

Color Variants

AC200161

Width 52 cm

Air extraction / Air recirculation

Optional accessories

AA200510

Remote control for canopy extractor AC200

AA210110

1 activated charcoal filter with high efficient odour reduction due to increased surface. For air recirculation module AA 211 812.

AA211812

Patented air recirculation module including 1 activated charcoal filter with high efficient odour reduction due to increased surface

AC200161

Integrated rangehood 200 series

Width 52 cm

Air extraction / Air recirculation

Can be integrated invisibly in upper cabinet
Rim extraction with flat and easy-to-clean glass underside
Dimmable, neutral white LED light for ideal illumination of the whole cooktop
Air extraction or air recirculation system
Energy efficiency class A++ at a range of energy efficiency classes from A++ to E.

Output

3 electronically controlled power levels and 1 intensive mode.

Air extraction:

540 / 730 m³/h.

64 / 70 dB (A) re 1 pW.

51 / 57 dB (A) re 20 µPa.

Air recirculation:

530 / 690 m³/h.

72 / 77 dB (A) re 1 pW.

59 / 64 dB (A) re 20 µPa.

Odour reduction air recirculation 92 %.

Features

Stainless steel and glass

Remote control is available as a special accessory.

Interval ventilation, 6 min.

Run-on function, 6 min.

Grease filter saturation indicator.

Metal grease filter, dishwasher-safe.

Glass filter cover.

Neutral white LED light (4000 K), dimmable.

Lamp output 2 x 1 W.

Illuminance 244 lx.

Fan technology with highly efficient, brushless DC motor (BLDC).

Consumption data

Energy consumption 29.6 kwh/year.

Sound level min. 44 dB / max. 64 dB normal mode.

Planning notes

Patented air recirculation module with activated charcoal filter can be installed in the upper cabinet. The activated carbon filter can be changed from the front by simply pulling out the filter drawer.

The door of the upper cabinet must be fully open in order to change the activated charcoal filter.
Can be integrated invisibly in upper cabinet.

Vario cooktops with intensive production of vapours like VR/VP should be placed in the middle beneath the hood (in this case air recirculation is not recommended).

Minimum clearance between gas cooktop(s) with more than 39.6 MJ/h and ventilation hood 70cm. For more details, please refer to gas cooktop(s) installation manual(s).

Clearance above electric appliances min. 50 cm.

When installing a ventilation hood with air extraction mode and a chimney-vented fireplace, the power supply line of the ventilation appliance needs a suitable safety switch.

Connection

Total connected load 172 W.

Connecting cable 1.0 m with plug.
