### Small wall light instructions

Install the wall light mount. See **page 4** for dimensions.

Push wires through the grommet.

Connect the WAGOs inside the base.

Tighten the grub screws.

## Small wall light instructions

5

Unscrew the glass cover to add the bulb.

**Note:** the glass cover protects the bulb in wet environments and is required for the IP rating. If the light is installed in a dry setting, you can remove the glass cover to increase the life expectancy of the bulb.

6

**Claremont:** screw the shade onto the body.

**Malvern:** use the shade ring to secure the shade.

**Richmond (hanging):** use the grub screw to adjust the shade height.
