

RV Dual Fuel Water Heater Features & Performance

Water heaters designed for maximum performance, ease of installation and maintenance.

120 Volt + LP Gas

Installation In Mind

Designed to fit into industry standard cutout, including 6' power cord, 3/8" gas fitting and 1/2" MNPT water connections.

Durable Design

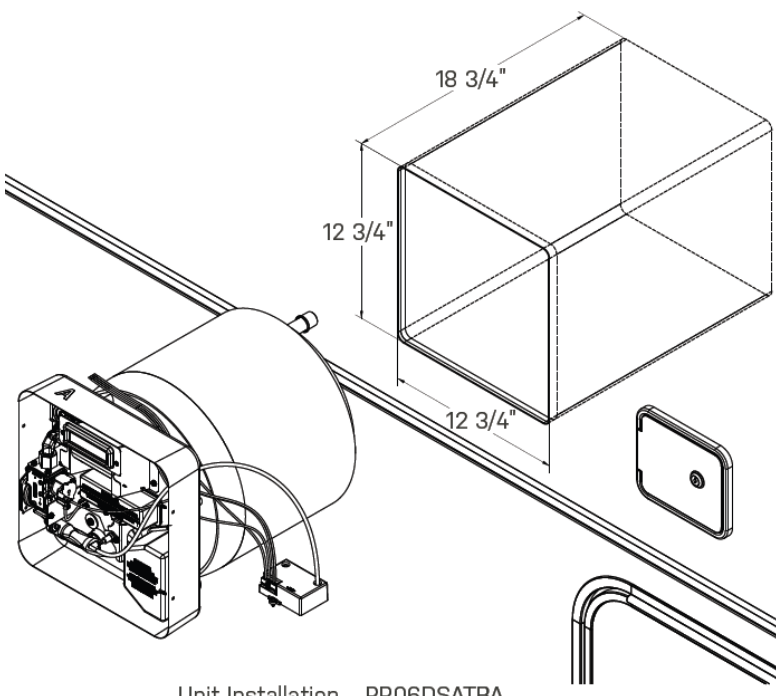

Two integrated hinges and latches offer secure, easy access. Integrated interior gaskets allow secure sealing, reduced door vibration and proper air flow.

Secured Controls

Fully enclosed control board securely located to protect from exterior elements or interior accidents. Complies with ANSI Z21.10.1-2019.

Easy Maintenance

Direct access to anode rod allows for ongoing maintenance to keep your water heater running longer.

Unit Installation – PR06DSATBA
