

Step 2: Add device (Using model Q2 as an example)

1. As shown in (Picture 1): When the device is plugged into the power supply, the blue indicator light begins to flash slowly. Then, press and hold the Reset key to reset the device, and following this, the blue indicator light will start flashing rapidly.
2. As shown in (Picture 2): Turn on Bluetooth, then open the "V720" app. Wait for the pop-up window to appear when a new device is found, and click to bind the device. (If no new device pop-up window appears, please click the "+" icon in the upper right corner of the home page to add a device.)

AP Mode

1. Repeat the steps from the first step to add a device.
2. As shown in (Picture 5): Turn on the Wi-Fi on your mobile phone and connect to the Wi-Fi hotspot starting with "Nax_".
3. As shown in Picture 6: Return to the 'V720' app and refresh the drop-down list. When the device appears that means the short-range mode connection is successful.

Matters needing attention

1. This product can work within a temperature range of -10°C to 50°C (14°F to 122°F). Please avoid using this product in environments with extreme temperatures, either too high or too low.
2. This product is a precision electronic product. Please do not use this product in environments that are excessively wet or where water may enter the product.
3. To better use this product, please avoid placing it near glass and other interfering objects, as this can cause the picture to be overly bright and may also affect the night vision.
4. Please ensure that this product is installed within the range of Wi-Fi signal coverage, and placed as far as possible from the microwave oven or other appliances that may affect the signal.

FCC Caution:

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.
