DE: Weitere Konfigurationen sind möglich, erfordern jedoch das Veratron Configuration Tool. Dies ermöglicht die Installation von bis zu 15 Tanks oder nichtlinearen Füllkurven.

EN: Further configurations are possible but require the Veratron Configuration Tool. This enables the installation of up to 15 tanks or tanks with non-linear filling curves.

IT: Sono possibili altre configurazioni, ma richiedono lo strumento di configurazione Veratron. Ciò consente di installare fino a 15 serbatoi o serbatoi con curve di riempimento non lineari.

FR: D'autres configurations sont possibles, mais nécessitent l'outil de configuration Veratron. Cela permet d'installer jusqu'à 15 réservoirs ou ceux avec des courbes de remplissage non linéaires.

ES: Son posibles otras configuraciones, pero requieren la herramienta de configuración Veratron. Esto permite instalar hasta 15 depósitos o depósitos con curvas de llenado no lineales.

PT: São possíveis outras configurações, mas requerem a ferramenta de configuração Veratron. Isto permite a instalação de até 15 tanques ou tanques com curvas de enchimento não lineares.
