

Phonak Target 8.0

Phonak Target/ALPS User Guide

This guide contains details on using Phonak Target/ALPS available in Phonak Target fitting software. Phonak Target/ALPS allows you to enter data via Phonak Target directly into ALPS. This one step process avoids duplicate entry and allows you to manage all relevant Lyric fitting and subscription information in an easy way.

To use Phonak Target/ALPS, the computer you are using for fitting must have an internet connection.

For every Lyric fitting, Phonak Target will automatically connect you to ALPS. A wizard will guide you through all the necessary steps to complete a successful Lyric fitting. Please note that the Lyric device activation code must be entered the first time Phonak Target is launched.

More information is also be available under Web Help.

Create a new client in Phonak Target

To create a new client in Phonak Target:

1. Click on [Instruments] and select Lyric devices in [Hearing aids]
2. Click on [Lyric configuration] and click on [Select device] to open the Phonak Target/ALPS wizard.

The ALPS button indicates your current connection status:

- Green - connected
- Black – disconnected

To connect into ALPS, enter your user name and password to log into your Lyric account.

In case you have forgotten your password, click on the link [forgot password] and change it in www.phonakpro.com directly.

You will be asked to [Add new client to your ALPS account]. Your account information is shown on this screen, that is very helpful for providers working with multiple logins.

In case you don't intend to login with the last login shown or you want to remove the automatic login checkbox, choose [Switch login] under the ALPS button and login with another username.

You can now see the client's first and last name, date of birth and gender as entered in Phonak Target.

The additional information (date of birth and gender) is optional. You can uncheck [Submit additional information] if you do not wish to transmit this data.

For new clients, you are then asked to confirm that the client understands and gave consent that his/her data will be transferred to Sonova for processing. If the box is not ticked, the fitting cannot continue.

To select the appropriate Lyric device, choose the measured seal size and then match the serial number of the device you intend to use from your stock with the matching serial number in the system.

Please note that expired devices can no longer be fit. To return an expired device, use the [Device Return process] in ALPS, select the serial number and the reason for device return as "expired" and send it back to Phonak.

Payment type Yearly upfront

Start date 11.11.2019

☐ Lyric is used for tinnitus treatment

Continue Cancel

Phonak Target confirms the device selection. You can get [More information] about the subscription in this window or choose [Close]. For binaural fittings, you are asked to [Proceed with other side] which leads you directly to selecting another device from your consignment stock.

Below the start and end date of the subscription and actual days remaining to the trial end date are shown.

It is now possible to extend a trial once for an amount of 10 days. The new end date will then be shown in Target/ALPS.

In case a wrong serial number has been chosen, it can be returned to the stock by clicking “return device to stock”. Once a device has been programmed, the option [return device to stock] is no longer available.

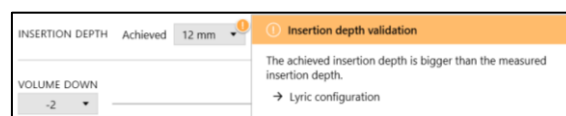

You can now move to programming the Lyric devices on the fitting tab.

You have the possibility to choose between Gain (Real ear and Coupler 0.4cc) and Output display (SPL real ear and coupler 0.4cc) when fitting Lyric. Click on the [Output] menu to select your desired output curve display. When selecting the output curve display, you may also choose to show or hide the hearing level and UCL.

In the event the achieved insertion depth varies from the measured one, both values can be entered in [Fitting]. A warning will be shown if the achieved insertion depth is higher than the measured one.

By clicking [Save to database] at the end of the session, your fitting data will be synchronized with ALPS.

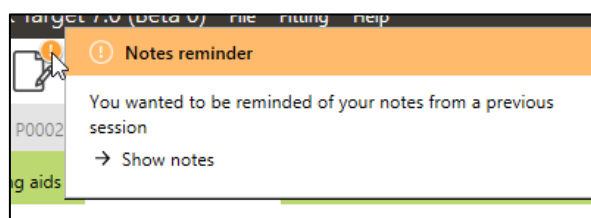

In case you need to have more notes stored about the patient, fill them in on the new notes section.

