

EQUINE NECK VENIPUNCTURE & INTRAMUSCULAR INJECTION MODEL

The VSI Equine Neck Venipuncture & Intramuscular Injection Model is an essential tool for veterinary clinical training, offering a highly realistic and life-sized platform for hands-on skill development. Designed with detailed anatomical accuracy, this advanced simulator allows students to practice key procedures—such as blood draws, catheter placement, and intramuscular injections—with precision and confidence.

Product Features:

- Jugular venipuncture with palpable veins
- Durable latex vein tubing that withstands multiple punctures that is replaceable
- Mechanical system allows the veins to be pressurized
- Long lasting, easily removable, washable, replaceable hide covering with mane
- Intramuscular site designed to accept fluid injections and can endure multiple punctures
- Soft silicone head with flexible ears and well rendered anatomy illustrates facial injection sites and accepts a bridle
- Rolling Stand, adjustable for height, rostral tilt, and 90 degree rotation

Equine Neck Venipuncture and Intramuscular Injection
with Stand | 1025599

DAY ONE SKILLS & PRODUCT BENEFITS:

• Venipuncture Training

Practice isolating and palpating the jugular vein for accurate blood draws and catheter placement

• Intramuscular Injections

Refine injection techniques using precise anatomical landmarks

It is recommended to use a smaller needle size (20–22 gauge) for optimal performance and longevity of the model.

Replaceable Parts:

- Equine Intramuscular Pads (Set of 2) | 1025600
- Equine Jugular Veins (Set of 10) | 1025577
- Equine Neck Venipuncture Skin Cover with Mane, Black | 1025570
