Transforming Hybrid Cloud Strategies with Azure Arc and Arc Enabled SQL Server

18 March

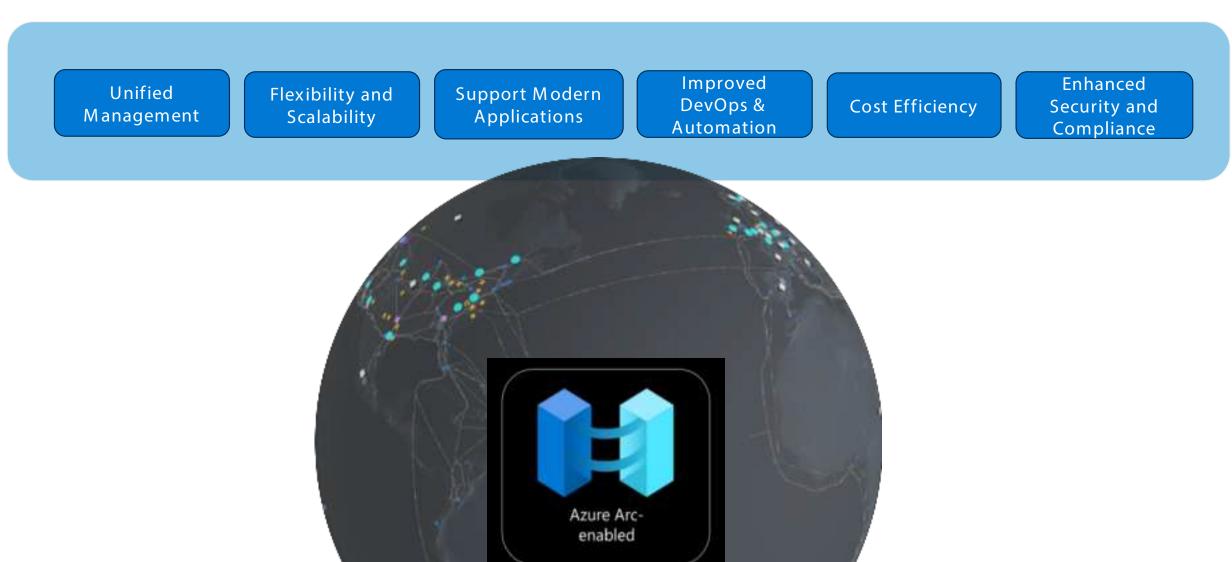

Tatyana Tsvyatkova

Partner Success Manager focused on Azure in CEMA region

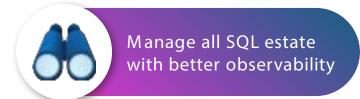

Benefits of Arc

Azure Arc is a bridge that extends the Azure platform to manage and secure resources across on-premises, multi-cloud, and edge environments. It provides a unified management experience, enabling consistent operations and governance

