! TROUBLE SHOOTING

Q1: Why the heating pad can not be turned on?

Answer: The power bank may not be fully charged.
Solution: Please the power bank to check the battery power.

Q2: Why the heating pad stop working after using it for a while?

Answer: For safety, the product has a 30mins automatic shut-down function. **Solution:** It's recommended to insert the heating pad after a while.

Q3: Why the power bank stop working after using it for a while?

Answer: The power bank has run out of battery and need to be charged.
Solution: Please the power bank to check the battery power.

Q2: Why is the heating pad not hot enough?

Answer: The use time is not long enough.
Solution: It's recommended to use it continuously for more than 30mins before judging if the temperature meets the needs.

Answer: External's temperature is different.
Solution: In order to prevent low temperature burns, we have tested the highest temperature.

Answer: The battery of the power bank is low.
Solution: Fully charge the power bank before use.

Answer: The adapter or power bank's output power is lower than 100W.
Solution: Please use the power bank or products, or choose the power adapter or power bank which supported US rated voltage output and an output current greater than or equal to 2Amp.

! SAFETY INSTRUCTIONS & WARNINGS

Do not dry clean

WARNING: Includes a hazardous situation which, if not avoided, could result in death or serious injury.

CAUTION: Includes a hazardous situation which, if not avoided, may result in minor or moderate injury.

NOTICE: Addresses practice not related to personal injury, such as product misuse or property damage.

WARNINGS: To reduce the risk of electric shock, or serious personal injury:

- Non-observance of the following notes may result in personal injury or material damage (electric shock, skin burns, fire). The following safety and non-observance of instructions may result in personal injury and the health of others. It should also protect the product. For the most complete attention to these safety notes and includes these instructions when handling over the product to others.
- This heating pad must not be used by persons (including children) who are unable to read or by vulnerable persons who may not be able to read or overheating.
- This heating pad must not be used by children under 16 years.
- This heating pad is intended for adult use and should not be used by children unless the setting has been set by a parent or responsible adult and the child is closely supervised at all times during use.

This heating pad may not be used by persons (including children) with reduced proprioception, sensory or metallic skills or lack of experience or knowledge, unless they are closely supervised and have been instructed on how to use the heating pad safely and are fully aware of the risks of use. The product may cause injury or death if used incorrectly.

- This heating pad is not designed for use in hospitals.
- This heating pad is suitable for personal use only, not for medical or commercial purposes.
- Do not touch power cord objects into the product.
- Do not use product if you see the product is wet.
- Do not expose the power bank to about sunlight or high temperatures.
- The electrical and magnetic fields emitted by this heating pad may interfere with the function of a pacemaker. However, there is no effect of any wave before the limits for electrical field strength (500V/m max), magnetic field strength (300 μT max), and magnetic field strength (1 mT/m) by IEC61010-1.

USING THE POWER BANK

Charge the Power Bank before initial use and the device will be set used with the instructions for the Power Bank.

1. Insert the provided Charging Cable into the convenient socket of the Power Bank.
2. Connect the other end of the Charging Cable to a USB charger using the USB port USB charger not included with the Power Bank. The Power Bank will start to charge the device. The Power Bank will start to charge the device when charging the charging/heating bank as follows:
 - 1. Fast Charge: 25% - 75%
 - 2. Fast Charge: 75% - 95%
 - 3. Fast Charge: 25% - 75%
 - 4. Fast Charge: 75% - 95%

*Electricity must be charged correctly prior to use. See the instructions from the manufacturer and the specifications in these instructions for use regarding correct charging must be observed at all times.

- Never expose the power bank to solvent heat. This applies in particular to storage in a car. Extreme temperatures can cause the vehicle to be in the glove compartment when the vehicle is parked for a long period of time. Therefore, remove the power bank from the vehicle.
- If you have any question about using the product, contact Customer Service.
- Do not use areas that are wet, slippery, or covered with skin abrasions.
- It is recommended not to use the power function excessively with the device.

WARNING: Do not touch the Power Bank. Only charge the Power Bank in a dry environment at normal room temperature.

Steady on: 100%
 1. The Power Bank is fully charged when the Battery level LED stops flashing and displays steady (about 12 hours for a completely discharged device).
 2. Charge Bank (2 A max/amp) only.
 3. Disconnect the Charging Cable from the Battery level LED. Charge the Power Bank in heat and avoid use for a relatively long capacity.
