

Product Description

* The picture shown is for reference only.

Instruction

1. Plug the nightlight into socket. After about 3 seconds, lighting sensor mode is activated. When ambience lighting is less than $2 \pm 1\text{lx}$, the nightlight will keep illuminating. While, when ambience lighting is more than $13 \pm 3\text{lx}$, the nightlight will automatically turn off. When the nightlight is on, shortly tap the ON/OFF button and the nightlight will turn off. Next time when the ambience lighting changes, lighting sensor mode is reactivated.

NOTE:

* To ensure sensor function, it is recommended to use the nightlight without any interference.

Basic Parameters

Model: YLYD-0025

Rated input: 220-240V~50/60Hz 0.2A

USB output: 5VDC, 3A Ta25°C

LED output: 0.25W

Color Temperature: 2700K

Ingress Protection: IP20

Sensor Type: Light Sensor
