

About this item:

12 SPEED SETTINGS: Press repeatedly to cycle through 0 to 12 levels of wind speeds. This simple-to-use basic stand fan is a great value for creating a cooling breeze in both small and large household spaces.

WIDE-ANGLE OSCILLATION: The 90 ° wide oscillation feature and the adjustable tilt option, provide large movement from side to side, circulating air throughout the area. This makes the fan great for any indoor space.

SAFETY FIRST: The metal grill covers the fan blades and has a sturdy base providing stability during operation. This will ensure the safety of unattended children and the eldest.

INCREASE YOUR COMFORT: Using this pedestal fan for air circulation in your home can increase comfort and help reduce energy costs.

REMOTE CONTROL: The fan is equipped with a remote controller that supports a 16.4ft distance remote control. You can remotely control the fan from the bed or sofa, to set the wind gears and timing as you like.

Mounting type: free standing