Bring cloud manageability to SQL Server anywhere

Manage, govern, and protect your SQL Server from Azure

Single view of all SQL Servers deployed on-premises, in Azure and other clouds

Capture key performance metrics with out-of-box monitoring

Gain proactive and actionable insights with automated best practices assessment

Utilize migration assessment and bestfit recommendation on SQL laaS/PaaS

Manage Availability Groups inventory and track real-time health status

View Always-on Failover Cluster Instances and protect with Defender

Enhance operational efficiency through configurable Automated backups

Minimize downtime and operational disruption with Point-in-time restore

Protect your on-premises and multicloud data using Microsoft Defender for Cloud

Enhance security using Extended Security Updates as a service and auto patching

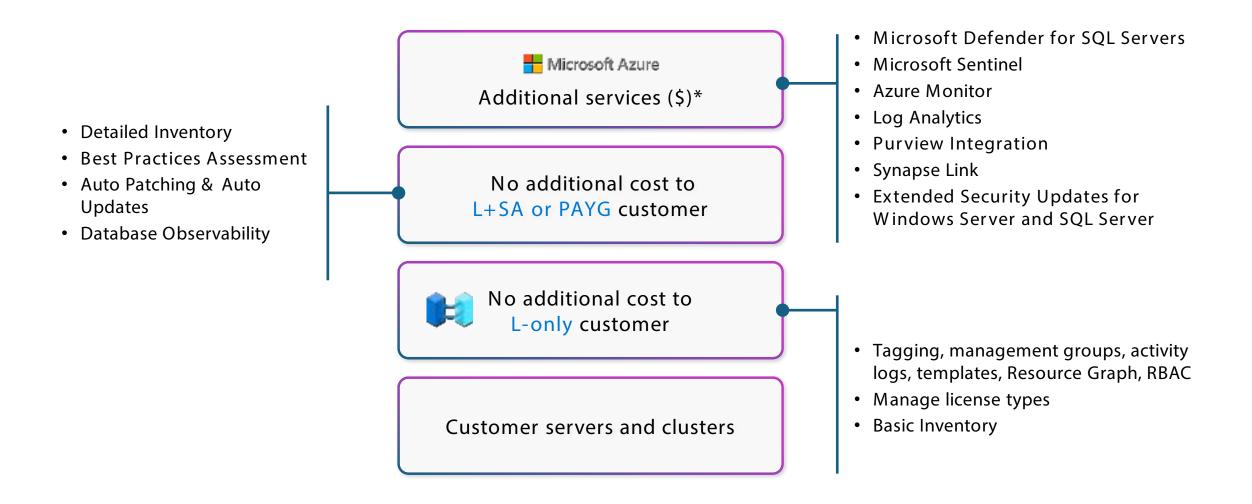

Central insights and governance across all SQL Servers with Microsoft Purview

Unified sign-on experience with Microsoft Entra ID authentication

Azure Pay-As-You-Go enabled by Azure Arc for SQL Server anywhere, with simplified onboarding

Azure Services available for Arc enabled SQL Servers

^{*} Compute, log ingestion, and storage costs are not included

How-to / Steps

	Arc-enabled PAYG licenses	Arc-enabled Paid instances		
1	Creation of the custome	r Azure CSP Subscription		
2	Deployment of the Arc-Agent / -Extens	sions and connection to the Azure Sub.		
3	Set the licensing to PAYG	Set the licensing to PAID		
4	Stop previous licensing (e.g. SPLA)	Continue current licensing		
5	Start seeing new ACR	in monthly reporting		
6	Start earning (ACR-based) incentives and contribution			

+connect to Azure Lighthouse...

