to keep the current settings, back them up using a different name.

1. **In the UTILITY screen, touch <RESTORE>.**
 2. **Touch the file that you want to restore, and then touch <RESTORE>.**
A confirmation message appears.
To cancel, touch <CANCEL>.
 3. **To execute, touch <OK>.**
- NOTE**
- Never turn off this instrument or pull out the external media while loading or saving data.
4. **Turn the power off, and then on again (p. 12).**

Returning to the Factory Settings (Factory Reset)

Here's how you can restore this unit's settings to their factory-set condition (factory reset).

NOTE

When you execute the Factory Reset operation, all data in this unit will be lost. If there is any data that you want to keep, back it up to an USB flash drive.

1. **In the MENU screen, touch <UTILITY>.**
2. **Touch <FACTORY RESET>.**
A confirmation message appears.
To cancel, touch <CANCEL>.
3. **To execute, touch <OK>.**

NOTE

Never turn off the power while the factory reset is in progress.

Main Specifications

	FANTOM-06	FANTOM-07	FANTOM-08
Keyboard	61 keys (with velocity)	76 keys (with velocity)	88 keys (PHA-4 Standard Keyboard: with Escapement and Ivory Feel)
Power Supply	AC adaptor		
Current Draw	1,300 mA
