# H<sub>2</sub>ULTRA PLUS <sup>2.0</sup>

#### **Product Information**

Rated Voltage: 5VOIA **Battery Volume:** 2200mAh Capacity: 250ml

H<sup>2</sup> Production: 5 min =  $\pm$  3.0ppm

10 min = +/-6.0 ppm

H<sup>2</sup> Purity: +/- 99.9% Size: 61\*55\*210mm

Net Weight: 335g

Accessories: Type C USB charging cable

Website: h2ultra.eu

#### **Prior to First Use**

- 1. Prior to first use rinse the inside of the bottle with warm clean water. Discard the used water.
- 2. Once cleaned fill the bottle with water and initiate a 5 minute program by pressing the On/Off Switch once. When the program is finished, open the top and discard the water.
- 3. The battery comes partially charged. We recommend fully charging the battery using the USB charging cable. A red constant light will indicate charging mode. A Green constant light will show the bottle is fully charged.

# Water Type

- 1. We recommended filtered, purified or distilled water to maintain the integrity of the electrolysis
- 2. It is possible to use tap water. The bottle does have the ability to filter out chlorine but the life of the bottle may be compromised depending on the quality and amount of chemicals in the tap water.

# **Operating Instructions**

- 1. Fill the bottle with water. Screw on the cap using the indicated arrows on both the cap and bottle body.
- 2. Press the On/Off Switch once to start the 5 minute hydrogen production program. The LED display will show time remaining on the program and beep when the program is complete.
- 3. Press the On/Off Switch twice in quick succession to start the 10 minute hydrogen production program. The LED display will show time remaining on the program and beep when the program is complete.
- 4. For best results drink the Hydrogen enriched water within 5 minutes of program completion.

#### Cleaning

- 1. We recommend using the cleaning program once per week.
- 2. Press the On/Off Switch for 3 seconds to start the automatic 3 minute backwash program.
- 3. The bottle may also be cleaning using warm water & white vinegar. Fill the bottle half full with warm water & white vinegar. Shake and let stand for 15 minutes. Rinse before next use. Clean every 2 weeks.

#### Storage

1. Keep in a cool dry place out of direct sunlight. Keep membrane moist and rinse before next use.

## Charging

- 1. Use USB cable to charge bottle.
- 2. A red light will be displayed when charging. A green light will indicate a full charge.
- 3. Do not leave bottle connected to power source after battery is fully charged.

### **Precautions / Warnings**

- 1. Read instructions carefully before use.
- 2. Do not disassemble or attempt to modify the bottle.
- 3. Do not place or store near heat / stove / open flame.
- 4. Do not place in a microwave oven.
- 5. Do not freeze or use frozen water.
- 6. Do not use juices, milk, alcohol, beer, salt water, tea or other liquid in the bottle.
- 7. Suitable air temperature  $0^{\circ}\text{C} 50^{\circ}\text{C}$ . Suitable water temperature  $0^{\circ}\text{C} 50^{\circ}\text{C}$ .
- 8. Do not use chemicals or soap to clean the bottle.
- 9. Do not charge the water more than the maximum 10 minute program. Overcharging the water will result in excess pressure and risk the bottle cracking or splitting.
- 10. Do not attempt to open the bottle during hydrogen production. First turn off the hydrogen program by pressing the On/Off switch.
- 11. Do not immerse the bottle in water or other substance. Do not place in the dishwasher. If you want to clean the outside of the bottle it must be done manually with a damp cloth.
- 12. Immersing the bottle in water or other cleaning substance will damage the built-in battery.

#### Touch Screen Interface

- 1. Tap the screen gently to activate the touch screen options. 2. Tap the icon on the screen to select the desired option.
- 3. Slide the screen from "left to right" or "right to left" to turn the page.
- 4. Tap the "Settings" icon to enter the second-level menu and tap again to

enter the third-level menu.