How-to / Steps - SQL Arc PayG vs Paid

Arc-enabled **PAYG** SQL licenses

Arc-enabled Paid SQL instances

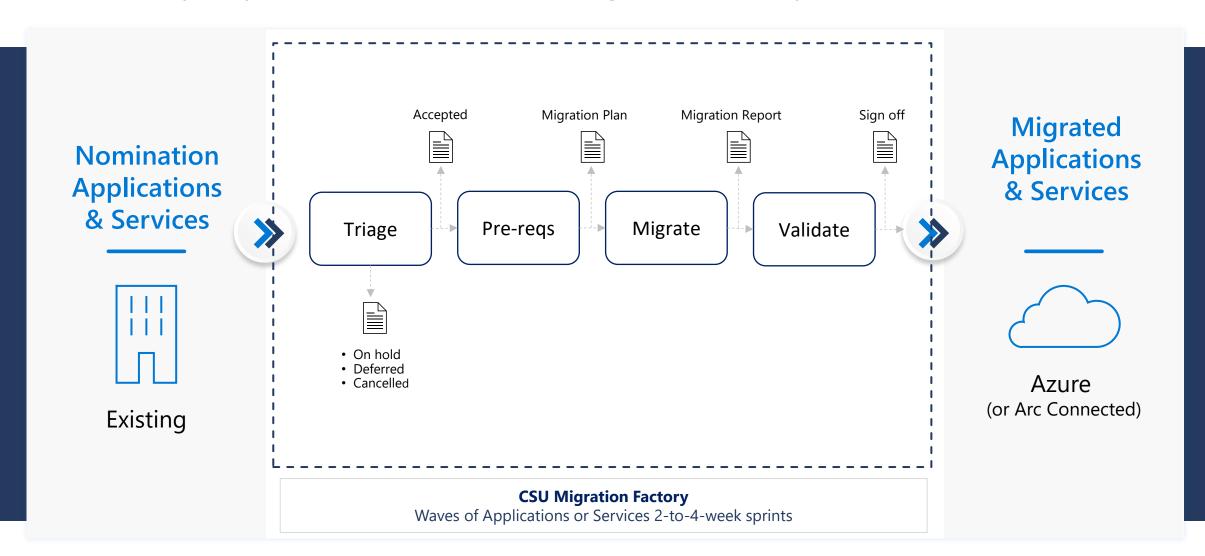

Deployment options

CMF | High level execution flow

Jumpstart Azure journey for Microsoft Cloud Workloads through Microsoft delivery at no cost

CMF | Azure Arc for Windows & SQL Server scope

In Scope

Arc-enabled servers

Customers can onboard their existing Windows Server 2012 and above (physical servers or virtual machines) as Azure Arc-enabled servers, from:

- On-premises (Hyper-V or VMWare environments)
- Other cloud environments (AWS, GCP)
- Windows Server Management through Azure Arc

Arc-enabled SQL Servers (two-step process)

- The first step will onboard the server where the SQL Server is installed
- The second step will onboard the installed SQL Server 2012 and above instances as Azure Arc-enabled SQL Servers
- Windows and Linux <u>supported versions</u> are in scope

Extended Security Updates (ESUs) through Azure Arc

- Windows Server 2012/R2
- SQL Server 2012/2014 Strong partnership needed with nominators to determine the optimum number of needed ESU licenses.

Note: Enrollment to ESUs can be done at any moment up to three years after the End of Support (EOS) dates. When enrolled, the servers will receive ESUs, and the customer will be billed a one-time upfront charge for the months they missed after the end of support date.

- Windows Server 2012/R2 EOS: Oct 10, 2023.
- SQL Server 2012 EOS: July 12, 2022.
- SQL Server 2014 EOS: July 9, 2024.

Out of CMF Scope

Any Application/Services related configurations and testing (Pre and Post Migration)

Configuring Backups, Monitoring & Alerts (Pre & Post Migration) etc.

High availability setup, configuration

Disaster Recovery setup, configuration

Any other migration path not listed in the Scope

How-to / Steps

Privacy Resource collected will be provided in accordance with Historia's privacy anklo (chapters) according to the Collection of the Coll	
* Assures	
Choose the primary reason for this nomination.	
(im a Solution Partner working on a Proposal for my customer and want to work on a SDW with the CNM team	
m a Solution Partner morking on a migration mostly to begin using Partner = Factory model	
(in a Channel Patter storking or a SME opportunity	
The art ISV Partner working with an ISV migration opportunity	
2. Do you have an Indirect Provider (Distributor) for this project? *	
● 164	
O No.	

ALSO and AMM

ALSO Professional Services Migrate to Azure with confidence

ALSO PROFESSIONAL SERVICES

Align strategy:

- What will be migrated?
- How do we expect new customers, new services to be onboarded?

Assessment:

Can we migrate everything we want to?

Develop architecture:

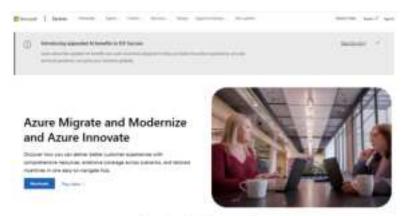

- How will customers connect?
- How applications and services will be interconnected?
- How will users authenticate?

Plan migration:

- Migraion waves and windows
- Accepatnce test planning
- Rollback planning

Execution:

- Destination preparation
- Migration execution
- Acceptance testing

The value for Azure partners

Increase agility with Azure offerings

Introducing...

SMB paths for Solutions Partner designations

Data & Al (Azure)
Digital & App Innovation (Azure)
Infrastructure (Azure)

Microsoft Al Cloud Partner Program
Solutions Partner for Azure solution areas

How to attain a Solutions Partner designation for solution areas

The partner capability score provides flexibility to demonstrate knowledge, skills, and experience across subcategories of performance, skilling, and customer success. **Partners qualify either on an SMB path** or an Enterprise path and must reach 70 points for the path they are on.

