## How to change wireless SSID and Password of DWR-930M through GUI and D-Link Mobile Connect App

1   Connect your DWR-930M using a USB cable or Wi-Fi with a smartphone, laptop, or computer. The default Wi-Fi network name (SSID) is D-LINK2G-XXXX, with the password printed under the battery on the back of device.

2   Once connected, open a web browser and type in the address bar http://192.168.0.1

3   You will be prompted to enter the username and password to access the router's settings. The default username is **admin** and the password is **admin**

Note: If you have changed the password and cannot remember it, you will need to reset the router to factory defaults.

4   Upon logging in, you'll access the web-based management interface of the DWR-930M. To modify your wireless network's name and password, navigate to the **Wireless** tab. Under the **Wireless Security Settings** options, you can adjust the wireless settings for SSID and Password, and then click **Apply** to confirm the changes.
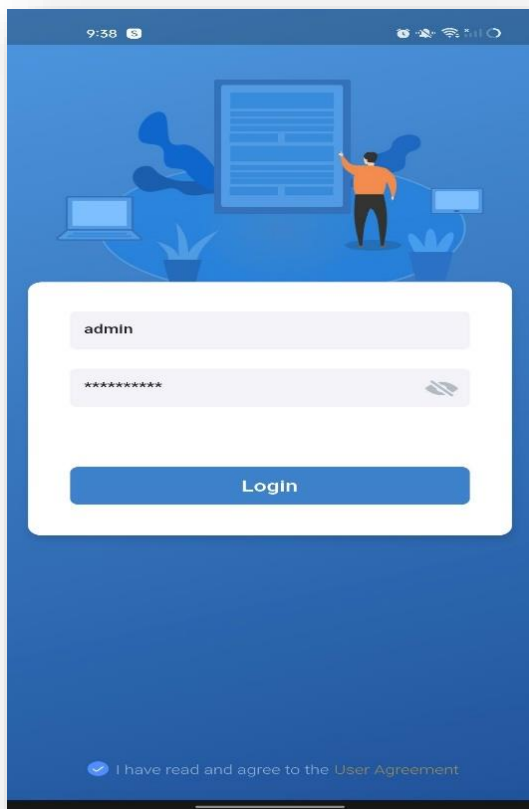

D-Link Mobile Connect App

1 Launch the "**D-Link Mobile Connect app**" If you haven't installed it yet, you can download it from either the Play Store or the Apple Store.

2 You will be prompted to enter the username and password to access the router's settings. The default username is **admin** and the password is **admin**
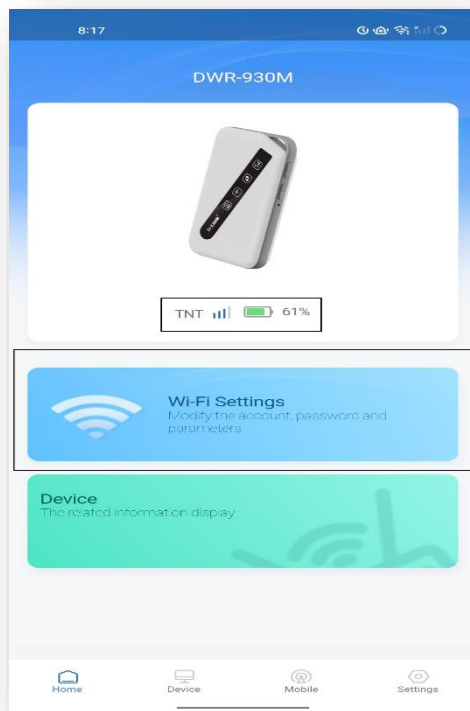

Note: Please check the box below indicating "I have read and agree to the User Agreement." And Press Login.

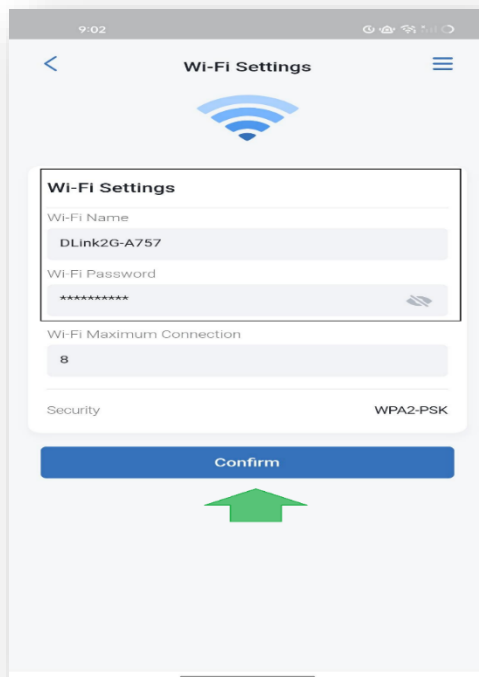

Note: If you have changed the password and cannot remember it, you will need to perform a hard reset on the device.

3   Tap **Wi-Fi Settings** from the home screen.

4   In the 2.4G Wi-Fi Settings, you have the option to change both the network name and password for your Wi-Fi.

5   After making the changes, press **Confirm** to save and apply.

6   Once you've configured the Wi-Fi settings, wait for the changes to take effect. The router may need a moment to update its settings.

7   Once you've configured the Wi-Fi settings, wait for the changes to take effect. The router may need a moment to update its settings.

8   After the settings are applied, you can connect your devices to the newly configured Wi-Fi networks using the updated SSID and password.
