Pipe Lighter Insert

Always use genuine Zippo fuel, flints and wicks.

To fill your Zippo insert or lighter

Lift flint pad to reveal the packing material in the fuel chamber (5). Saturate the packing with Zippo lighter fuel. Stop filling when fuel reaches top of packing. If overfilled it can leak fuel. Allow it a min. to settle.

Place insert into lighter case (1). If overfilled, do not put in pocket or near to skin. If fuel gets on skin, wash the affected area. If irritation persists or worsens, see a Doctor.

Do not store in an unsealed fuel in a closed container. This is flammable fuel.

To re-fill your Zippo insert or lighter

Remove screw (3) and attached spring at end of fuel chamber. Be sure old Flint is removed from tube. Place new Flint in tube and replace spring. screw tightly. Be sure screw is turned as far as it will go. If not, cover will not close properly. Pushen handle after new Flint is inserted, turn wheel backward a few times.

Wick Maintenance

When wick becomes black from carbon, put it up with tweezers until a clean wick appears (approx. 1 cm), then trim the end making it even with the chimney height. Perform this maintenance 1 or 2 times a week. It will be necessary to replace the wick after it has been trimmed more than 2 or 3 times. For more information visit the website zippo.com.
