

3 in1 Fast Wireless Charger User Manual

Notice: To ensure charging 3 devices safely and efficiently, please use 3V/2A adapter and fast charge cable, if including 15W fast charging phones, please use 9V/2A adapter and fast charge cable (if not use the appropriate adapter and fast charge cable, the charger may no charge phone fast, or may not charge 3 devices simultaneously, or may even damage the charger).

This 3-in-1 wireless charger, a compact charging stand, powered from only one outlet, can charge 3 devices simultaneously. For charging your mobile phone and apple watches, just put them on, all this will make your desk clean and tidy, and make your life easier. The charger is a space-saving designed that can help you integrate your mobile phone intelligent life very well, especially for Apple product users. Besides, it is fashion that the light ring is so shining and has breathing effect showing the charging state, if you want to turn off or turn on the light, just touch the touch-sensitive key.

- 1 Watch area
- 2 Wireless charge area for Phone
- 3 Earphone Charging Area
- 4 Touch-sensitive key
- 5 LED Intelligent light ring
- 6 Non-slip mat
- 7 Cool vent
- 8 Type-C port
- 9 Fold spindle
- 10 Non-slip mat

1. Connect the charger to a 9V/2A adapter through a type-c fast charge cable to switch on the power;
2. Put your phone on the charger;
3. Put the Apple watch on and suck it up to charge (roll the watchband to minimize to charge better);
4. Place the earphone box in the wireless charging area to charge.

Including other devices with wireless charging receiver built-in;

(Note: All devices must meet the Qi standard).

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference, and
- (2) This device must accept any interference received, including interference that may cause undesired operation.

These two conditions are modified or not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy that may interfere with other electronic equipment. It has been found that taking certain precautions may help minimize interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause interference to other electronic equipment, the user is encouraged to try the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Plug the equipment into an outlet on a circuit different from that to which the receiver is connected.

Consult the dealer or an experienced radio/TV technician for help.

The following measures are suggested to help minimize interference to other electronic equipment, where a person is shown to be more than 20 centimeters from the device surface at all times, except for non-repetitive patterns with transient time intervals, such as a single key stroke or a mouse click. The user is shown to fully comply with the FCC RF Exposure requirements of FCC 47 CFR 47.403.

This device contains licence-exempt transmitter(s)/receiver(s) that comply with Innovation Science and Economic Development Canada's licence-exempt RSS(s). Operation is subject to the following two conditions:

This device contains licence-exempt transmitter(s)/receiver(s) that comply with Innovation Science and Economic Development Canada's licence-exempt RSS(s). Operation is subject to the following conditions:

- (1) this device may not cause interference and
- (2) this device must accept any interference, including interference that may cause undesired operation of the device.

Radiation Exposure: This equipment complies with Canada radiation exposure limits set forth for an uncontrolled environment. To maintain compliance with IC's RF Exposure guidelines, the user should follow these guidelines: Do not hold the device against your head or your body. This device and its antenna(s) must not be co-located or operation in conjunction with any other antenna or transmitter.

Déclaration de l'ISED Canada:
Cet appareil contient des transmetteur(s)/récepteur(s) sans licence / conformes à l'InnovationRSS exemptés de licence de Sciences et Développement économique Canada.L'opération est sous réserve des deux conditions suivantes:
(1) cet appareil ne peut pas causer d'interférences et
(2) cet dispositif doit accepter toute interférence, y compris peut provoquer le fonctionnement indésirable de l'appareil. Exposition aux rayonneme – mts. Cet équipement est conforme aux radiations du Canada Limites d'exposition pour

un environnement incontrôlé noncé d'exposition RF Pour maintenir le respect des guides d'exposition R Fd'IC, équipement doit être installé et actionné avec une distance minimale de 10cm le radiateur de votre corps. Cet appareil et ses antennes ne doivent pas être colocallisé ou en opération en conjonction avec toute autre antenne ou émetteur.

1. Please keep the charger away from water or other liquid;
2. If you need to clean the charger, please make sure it is not connected power supply;
3. Using environment temperature remains 0—45°C.
4. Please use the adapter included in the package for better charging
5. Please use a mobile phone case with a thickness of less than 4MM.
6. If you use an iPhone 12 Pro Max/13 Pro Max series mobile phone, Please do not use a mobile phone case thicker than 2MM to achieve the best charging effect.

1. If you're experiencing interrupted or slow charging, check the following:
 - (1) The back of your phone should not have any metal pop sockets, or credit cards
 - (2) Put the phone in the center of the charging surface (This lets the charging coil in your phone line up with the one inside the wireless charger).
 - (3) The wireless charging coil on Sony phones is located slightly below center.

(4) Phone cases should be no thicker than 4 mm for effective charging

(5) Check whether the adapter is QC3.0 fast charger.

2.If you're failing to charge your device, please try out the following:

(1) Please connect the phone and test with other USB cables.

(2) Please check whether the indicator turns on or not.

(3) Please check the Adapter is QC3.0 Quick Charger (Output:5V/2A) or not, iPhone original adapter does not match the wireless charger.

(4) Please check your Phone case thickness<=4mm, Metalting or Magnetic Pad will not work with your phone.

3.If you're using the recommended wireless charger with the QC3.0 Adapter and have removed any potential charging obstructions, but are still experiencing issues, try:

(1) Placing the cable connecting your wireless charger

(2) Reconnecting your phone

(3) Unplug the adapter and reinsert.

If your problem hasn't been solved by following the above steps, please reach out to us via Amazon's message center or info@waitlist.com. In order to solve it for you faster, please have the following information at hand: your phone's model, the type of wall charger you are using, and the type of phone case you are using (with a link if possible). Optionally, you may include a video to illustrate the problem you are meeting.
