

M3330 Sewing Machine

SINGER® is the proud sponsor of the popular MAKING THE CUT show, available exclusively on Amazon Prime Video. Now you too can make the cut, with this special edition model that's packed with quality features yet easy to use. The SINGER® M3330 sewing machine is a cut above and perfect for any type of sewing.

For your convenience, your machine will arrive pre-threaded. Accessories included are located in the storage area at the front of your machine.

- **\$75+ included accessories**
- 97 Stitch Applications for any fabric: basic, stretch, decorative
- Simple one-step buttonhole for consistent results every time
- Built-In needle threader quickly threads machine with ease
- Free Arm to sew hard-to-reach areas
- Use SINGER Class 15 Transparent bobbins

Stitch Applications (97)

A Stitch Application simply means a specific sewing technique that you can do with a selected stitch. Basically, Stitch Applications are all the different things you can actually DO with your machine!

Built-In Stitches (23)

Choose from a variety of stitches for basic sewing, decorative sewing, and more

One-Step Buttonhole (+)

Buttonholes are sewn in one easy step. Just place the button in the buttonhole foot and the machine sews a buttonhole perfectly sized for that button, delivering consistent results every time.

Built-In Needle Threader (+)

Effortlessly threads the eye of the needle - eliminates eye strain and saves you time

Front Loading Bobbin (+)

Darning Plate (+)

Place the darning plate into position over the machine's feed teeth, which prevents the feed teeth from coming in contact with the fabric. Use this for free-motion sewing like stipple quilting, monograms and even for sewing on buttons.

Easy Stitch Selection Dial (+)

Built-in stitches are displayed on the Stitch Selector Dial. Simply turn the dial to select the stitch you want to sew.

Adjustable Stitch Length (+)

Customize the appearance of a stitch by increasing or decreasing the distance between stitches. Use this function for various stitch techniques like applique, basting and more.

Adjustable Stitch Width (+)

The size of the stitch from left to right is adjustable, to make the stitch sew narrower or wider as desired.

Reverse (Lever)

Sew stitches in reverse, usually done to secure a seam at the beginning and end to prevent unraveling.

Heavy Duty Metal Frame (+)

The machine's interior frame is metal, providing long lasting durability

LED Lighting (+)

Long lasting LED lighting provides bright illumination and stays cool to the touch

Free Arm (+)

Slide off the Removable Storage Compartment for access to the free arm, making it easy to sew trouser hems, sleeve cuffs and other smaller or tubular projects

Snap-On Presser Feet (+)

Presser feet can be easily removed and attached when needed for various sewing techniques

Extra High Presser Foot Lifter (+)

Presser foot has an extra high position available to accommodate thick fabrics.

Twin-Needle Function (+)

For stitches other than the straight stitch, this function reduces stitch width for sewing with a twin needle so the needles clear the presser foot while sewing.

Bobbin Class (15 Transparent)

SINGER or INSPIRA branded bobbins are recommended for best results
