

27950

Please read the following instructions carefully.

Keep this instruction manual for future reference.

Tools required: Phillips head screwdriver, drill (for top of stair installation),
and pencil (not included), wrench (included).

For use with children from 6 - 24 months.

Keep small parts away from children.

Adult assembly required.

Fits openings from 36" - 60" wide.

West End™ Safety Gate

INSTRUCTION MANUAL

⚠ WARNING

- Children have died or been seriously injured when gates are not securely installed. **ALWAYS** install and use gate as directed using all required parts.
- **STOP** using when a child can climb over or dislodge the gate.
- Use only with the locking/latching mechanism securely engaged.
- To prevent falls, never use at top of stairs without wall mounting cups and door stoppers.
- **NEVER** use to keep child away from pool.
- **NEVER** leave child unattended.
- Always close and lock the gate behind you.
- This product will not necessarily prevent all accidents.
- Do not use if any components are missing or damaged.
- Adult assembly required. Exercise care when unpacking and assembling product.

⚠ CAUTION: KEEP SMALL PARTS OUT OF CHILD'S REACH.
IMPORTANT – Read the instructions carefully before use and keep them for future reference.

components:

- A** Gate Door
- B** Gate Frame
- C** Short Extension Frame
- D** Medium Extension Frame
- E** Long Extension Frame
- F** Top Latch
- G** Lower Latch
- H** Lower Door Stopper

- I** Tension Bolts with Tension Nuts (4)
- J** Adhesive Mounting Pads (4)
- K** Wall Cups (4)
- L** Wall Anchors (4)
- M** Screws (4)
- N** Wrench
- O** Upper Door Stopper

hardware:

gate configurations (choose which best fits your scenario):

Measure the width of the opening where you intend to install the gate. Refer to the following illustrations to determine the correct installation configuration. Baseboard molding may change which configuration is appropriate.

WARNING

NEVER install three extension frames on the same side of the gate.

A

(36 in. - 39 in.) without extension

B

(40 in. - 43 in.) with short extension

C

(43 in. - 46 in.) with medium extension

D

(46 in. - 49 in.) with one long extension

E

(46.75 in. - 50 in.) with short and the medium extensions

F

(49.75 in. - 53 in.) with short and the long extensions

G

(52.75 in. - 56 in.) with both short and the long extensions

H

(56.75 in. - 60 in.) with short, medium, and long extensions

Note: This instruction book illustrates installation of gate configuration H. If choosing gate configuration A, skip ahead to step 2. Otherwise, follow step 1 using the appropriate extension frames that best fit your scenario.

Important: Gate includes door stoppers (parts O and H) which prevents the gate from swinging open in one direction. When installing the gate at the top of stairs, be sure that the door stops are engaged on the opposite side of the stairs so the gate door cannot open over the stairs.

installation:

Installation (continued):

Stand the gate in the center of the opening. Make sure the bottom of the gate is completely flush to the floor. Slide tension bolts out until they contact the door frame or wall on both sides.

⚠ IMPORTANT

Check locations A and B. The distance between the gate and the wall should never exceed 2.75".

3

Use the tension nuts to tighten both of the bottom tension bolts.

4

Note: If mounting at top of stairs, proceed to step 6. Otherwise, follow the directions in step 14 to tighten the tension nuts.

Use the tension nuts to tighten both of the top tension bolts.

5

STOP! wall cup/top of stairs installation:

WARNING

For use at top of stairs, wall cup installation is **MANDATORY**.

Follow these wall cup installation instructions when using gate at **TOP OF STAIRS (MANDATORY)**, or if using wall cups for a standard opening (optional). If opting not to use wall cups for a standard opening, skip ahead to step 14.

With a pencil, trace the entire outline of each tension bolt directly onto the wall.

6

Loosen the lower and upper tension nuts and remove gate.

6

7

wall cup/top of stairs installation (continued):

x4

8

1st
Drill a 7/32" pilot hole into each of the 4 center marks.

2nd
Insert wall anchors into pilot holes.

Note: If mounting into plaster or drywall, follow this step and use the wall anchors provided.

x4

7

wall cup/top of stairs installation (continued):

1st
 Remove backing
 from one side of each
 adhesive mounting pad.

2nd
 Attach one pad to
 the back of each
 wall cup.

3rd
 Remove
 backing.

10

Align the wall cups so
 the center hole is placed
 directly over the wall anchor.
 Stick wall cups to the wall.

Note: The bottom wall cups
 should rest on the floor.

Make sure
 all wall cups
 are facing up.

wall cup/top of stairs installation (continued):

Screw
wall cups
into wall.

x4

12

Repeat "installation"
steps on page 5.
The 4 tension bolts
will rest within
each wall cup.

IMPORTANT:

NEVER open gate door over stairs.

13

wall cup/top of stairs installation (continued):

door stopper:

Note: This gate includes door stoppers which prevents the gate from swinging open in one direction when used at the top of the stairs.

Note: Both door stoppers should be turned on the opposite side of the stairs, when the gate is installed.

When mounting this product at the top of the stairs, locate the door stoppers on the top and bottom of the gate, that are on the opposite side of the stairs. Swing the door stoppers to overlap the gate frame, so that the door cannot be opened over the stairs.

testing the installation:

1st
Close the gate.
Make sure the
upper and lower
latches lock
securely.

2nd
Push the gate and
extension frames
to check
stability.

operation:

to unlock gate:

First, slide locking
tab back to release.
Second, lift gate
door open.

hold open feature:

To activate,
open gate door
at least 90° in
either direction.

troubleshooting:

If the gate does not close properly:

1. Gate is not properly aligned in the door frame.

Solution: To adjust the gate's alignment, loosen all four tension bolts and reposition gate so that it matches the "correct" image. Re-tighten tension bolts.

2. Pressure of tension bolts needs to be adjusted.

Solution: Loosen or tighten the upper tension bolts. Ensure the upper latch engages securely when the gate swings closed, and that it can be released properly when the sliding lock tab is pushed back.

maintenance:

- Regularly check tension bolts to make sure the gate is securely in place.
- Do not use the gate if any components are damaged or missing.
- Surface clean with a damp cloth or sponge using mild detergent and warm water.

replacement hardware kit #27950-50
