Manufacturer Magcubic offers the L018, an LCD LED projector with HDTV 1920 x 1080 resolution and a contrast of 10000:1. Manufacturer Magcubic states a lifespan of 30000 hours, which would be the equivalent of over 20.5 years at 4 hours a day. A picture width of up to 203 cm is possible because the projector has 400 ANSI lumens. However, if the room is lit, the picture should be no more than 135 cm wide. The model recognises Airplay and Miracast screen mirroring signals, so it is possible to play high-resolution videos with surround sound directly from a smartphone, tablet or PC (Android, Windows and iOS) via Wi-Fi. Whats more, the projector can be flexibly connected to other speakers thanks to the Bluetooth function. Furthermore, it is Full HD 1080P and 4K (compressed) as well as 3D compatible, and thus all currently available Blu-ray formats can be recognised by the projector.
