Pressure monitoring

Always pay attention to your health

By tracking your heart rate around the clock, you can understand your physical condition when you exercise and relax during the day. If your heartbeat becomes irregular or too fast or too slow, you can check your physical condition in time.

♥ Heart rate

*Professionals suggest: Checking heart rate data after exercise can avoid excessive heart rate caused by excessive exercise, which can overload the heart and reduce cardiovascular and cerebrovascular diseases.

Smart Ring

A promise for the future
Engrave eternity
with technology

Stainless steel craftsmanship | Health monitoring |
Gesture control

All-day monitoring of heart rate

Monitor your heart rate anytime, anywhere. Open the APP to view the heart rate data of the ring in real time during the corresponding time period.

Blood oxygen monitoring

The ring is equipped with an optical sensor to enable all-day blood oxygen monitoring, allowing you to better understand your body and make timely adjustments.

Sleep monitoring

Understand your own sleeping status, the proportion of light sleep and deep sleep during the entire sleep period. Good sleeping habits will lead to better health.

Accurately calculate every step

Active hours, exercise duration, and active calories, each data is clear at a glance. Provides intelligent reminders and incentives to help you achieve your daily goals efficiently. Weekly statistics Achievements are clearly visible, and exercise habits are formed with traces to follow.

A variety of ring sizes, small or large, unique craftsmanship

Model	Inner diameter	Perimeter
No.7	17.4mm	54.6mm
No. 8	18.2mm	57.1mm
No. 9	19mm	59.6mm
No. 10	19.9mm	62.4mm
No. 11	20.7mm	64.9mm
No. 12	21.5mm	67.5mm
No. 13	22.3mm	70.0mm

Inner diameter measurement

- Step 1:

Take a long rope or paper and wrap it around your finger
- Step 2:

Make the long rope or paper strip fit your finger precisely, avoiding being too loose or too tight, which may cause size deviation
- Step 3:

Mark the intersection of the long rope or paper strip
- Step 4:

Lay the long rope or paper flat measure the length and record the number of millimeters It is recommended to measure multiple times and take the middle value
