

The background of the advertisement is a photograph of a modern interior. A wooden shelf is illuminated from below by a warm, orange light. On the shelf, there is a dark, textured vase with several thin, dark stems or reeds. To the right of the vase, a small, dark, curved object, possibly a lamp or a decorative item, is visible. The background wall is a light, neutral color, and the overall lighting is soft and warm, creating a cozy atmosphere.

How Philips Hue works

The possibilities of Philips Hue smart lighting are endless, but the setup — whether with Bluetooth or the Bridge — is simple. Find out how Philips Hue works and how to get started with smart light.

The easy start to smart light

A Bluetooth-controlled system can control lights within Bluetooth range. Set the mood of a single room with any Philips Hue Bluetooth-compatible bulb and the Hue app, which controls up to 10 lights.

Unlock the full experience

Adding a Philips Hue Bridge activates the built-in Zigbee network — a more advanced way to control your lights — and unlocks the full suite of smart lighting

Which option is best for you?

All Philips Hue lights work both with Bluetooth and with the Philips Hue Bridge

Philips Hue with **Bluetooth**

Easy start to smart light

Add up 10 Hue smart lights to your room and control them all with the Philips Hue app while within ca 10 meters of the lights.

Philips Hue Bridge

Unlock the full power of smart lighting

Add a Philips Hue Bridge to your Hue smart lighting system to expand your range of control. It is the heart of your system, managing all your smart LED lights and storing your customised settings – and giving you full control over your smart lights via the Hue app.

Control lights in your entire home and outdoor space

Set up smart accessories

Create smart light routines

Sync light with movies, music and games

Secure your home

Lights turn on automatically as you arrive

Philips Hue Basics

Setup of the system

Hue brings smart lighting to everyday homes, allowing anyone to create special moments and automate with light. Start with Philips Hue your way: Bluetooth or Bridge. And no worries: even if you start with a Bluetooth-controlled system, you can always add a Bridge.

Smart Home Partners:

Voice (Google, Siri, Alexa)

Philips Hue

smart in so many ways

Smart Philips Hue LED bulbs and luminaires

The smart and energy-efficient LED lights bring Philips Hue to life. They deliver bright and beautiful light for your daily activities, special moments, and immersive experiences. They're practical too. They dim. They flash. They pulse. They do pretty much anything you want. And they're available in different shapes, sizes and models to suit your home.

Smart wireless hub: The Bridge

The bridge is the heart of your Philips Hue system that wirelessly connects your smart device to your Philips Hue lights. You can add up to 50 Philips Hue lights and 10 accessories to one bridge.

Linked to your router, it also connects your system to the wider world via the Internet for out-of-home control and other smart features. The Philips Hue bridge is included in all Philips Hue Starter Kits, or you can buy it separately and simply build your own Philips Hue system.

Smart Controls

You can control your Philips Hue system from any device, wherever you are. For the easiest way to set brightness, create timers, change colors (and so much more), choose the Philips Hue app. For even easier control use Hue dimmer switch or Hue tap. Set your favourite scenes and routines and have them always at hand. Battery powered Hue motion sensor will control your lights automatically, set the way you need them and whenever you need them. You don't even have to be at home to control your lights – great for peace of mind.

Smart wireless lighting system

Philips Hue with Bridge is based on ZigBee, a low-power, safe, and reliable technology to control your lights. New features and improvements are continuously added to the system to make it even more useful. Software and firmware updates can be done wirelessly and directly to your lights. The Philips Hue system can be easily integrated with other ZigBee-based systems for additional home automation.

Philips Hue + Matter

The Philips Hue Bridge has been updated to support Matter, meaning that your Hue lights and accessories automatically support Matter too. Matter is based on the principles of simplicity, reliability, interoperability and security and creates a simplified connected experience between Philips Hue and other smart home products. It's a seal of approval that devices built on this protocol will work seamlessly together, both now and well into the future.

Light up your gaming!

Create immersive experiences by syncing your Philips Hue lights with your entertainment content.

Watch, listen or play in new and exciting ways as your favorite video, audio and gaming effects fill the room. Simply link your Philips Hue smart lighting system to movies, music or games and transform your room into an entertainment arena.

Get in the game with smart lights

Experience a new dimension of spatial immersion by bringing in-game environments and effects to the entire room.

See how music comes to life

Sync your Philips Hue lights with the beat of any song whether you want to sit back and relax or get the party started.

