

SC-100L Battery Activation Procedure

** OUICK START TIP **

- 1. Remove and set aside the 4 small screws on the Operator plate.
- 2. Gently pull the Operator plate 4"- 5" away to reveal the intercom assembly.
- 3. Detach the wiring harness from the battery board.
- 4. Remove the intercom assembly from the aluminum cylinder.
- 5. Find the toggle switch on the battery board with the flat battery attached.
- 6. Flip the toggle on the battery board from "OFF" to "ON" to activate the battery.
- 7. Please do not change any other settings.
- 8. Reassemble carefully—avoid pinching wires. The intercom is now ready to install or use.
- **9.** To charge, plug the power converter into a wall socket, then insert the barrel plug into the barrel jack on the Operator plate. **Charge for 12 hours before first battery use.**
- 10. On Operator plate: GREEN LED = running charger plugged in. RED LED = battery power.
- 11. For assistance, please call 888-853-4643 or 951-854-1800.
