notes

- Kits contain all necessary parts, instructions and associated model change identification labels.
- Display upgrade kits contain the selected display, window cap based on the existing/current housing material and model change identification labels.
- All communications protocol change boards are equipped for external configuration.
- Foundation Fieldbus terminal blocks are electrically different then HART and DE terminal blocks.
- External configuration requires an integral display. Order display upgrade kit separately if required.
- HART and DE Terminal Blocks are electrically identical. Kit contains appropriate TB assy and identification labels.