A new note can be added and Target allows a “remind me again in next session” function.

All note are then visible under [Client, Notes].

The following reports can be printed from the Print menu:

For Professional:

- Fitting Report
- Lyric Datasheet

For Client:

- Hearing Aid Instructions (SoundLync)
- Communication tips
- Diary of observation
- Understanding hearing loss

The curves reports can be printed as follows:

Choose [Setup], [Reports], [Curve type] and choose between Gain or Output. The selected curve type will then be visible on the curve report.

Access an existing client in your ALPS account

If the client exists in ALPS but not in Target (or a first access within a satellite office), you can [Access existing client in your ALPS account].

First, create a new client in Noah and enter the client’s data. This will be transferred into Phonak Target. Proceed until you reach the screen where you are asked to add or access an existing client.

Enter the correct Lyric ID and/or the first and last names as stored in ALPS.

To retrieve the Lyric ID you can open the ALPS portal in a separate browser or obtain it from the printed Lyric ID card. Select search to find P# (Lyric ID).

The Lyric ID has to be entered if you are connecting an existing client for the first time. When opening the session again, you will automatically be connected to the ALPS data.

By selecting the search button the P# will populate, if the P# does not populate, this means the patient is not an existing patient or the name does not match the ALPS information.

Phonak Target will ask you for the status of the ear canal. You can choose between: [OK for immediate refit], [OK for refit after rest] and [Requires medical referral]. When choosing [OK for immediate refit], the device exchange can happen immediately. If the ear canal was irritated and needed rest or a medical referral, the system will inform you accordingly.*

The comments for removal reason and ear canal observation are both optional.

When [Requires medical referral] is chosen, additional details about the state of the ear canal must be chosen.

Additionally, if “other reason” is chosen, a comment to give more explanation is required.

To remove a second device, click on [Proceed with other side]. There are some reasons (scheduled removal, near end of device life and clinical proactive removal) that will automatically populate the second side as a default but it can be changed if the removal reason is different.

*If you have chosen [OK for refit after rest] or [Requires medical referral], Phonak Target will inform you on the main screen.

Enter new session note...

16.06.2014 13:57: ECO Right: OK for refit after rest.
ECO Right: OK for refit after rest.
Ear canal observation after device removal.
Ear canal is a bit irritated.

16.06.2014 13:56: ECO Left: OK for immediate refit.

16.06.2014 13:55: ECO Right: OK for immediate refit.

Please note that if the device has been worn longer than 30 days, the [Easy Refit] is enabled and will show default values:

- Removed by provider
- Removed today
- Removal reason: scheduled removal
- Ear canal observation: "ok for immediate refit"

Click [Remove] and then choose a new device accordingly.
When the criteria doesn't match the default value, please change it and continue.

Tourist case: Device exchange for a tourist client

If you need to exchange a Lyric device for a client who was originally fit by another Authorized Lyric Partner, you need to obtain access to the client's ALPS fitting data. To do so you need the client's individual Lyric ID.

To start the tourist case, proceed as you would with a new client. Log into your ALPS account and select [Access existing client in a different ALPS account] (Tourist case)].

Enter the client's Lyric ID, and check if the name is displayed correctly (as printed on the Lyric ID card). Proceed with the exchange of the device, and adjust the fitting parameters if necessary. If the patient does not know their Lyric ID, it can be obtained by calling Lyric customer service.

The screenshot shows the Lyric ALPS interface. At the top, it says "Client has no Lyric ID assigned in Phonak Target". Below this, the account is identified as "Account 0020035121 LYRIC PORTAL - TARGET TEAM". There are three radio button options: "Add new client to your ALPS account", "Access existing client in your ALPS account", and "Access existing client in a different ALPS account (Tourist case)". The third option is selected. A blue information icon with a text box below it states: "Session data in Phonak Target will be updated from ALPS." At the bottom right, there are "Continue" and "Cancel" buttons.