Set up your Hue

Step 1

Make sure your Philips Hue lights are powered on and connected to the Bridge 2.0.

Step 2

Set up a new entertainment area in the Philips Hue App.

Step 3

Use the Philips Hue Sync App on your PC/Mac or connect with a supporting smart device to start your experience.

Unlock entertainment with Philips Hue Sync

Philips Hue Sync is a free PC/Mac application for unlocking immersive entertainment with your Hue lights. It creates light scripts on the fly for any content you play on your laptop or desktop, from movies and TV series to music and games.

Sync your Philips Hue lights to your TV screen

Create an immersive media experience via the Philips Hue Play HDMI Sync Box, making your lights dance, flash, dim, and brighten in sync with the on-screen content.

Fast and seamless light experience

Experience no delay as your lights sync to your onscreen content — whether you're watching movies, gaming, or playing music — creating an immersive full-room experience. Watch your favorite content like never before with the sync box.

Immerse yourself in colorful light

The sync box works with all Philips Hue White and color ambiance bulbs or fixtures. Bring your media to life by adding up to 10 Philips Hue color-capable lights to your setup and enjoy surround lighting effects.

Easy to install, set up, and use

A simple setup allows you to easily connect to your Philips Hue Bridge and use your sync box with any TV and HDMI device. Control your entertainment experience and sync box any way you want: with the app, on-product control button, any infrared TV remote, or your voice via Amazon Alexa, Google Assistant and Siri.

Supports high-quality video formats

The Philips Hue Play HDMI Sync Box supports 120Hz with an image resolution of 1080p and 1440p and is compatible with 4K, Dolby Vision, and HDR10+, letting you enjoy the highest quality picture you can get at home — all while your Philips Hue smart lights sync to give you surround lighting.

Unleash your inner rockstar

Turn your bedroom into a concert hall. Crowd surf in your living room. By syncing your smart lights, you can watch your music spill over from your speakers into the room around you in colorful, dynamic light.

Philips Hue + Spotify

Enhance the music experience by using integration between Philips Hue + Spotify. The first of its kind, this deep integration features more precise light scripts — and an even easier way to link your accounts directly in the Philips Hue app.

Hear, see, and feel the music

Music is an emotional experience. Whatever you listen to, you feel. By syncing your lights to a song, you can create your own personal mood music — no matter the genre.

Match light to the beat

We use specially created algorithms to ensure that each light script, which tells your lights how to react to the music, is perfectly tuned to each song — not just the beat but the overall feeling of the music.

Color lights and Hue Bridge required

To see your lights react to music, you need color-capable Philips Hue smart lights and a Hue Bridge.

Philips Hue Secure

Smart home security

Motion and contact sensors, security cameras, and the Security Center in the Hue app work together with your lights, giving you a smart home security system that lets you rest easy with the feeling that someone's always home. Arm and disarm with a tap in the app, get instant motion alerts, trigger light and sound alarms and more.

Monitor your home

Philips Hue Secure is your eyes and ears — both in and around your home. Receive an alert on your mobile device any time your camera or sensor detects motion. Verify your response with live views to saved video clips. You have the tools to choose how you react, no matter where you are.

Trigger alarms

Something seem suspicious? Trigger an alarm that flashes your lights or sound the siren on your Secure camera with a tap in the app. You can even use two-way talk to warn off a potential intruder — or just say hello to a friendly face.

Feel safer with light

Whether you're going out or just going to sleep, arm your Secure system with a tap. Going to be away for a while? Activate the Mimic presence automation to make it look like you're home, even when you're not.

Get it all

The Bridge gives you the full suite of smart features for your Secure setup — light alarms, automations, and more — as well as the ability to expand your home security (or smart lighting!) setup. You can get even more security features, such as smart motion detection zones and access to up to 60 days of video history, with a plan. Choose between Basic or Plus, based on your needs.

Philips Hue White and Color Ambiance

Set up your lights to work with your lifestyle

Take color light to new heights

Set the light in your living space to your favorite color and truly create your own atmosphere. Add just a hint of color as an accent light or set your whole home to vivid jewel tones — all with the touch of a button.

Set the mood of the room

Instantly change the ambiance by adjusting the brightness, color, and temperature of your lights.

Get light for everyday moments

Use the best light for reading, relaxing, concentrating and energizing.

Control lights with your voice

Use your voice assistant to turn your lights on and off, dim them, and more.

