1.Introduction

1.1.Overview

The NFA-T01WB fire button waterproof box is designed for outdoor environments, tunnels, and pipe racks. It can be paired with manual call points to enable fire detection and linkage control. Our products are dust-proof and waterproof, which can be applied in dusty and humid environment, and are certified by national testing organization.

NFA-T01WB Fire Button Waterproof Box

1.2.Feature and Benefits

- Used to make manual call point weatherproof and water resistant.
- Suitable for outdoor use.

1.3. Appearance and dimension

2. Incoming line type for NFA-T01WB fire button waterproof box

Because of different construction types at site, waterproof box can meet the requirements of M20 and M36 waterproof joints. Details as follows:

M36 waterproof joint is standard part, which is applicable to OD 18-25mm cable or conduit. It is recommended that M36×1.5 waterproof joint thread length is 10mm.

M20 waterproof joint is standard part, which is applicable to OD 6-12mm cable or conduit. It is recommended that M36×1.5 waterproof joint thread length is 10mm.

Fig.3 Incoming line type

3. Optional installation principle for fastening screws

Upper cover and bottom case can be structurally clamped. During the course of using, ST2.9*8mm self-tapping screw can be used to lock the bottom in order to avoid unnecessary starting or human-induced protection failure due to upper and lower covers not tightly fastened, as shown in Fig. 4.
