Installation height dimension form

Actual Usage Height	Parts
from 47.0 to 54.5 Inches	A+B+C
from 54.0 to 62.0 Inches	A+B+D+C
from 61.5 to 69.0 Inches	A+B*2+C
from 68.5 to 76.5 Inches	A+B*2+D+C
from 76.0 to 84.0 Inches	A+B*3+C
from 83.5 to 91.5 Inches	A+B*3+D+C
from 91.0 to 99.0 Inches	A+B*4+C
from 98.5 to 106.5 Inches	A+B*4+D+C
from 106.0 to 113.5 Inches	A+B*5+C
from 113.0 to 121.0 Inches	A+B*5+D+C

! CAUTION

1. Please place vertically, do not install on sloping floor or ceiling.
2. Please install the shower caddy on solid floor and ceiling.
3. If your bathroom ceiling is suspended, please check whether it's strong enough to bear the shower caddy before installation.
4. Please dry the stainless steel pole and fixing clips before adjusting the height of baskets.

 Made in China

 Top Pole A x1	 Extension Pole D x1		 Shallow Basket G x3	 Deep Basket H x1
 Middle Pole B x5	 Clip E x4  Buckle F x1			
 Bottom Pole C x1				

- 1** Start with the product parts positioned horizontally for an easier assembling process.

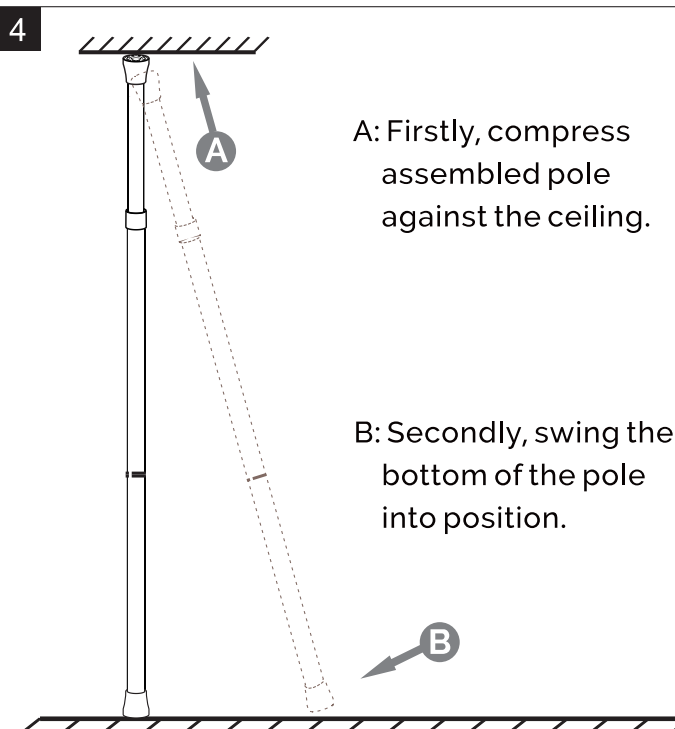

- 2** Twist top pole to make it loose.

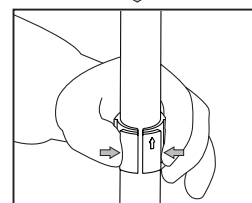

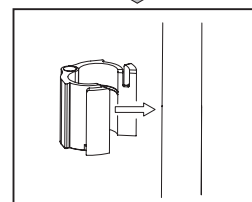

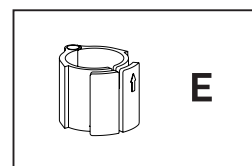

When assembling, allow an additional 2.5cm(1") more than your ceiling height to allow the product to stand firmly when installed at the desired location of use.

- 3** Twist top pole to lock in the length.

- 5** Open the clip and fix it on the pole. Insert the basket into the clip and press from both hands to secure, then push the basket to completely lock into the clip.

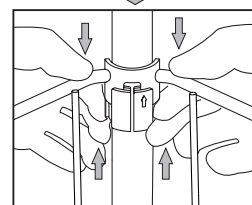

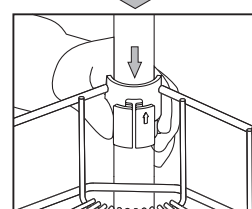

F After installing the shower caddy, if you feel it is still unstable or worried about collapse, you can use the buckle to secure it. For specific buckle instructions, please refer to another instruction manual.

IMPORTANT
The clips **DO NOT** fully close around the pole. Full grip is achieved when the baskets are attached.
A little force is required for the baskets to clip securely in position.

FITTING TIP:

It is easier to fit the baskets before putting the pole into position to access rear of bracket. Firmly push together with both thumbs. The basket will be in place when you hear a click, or the top of the bracket and shelf are fully aligned. Baskets are now securely positioned.

- 6**  Height adjustable from 47-121 inches. By increasing or reducing the use of part B could effectively adjust the height, use part D to enlarge the adjustable range(see the adjustable height range and parts in the dimension form).

TROUBLESHOOTING

Q: Why aren't the clips wide enough for the pole?

A: The clips are purposely short of closing on the poles to ensure a tight fit.

Q: Why aren't the clips tight enough to stop the baskets from moving?

A: It is likely that the baskets are not pushed down enough to lock into the clip.
