- 2 GROUND STAKES INCLUDED TO SECURE HIM INTO THE GROUND
- SOLAR POWERED
- SIMPLE ON/ OFF SWITCH FOR THE LIGHTS POSITIONED ON THE POLE

Battery: 1x Ni-MH AA 600mAh 1.2V

ASSEMBLY INSTRUCTIONS / INSTRUCTIONS FOR USE:

Unpack the components carefully. Please check all parts have been removed from the packaging.

There are metal tubes on each leg to insert ground stakes where required. To easily insert stakes into the ground, it is recommended to wet the ground first. To avoid damaging garden stakes when inserting into the ground, select a spot in soft, rock-free soil. Insert the base of the stake first then gently insert the rest of the stake into the base. DO NOT push directly against the solar cell or the ornament housing containing the actual LED light.

Find an ideal Place for the Solar Light.

Place the solar light in an area where it will receive direct sunlight for at least 8 hours per day. The number of hours the light will illuminate is directly proportional to the hours of sunlight it receives. If the light is placed in a shaded area, it will not be able to fully charge and its illumination time will be limited. Do not place the light near other outdoor lighting like porch or streetlights. These may fool the sensor and keep the light from coming on, or cause it to turn off automatically

*Calls cost 7 pence per minute plus your telephone company's network access charge

The Enterprise Department
Head Office: 11 Bridge Street

CHARGING AND OPERATION:

1. Set button which is located underneath the solar panel to "ON" position for charging and charge by placing it under direct sunlight for at least 8 hours.
2. The light will work automatically. It will charge under direct sunlight during the day time and illuminate at night.

NOTE: In order to verify that the button is correctly in the "ON" position, cover the solar panel with your hand and light should turn "ON" automatically.

MAINTENANCE AND TROUBLESHOOTING:

1. Make sure the switch is set to "ON" position.
2. Keep the solar panel clean.
3. If solar product does not light up after it has been used for around 8 – 12 months, replace the rechargeable batteries as they may be weak or worn out. (Battery 1pc AA 1.2v 600Mah, Ni-MH, Rechargeable— Same equivalent type as recommended must be used).

BATTERY REPLACEMENT:

Step1: The battery compartment is located underneath the solar panel. Remove battery compartment cover by using a small Phillips head screwdriver (not included).

Step2: Remove the exhausted battery and install 1pc new AA rechargeable battery according to the polarity symbol indicated on the battery compartment. Open the compartment carefully and ensure that welding wires inside the battery terminals are not damaged.

Step3: Replace battery compartment cover, screw it back into position and make sure it is properly sealed.

Care and Maintenance Recommendations

1. Clean solar panel with a soft sponge every couple of weeks.
2. Make sure all connectors are still tight and no water getting in.
3. During the winter if you can bring it inside and give a good clean ready for next year.

BATTERIES

- Keep batteries away from children and pets.
- Do not mix used and new batteries.
- Remove the batteries if left for long periods.
- Never dispose of batteries in a fire.
- Battery disposal, spent or expired batteries must be properly disposed of and recycled in compliance with local regulations. For detailed information, contact your local authority.
- Follow the battery manufacturer's safety, usage, and disposal instructions.