Be creative with million colors

Play with light and choose from 16 million colors to instantly change the look and atmosphere of your room. Set the scene effortlessly with one touch of a button. Use a favourite photo and relive that special moment with splashes of light. Save your favourite light settings and recall them whenever you want with the tap of a finger.

Create an atmosphere unlike any other with dynamic scenes that allow the lights in the room or zone to slowly transition through the different colors of your favorite scene.

Sync lights with music and movies

Extend your TV viewing experience to the whole room or sync light to your favorite music and see how light reacts to the rhythm. Download the third party apps and discover the amazing things you can do with Philips Hue.

Light up your gaming

Lift your gaming experience to the next level. Download the third party apps and discover the amazing things you can do with Philips Hue.

Philips Hue Perifo

Minimalist design, maximum potential

Perifo smart track lighting gives you full control over the way you illuminate your space. Sleek, chic and made for any space. Straight lines and sophisticated fixtures make Perifo track lighting a match for any interior design.

Because it isn't your typical track lighting – you can mount it on the ceiling and also on the wall. Once it's installed, you can start with the final touches: angling spotlights, lowering or raising pendant lights and more.

Low
volt

Easy to install and extend

The products are based on low voltage, safe to use and easy to install. No more complexity to get lighting outdoors: go create and extend as you like. Look for Low volt icon next to products.

Transform your outdoor space with light

Philips Hue smart lighting is for your entire home — inside and out. We have two types of outdoor lights: standard line-voltage (wired into your home's electricity) and low-voltage, which simply plug into any outdoor outlet. Called Low volt, this collection of lights allows more flexibility in designing your outdoor lighting. Whatever you choose, Philips Hue lets you transform your outdoors with smart light.

Which option is best for you?

Low volt

24 V

Voltage

Safe extra low voltage (SELV)

Bridge required

Can be placed anywhere

Direct line-voltage connection

Separate power supply unit required

Line voltage

Philips Hue White Ambiance

Set up your lights to work with your lifestyle

Wake up and go to sleep naturally

Philips Hue will help get you out of bed the way you like it, helping you start your day feeling refreshed. The light brightness increases gradually mimicking the effect of sunrise and helps you wake up naturally, instead of being woken up by the loud sound of an alarm clock. Start your day, the right way. In the evening, the relaxing warm white light helps you to unwind, relax and prepare your body for a good night's sleep.

Relax, read, concentrate and energize with light recipes

Light influences our mood and behavior. Philips Hue can help you to customize your daily routines into moments you can enjoy. Skip your morning coffee and get ready for the day with cool, bright white daylight that helps to energize your body and mind. Stay focussed with finely tuned bright white light. Or put your feet up and relax with a soft glow of white light for the perfect end of the day.

Improve the functionality by adding a Hue Bridge
Expand your range of control. Add more lights to even the furthest corners of your home.

Boost your energy

Use light to amp up the energy in your home. With its cool white light, the Energize light scene helps you add a little pep to your morning or an extra punch to your workout.

Sharpen your focus

When you need to get things done, Philips Hue can help you direct your full attention to the task at hand. Set the Concentrate light scene to stay focused and keep your head in the game.

Read with ease

Curl up with a good book under the right light. With the Read light scene, Philips Hue adjusts the light from cool to warm for the perfect shade of white, allowing you to comfortably flip through the pages.

Relax your mind

Finding the time to unwind can prove difficult. When you finally do get a moment to yourself, set Philips Hue to the subtle, soft light of the Relax scene and take your tranquility to the next level.

Philips Hue **White**

Adjust your lights easy and comfortably

Smart control, home and away

With the Philips Hue iOS and Android apps you can control your lights remotely wherever you are. Check if you have forgotten to switch your lights off before you left your home, and switch them on if you are working late.

Set timers for your convenience

Philips Hue can make it seem like you're home when you're not, using the schedule function in the Philips Hue app. Set the lights to come on at a pre-set time, so the lights are on when you arrive home. You can even set rooms to light up at different times. And of course, you can let the lights turn off gradually in the night, so you never have to worry whether you've left any lights on.

Installation free dimming

Experience guaranteed smooth dimming with Philips Hue. No need for wires, an electrician or installation.

Control with your voice

Philips Hue works with Amazon Alexa, Apple HomeKit* and Google Home, powered by the Google Assistant, to allow you to control your lights with your voice. Turn your lights on and off. Dim to the desired brightness for a perfect ambiance.
