

MICHELIN INFLATION CHARTS FOR RV USAGE

For RV use only, Michelin displays the loads **per axle end** in the load and inflation tables, as we recommend weighing each axle end separately and using the heaviest end weight to determine the axle's cold inflation tire pressure. **For control of your RV, it is critical the tire pressures be the same across an axle, while NEVER exceeding the maximum pressure limit stamped on the wheels.**

To select the proper load and inflation table, locate your tire size in the following pages, then match your tire's sidewall markings to the table with the same sidewall markings. If your tire's sidewall markings do not match any table listed, please contact your Michelin dealer for the applicable load and inflation table.

Industry load and inflation standards are in a constant state of change, and Michelin continually updates its product information to reflect these changes. Printed material may not reflect the latest load and inflation standards.

In the load and inflation tables, SINGLE means an axle with one tire mounted on each end, while Dual means an axle with two tires mounted on each end. In an RV application, the loads indicated represent the total weight of an axle end. When one axle end weighs more than the other, use the heaviest of the two end weights to determine the unique tire pressure for all tires on the axle. The maximum cold pressure for each axle may vary, depending on their weights. These tables are applicable for all RV axles, whether or not they are power-driven.

★ With chip and cut resistant tread compound.

MICHELIN INFLATION CHARTS FOR RV USAGE

In the load and inflation tables, **SINGLE** means an axle with one tire mounted on each end, while **Dual** means an axle with two tires mounted on each end. In an RV application, the loads indicated represent the total weight of an axle end. When one axle end weighs more than the other, use the heaviest of the two end weights to determine the unique tire pressure for all tires on the axle. The maximum cold pressure for each axle may vary, depending on their weights. These tables are applicable for all RV axles, whether or not they are power-driven.

RV FRONT AXLE OVERLOAD

275/70R22.5 LRJ – 7.50" and 8.25" Wheel, Max Speed 75 mph^(1,2)

The 275/70R22.5 MICHELIN® XZE®2+ and MICHELIN® XZA2® ENERGY LRJ truck tires have a maximum single tire load of 6,940 lbs at 130 psi with a maximum speed rating of 75 mph⁽¹⁾. See Load and Inflation table below. Overloading the 275/70R22.5 LRJ tires (or any highway tire) and/or exceeding the speed rating of the tire is dangerous and may lead to tire failure.

7.50" or 8.25" Wheel, Max Speed 75 mph ^(1,2)	PSI										DESIGN MAXIMUM LOAD AND PRESSURE			
											PER AXLE END		PER TIRE

295/60R22.5 LRJ XZA2® ENERGY – 9.00" Wheel, Max Speed 75 mph⁽¹⁾

The recommended alternative fitment is the 295/60R22.5 LRJ MICHELIN® X® LINE™ ENERGY Z, which is designed to be used on a 9.00 x 22.5" wheel and at a maximum speed of 75 mph⁽¹⁾.

(Note that the maximum load and pressure under these conditions match those indicated on the sidewall.)

9.00" Wheel, Max Speed 65 mph ^(1,2)	PSI										DESIGN MAXIMUM LOAD AND PRESSURE	
											PER AXLE END	PER TIRE
	kPa	85	90	95	100	105	110	115	120	125	130	130

295/60R22.5 LRJ XZA2® ENERGY – 9.00" Wheel, Max Speed 75 mph⁽¹⁾

The maximum speed of the 295/60R22.5 LRJ MICHELIN® XZA2® ENERGY LRJ on a 9.00 x 22.5" wheel may be increased to 75 mph⁽¹⁾ by applying the following reduced load and pressure table.

(Note that the maximum load under these conditions is less than that indicated on the sidewall.)

9.00" Wheel, Max Speed 75 mph ^(1,2)	PSI										ADJUSTED MAXIMUM LOAD AND PRESSURE	
											PER AXLE END	PER TIRE
	kPa	90	95	100	105	110	115	120	125		130	130

295/60R22.5 LRJ XZA2® ENERGY – 8.25" Wheel, Max Speed 75 mph⁽¹⁾

In addition to running at 75 mph⁽¹⁾, the 295/60R22.5 LRJ MICHELIN® XZA2® ENERGY LRJ may be mounted on an 8.25 x 22.5" wheel by applying the following further reduced load and pressure table.