The screenshot shows the Lyric ALPS interface for entering client information. The title is "Lyric client". There are input fields for "First name" (containing "John"), "Last name" (containing "Doe"), and "Lyric ID" (containing "P00008766"). Below these are fields for "Date of birth" and "Gender", both containing a hyphen. A blue information icon with a text box below it states: "Please contact Lyric customer support if the client's Lyric ID is unknown." At the bottom right, there are "Continue" and "Cancel" buttons.

Tourist case: Your client has been refit by a different Authorized Lyric Partner

If your client has been refit by a different Lyric Provider, you will be alerted that there is a mismatch between ALPS (tourist fitter) and Phonak Target (your fitting). This indicates that the serial number has been changed.

By clicking [Continue] the system will synchronize the newest serial number.

Phonak Target 8.0 | Phonak Target/ALPS

11

Renew a subscription

As soon as a subscription is active (no longer in trial) it can be renewed by clicking on [Renew subscription].

When the subscription is three months from expiration, an orange [Renew subscription] button will appear.

Define which type of subscription length you want to create in ALPS for your client and follow the instruction wizard.

After renewing a cancelled/expired subscription (trial or active), a new trial will only be permitted after 60 days. A subscription renewed within 60 days of the expiration date will automatically be an active subscription.

Cancel of an active subscription

If there is a need to cancel an active subscription, you can do so by clicking [Cancel subscription] on the Lyric configuration screen.

The system will make you aware that you are about to cancel an active subscription. To proceed, choose the corresponding cancellation reason and click Continue. The cancellation request will be sent to Phonak.

Offline fitting and synchronization

There might be occasions where you have a client set up via Phonak Target/ALPS, however, due to various reasons (such as temporarily no internet connection or computer problems) you will have one or more sessions where you have to work offline. This means that the new data you have in Phonak Target is not synchronized with ALPS.

Removing a device in offline mode works the same way as in removing a device in online mode.

You are now asked to select a new device.

Enter the serial number as well as the code that is shown on the Lyric package. Enter the measured insertion depth. If needed, the fitting parameters can be changed.

Once the internet connection problem is resolved and you are able to use Phonak Target/ALPS online again, you will be notified by an orange exclamation point [Fitting not saved to ALPS] message for each patient that was fit offline.

As soon as Phonak Target has started connecting into ALPS again, it will automatically synchronize the offline sessions.

A green check mark will indicate that the synchronization has been successful.

After an offline fitting, logs on your desktop are available.

ALPS home and reports

There are some actions that require a direct link to ALPS:

- Open ALPS
- Client details
- Device details
- Print Lyric ID card
- Reports

Alternatively, ALPS can also be opened via Phonakpro.com.

On the [Home Screen] you have an overview of:

- Inventory Audit
- Trials about to expire within 7 days
- Subscriptions about to expire within 90 days
- Devices to expire within 120 days

The section [Client] does give you an overview over all your clients. By clicking on the first name (marked in blue), you'll get to a level where you see:

- Print Lyric ID
- Subscription of that client
- Renew Subscription(s)
- Remove Devices (needed when cancelling the subscription)
- Client details (such as fitting parameter)

The [Device Return] section allows you to return devices to Phonak that are either

- New (overstock)
- Dead on arrival
- Wrong delivery
- Expired

Choose the devices that need to be returned to Phonak. Click on the respective device and choose a return reason. Click select and then print a return form that can be sent with a device to return (if needed).

Under your name, there are the following sections:

- Home
- My Profile
- My Account
- Logout

[My Profile] allows you to change your language if needed.

In case you would like to get a weekly e-mail about the trials, subscriptions and stock about to expire, you can fill in up to five e-mail addresses. Also, choose how many months before expiration of the subscriptions you'd like to get a notification. For satellite offices, a report with a full overview over all offices can also be requested by ticking the box.

The [Device Analysis Form] can be downloaded.

Enhanced log files for support

If you encounter a problem with Phonak Target, enhanced logging can help our Target software support team to find out the root cause.

Please save the log files on your desktop and/or send them by e-mail to your Lyric contact.

Information and description of symbols and System Requirements

Information and the description of symbols and an overview of system requirements can be found in the Phonak Target User Guide
