Introduction

Your HOLMAN **Retractable Hose Reel** uses a 12mm reinforced hose for added strength and durability, rated to 1000kPa and includes a **MULTI-FUNCTION SPRAY GUN**.

For your information, please read these installation instructions before using your **Retractable Hose Reel**. Please keep all instructions and refer to them when necessary.

⚠ Do not leave the tap on—turn tap off after use and release excess pressure before retracting back into housing

Installation

Your **Retractable Hose Reel** should be installed nearest to your chosen water source for convenience of use.

1. Check the **TAP-TO-REEL HOSE** can reach your tap prior to installing the **WALL BRACKET**

It is very important to use the correct size drill bit, so a very secure fit of the wall bracket is made before installing the **Retractable Hose Reel**.

5. When ready, drill all four holes, then hammer the **WALL PLUGS** gently into your wall (if attaching to a wall)

2. Take the **WALL BRACKET** and place it against either a wall or wooden post
3. Mark inside the centre of each of the bracket holes to prepare for drilling
- ❗ If you are attaching your **Hose Reel** to a wooden post, you will not require the **WALL PLUGS** as the **COACH BOLTS** can screw directly into wood.
4. Use the table below to select the correct drill bit for your **Hose Reel**
- ❗ If using plugs that were not included with your **Hose Reel**, drill slightly undersize as masonry materials all have different properties which will ensure the wall plugs have a secure fit.

		1110H 10m	1120H 20m	1130H 30m
PLUG		Ø7.7mm	Ø11.7mm	Ø11.7mm
MASONRY DRILL		Ø7.5mm	Ø10.0mm	Ø10.0mm
WOOD DRILL		Ø5.0mm	Ø7.0mm	Ø7.0mm
BOLT		Ø6.0mm	Ø8.0mm	Ø8.0mm

Installation (Continued)

6. Place the **WALL BRACKET** in position over the four **WALL PLUGS** and screw each **HEXAGONAL COACH BOLT** into your wall or wooden post

7. Screw in each **HEXAGONAL COACH BOLT** until all four have a secure hold on the bracket against the surface

8. Take your **Retractable Hose Reel**, and remove the securing pin at the base of the **MOUNTING TUBE**

9. Remove the **MOUNTING TUBE** from the **Hose Reel** and slot it over the **WALL BRACKET**. Align the holes in the **HOUSING** with the holes in the **WALL BRACKET**

10. Insert the **MOUNTING TUBE** back into the holes on the **WALL BRACKET** and **HOUSING**. Then replace the securing pin in the base of the **MOUNTING TUBE**

11. Connect your **TAP-TO-REEL HOSE** to your garden tap

Care and Troubleshooting

How far can I pull out the GARDEN HOSE?

You will find an indication sticker 1 metre before the maximum length.

⚠ Do not pull the hose past this point.

How do I properly retract the GARDEN HOSE?

When walking the **GARDEN HOSE** back to the **HOUSING**, turn off the tap, press the lever on the watering gun to release the water pressure in the hose. This makes the retraction of the **GARDEN HOSE** a lot easier and prolongs the life of your *Hose Reel*.

Why is my fully extended GARDEN HOSE not retracting?

If the **GARDEN HOSE** retraction wheel is stuck and the **GARDEN HOSE** is fully extended, the wheel still has movement past this point. Grip the **GARDEN HOSE** close to the guide hole and gently pull.

The retraction wheel will give you enough movement to unlock itself before you slowly allow the auto retraction wheel to wind the **GARDEN HOSE** back into the unit.

WARNINGS

⚠ Do not leave the water turned on with the hose under pressure when not in use.

⚠ Always turn the water off and draw the water from the hose after use.

⚠ Do not attempt to pull hose reel apart.

⚠ Do not pull the GARDEN HOSE to start retraction and let go of the hose. Always guide the GARDEN HOSE back to the housing.
