

# Droso Trap®

## Pot trap for Spotted Wing Drosophila (*Drosophila suzukii*, SWD)

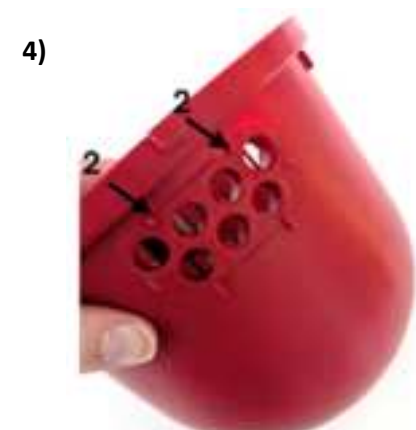

### Assembling instructions.

Droso Trap®'s components:  
1 – Clear lid with hanger,  
2 – Red base,  
3 – Inlet tubes x3

Place the inlet tube on the inside with the four holes at the top.

Firstly, insert the lower part of the inlet tubes, making the two small tabs (1) remain on the outside.

Carefully push the two upper tabs outside (2), applying light pressure.

Place the lid on the base, turning it in one direction. The lid does not screw.

To re-open, turn the lid as shown in the image. Move the base downwards.