(Note that the maximum load and pressure under these conditions are less than that indicated on the sidewall.)

8.25" Wheel, Max Speed 75 mph ^(1,2)	PSI										ADJUSTED MAXIMUM LOAD AND PRESSURE	
											PER AXLE END	PER TIRE
	kPa	70	75	80	85	90	95	100	105	110	115	120

	KG DUAL	3660	3860	4000	4060	4240	4480	4560	4720	4860	5020	5150

The Michelin 295/60R22.5 XZA2® Energy LRJ (MSPN 33215) has been replaced with the 295/60R22.5 X® Line™ Energy Z LRJ (MSPN 35378) which is rated for 75 mph max speed and is only approved for use on 9.00" or 9.75" wheels. The 295/60R22.5 X® Line™ Energy Z LRJ is NOT approved for use on 8.25" wheels.

(1) Exceeding the lawful speed limit is neither recommended nor endorsed.

(2) Matches maximum load and pressure indicated on tire sidewall.

Load and inflation industry standards are in a constant state of change. Michelin continually updates its product information to reflect these changes.

Therefore, printed material may not reflect the current load and inflation information.

Note: The actual load and inflation pressure must not exceed the wheel manufacturer's maximum conditions.

Never exceed a wheel manufacturer's limits without permission of the component manufacturer.

Single configuration = 2 tires per axle. Dual configuration = 4 tires per axle. Loads are indicated per axle end for RV applications.

Always refer to the MICHELIN® Truck Tire Data Book (MWL40731) and MICHELIN® Truck Tire Service Manual (MWL00120) for proper tire selection, inflation, and maintenance. Both manuals can be found at www.michelintruck.com > Reference Materials > Manuals, Bulletins, & Warranties.

MICHELIN INFLATION CHARTS FOR TRUCK TIRES

To select the proper load and inflation table, locate your tire size in the following pages, then match your tire's sidewall markings to the table with the same sidewall markings. If your tire's sidewall markings do not match any table listed, please contact your Michelin dealer for the applicable load and inflation table.

Michelin continually updates its product information to reflect any changes in Industry Standards. Printed material may not reflect the current Load and Inflation information. Please visit www.michelintruck.com for the latest product information.

Note: The actual load and inflation pressure used must not exceed the wheel manufacturer's maximum conditions. Never exceed a wheel manufacturer's limits without permission from the component manufacturer.

S = Single configuration, or 2 tires per axle.

D = Dual configuration, or 4 tires per axle.

Loads are indicated per axle

MICHELIN INFLATION CHARTS FOR TRUCK TIRES

To select the proper load and inflation table, locate your tire size in the following pages, then match your tire's sidewall markings to the table with the same sidewall markings. If your tire's sidewall markings do not match any table listed, please contact your Michelin dealer for the applicable load and inflation table.

Michelin continually updates its product information to reflect any changes in Industry Standards. Printed material may not reflect the current Load and Inflation information. Please visit www.michelintruck.com for the latest product information.

Note: The actual load and inflation pressure used must not exceed the wheel manufacturer's maximum conditions. Never exceed a wheel manufacturer's limits without permission from the component manufacturer.

S = Single configuration, or 2 tires per axle.

D = Dual configuration, or 4 tires per axle.

Loads are indicated per axle

MICHELIN INFLATION CHARTS FOR TRUCK TIRES

To select the proper load and inflation table, locate your tire size in the following pages, then match your tire's sidewall markings to the table with the same sidewall markings. If your tire's sidewall markings do not match any table listed, please contact your Michelin dealer for the applicable load and inflation table.

Michelin continually updates its product information to reflect any changes in Industry Standards. Printed material may not reflect the current Load and Inflation information. Please visit www.michelintruck.com for the latest product information.

Note: The actual load and inflation pressure used must not exceed the wheel manufacturer's maximum conditions. Never exceed a wheel manufacturer's limits without permission from the component manufacturer.

S = Single configuration, or 2 tires per axle.

D = Dual configuration, or 4 tires per axle.

Loads are indicated per axle