A minimum of 70 points must be earned, with points in each subcategory.

There are 100 points possible in total across categories.

Performance

This category is measured by net customer adds.

Skilling

This category verifies and demonstrates your dedication to skilling and training by intermediate and advanced certifications.

Customer success

This category is measured by usage growth and the number of solution deployments.

Requirements for Solutions Partner designations for Azure

Three categories make up the scoring for Solutions Partner designations: performance, skilling, and customer success. Points are earned through net customer adds, certifications and exams, growth in usage and the number of successful deployed customer solutions. Points are earned incrementally as partners make progress in each subcategory.

Beginning later in 2024, partners will qualify either on the Enterprise or SMB path and will see in Partner Center only one score aligned to their path. For all three Azure designations, partners who are driving less than USD1,000,000 Azure consumed revenue (ACR) and have 80% or more of their customers in the SMB/SMC segment will qualify on the SMB path. Partners who are driving more than USD1,000,000 ACR, or driving less than USD1,000,000 ACR and have more than 20% of their customers in the enterprise segment will qualify on the Enterprise path.

		Maximum contribution				
		Enterprise paths		SMB paths		
	Eligible attributions	Infrastructure / Digital & App Innovation	Data & Al	Infrastructure / Digital & App Innovation	Data & Al	Max points
Performance						30
Net Customer Adds	PAL, DPOR, CSP	3 net customer adds >\$1000 ACR per month	3 net customer adds >\$1000 ACR per month	3 customer adds >\$500 ACR per month	3 customer adds > \$500 ACR per month	30
Skilling						40
Intermediate Certifications	Certified professional associated to Partner Center account	5 unique individuals 2 prerequisite certifications*	10 unique individuals 2 prerequisite certifications*	4 unique individuals 1 prerequisite certifications**	8 unique individuals 2 prerequisite certifications**	20 (40 for Data & Al)
Advanced Certifications		5 unique individuals 2 prerequisite certifications*	NA	4 unique individuals 1 prerequisite certifications**	NA	20 (0 for Data & Al)
Customer Success						30
Usage Growth	PAL, DPOR, CSP	20% ACR growth YoY	20% ACR growth YoY	20% ACR growth YoY	20% ACR growth YoY	20
Deployments	PAL, DPOR, CSP	5 new deployments in TTM	5 new deployments in TTM	5 new deployments in TTM	5 new deployments in TTM	10
TOTAL						100
Minimum total points	required for Solutions Partn	er designation				70

^{*}On the Enterprise path, partners must have prerequisite certifications before points are earned for scoring certifications. No points are earned for prerequisite certifications.

^{**} On the SMB path, partners earn points for the two prerequisite certifications. Prerequisites must still be met in order to earn points for scoring certifications.

Benefits for Solutions Partner designations for Azure

Regardless of the path by which you qualify for a Solutions Partner designation, benefits are the same. Benefits include all common Solutions Partner benefits, like go-to-market services, TP&D advisory hours, technical support incidents, as well as unique product benefits designed specifically for each Azure specific Solutions Partner designation. Stack incremental benefits as you attain additional Solutions Partner designations.

Product Group		Digital & App Innovation Data & AI		Infrastructure		
	Azure Production Credits	\$6,000 per year (bulk)	\$6,000 per year (bulk)	\$6,000 per year (bulk)		
Incremental	Azure Dev/Test Credits	Bulk offer delayed – in interim, dev/test credits are provided with Visual Studio Enterprise	Bulk offer delayed – in interim, dev/test credits are provided with Visual Studio Enterprise	Bulk offer delayed – in interim, dev/test credits are provided with Visual Studio Enterprise		
	Visual Studio Subscriptions	25 Visual Studio Enterprise subscriptions	25 Visual Studio Enterprise subscriptions	25 Visual Studio Enterprise subscriptions		
Infrastructure, nnovation	Dynamics 365 (D365)	D365 Operations Application Partner Sandbox, D365 Sales, Field Service and Customer Service Partner				
Infrastruct Innovation	Power BI	100 Power BI Premium users 100 M365 E3 users				
ns Partner for l igital & App Ir	Microsoft 365 (M365)
