LEVER COFFEE MODELS

la Pavoni
Dal 1905 macchine per caffè

"The lever machines allow a better exploitation of the coffee powders. In this way we obtain "the cream of coffee" known as the true secret of the Espresso. Discover the step to obtain a perfect Espresso. Lowering the lever with the right intensity, you obtain the pressure to brew an Espresso coffee at about 92° C. This is the perfect temperature to obtain all the best peculiarities from the coffee powders and to reach a substantial and a long-lasting aftertaste." La Pavoni

COMMERCIAL LINE

CAFE SERIES

la Pavoni
Dal 1905 macchine per caffè

SINCE 1905 LA PAVONI HAS PRODUCED THE FINEST COMMERCIAL ESPRESSO MACHINES.

The CAFE`series is a full-size commercial espresso machine available in 2 group configuration. Volumetric control pads operate each group offering 4 serving sizes. Semi-Automatic coffee delivery, machine stops brewing once coffee is delivered. Direct water feed with steam and hot water on demand. Large 10-liter boiler. Made in Italy. Output about 450 drinks per day.

2 GROUP LEVER

**BLACK
BAR-T 2L-B**

**RED
BAR-T 2L-R**

Available in 2 & 3 group versions. T models feature volumetric programmable touch pads. L models feature piston operated lever arms to draw shots of espresso.

Both units have separate solenoids allowing for multiple users to operate the unit simultaneously, boiler auto fill systems and mounted pressure gauges. The solid brass groups are chrome plated for durability. Machines operate on 230 Volt for maximum power. Stainless steel water line installation kits are included.
