# E-micromobility vehicle information

WARNING! Fires involving lithium-ion batteries can occur rapidly and can be violent, involving toxic smoke and vapours, flames, and molten projectiles.

If your vehicle or battery emits sparks, smoke or flames, evacuate the area and call Triple Zero (000). Close doors if safe to do so.

#### Warning signs include:

- Pungent odours
- Discolouration, blistering, bulging, or swelling of the casing
- Leaking electrolyte
- Heating up and becoming extremely hot to touch
- Abnormal popping, hissing or crackling sounds, smoke, and fumes

Never touch a swollen or ruptured device or battery with bare hands.

Seek urgent medical assistance if anyone has been exposed to spilled electrolyte, flying debris, smoke or vapours, or flames.

Make sure you know what to do if your device or battery is smoking or on fire: fire.nsw.gov.au/batteries/what-to-do

For vehicles where the battery can be separated from the vehicle

Safely separate your vehicle battery for disposal by following these instructions:

• To remove the battery, turn the key anti-clockwise. Then, pull the release lever on top of the battery with one hand and slide the battery towards the front of the bike. Hold on to the battery with both hands carefully in order not to drop the battery. The keys are only needed to remove the battery. You can ride the bike without having the keys inserted into the lock.

WARNING: Disconnect any power source and make sure it is safe before separated the battery

For all vehicles

WARNING: Do not dispose of this vehicle or components of this vehicle in household or kerbside garbage bins. When disposing of this vehicle or components of this vehicle, check the applicable local waste and disposal laws.
