Pole Tubing

In our continued desire to strive for excellence, by listening to our customers needs and by working closely with our suppliers we have developed a range of tube and hose products (some of which are unique to us) which deliver high performance whilst being technically superior to competitor products and market specific.

By specifying STREAMLINE® hose you are receiving a product with the following features:

- Abrasion resistance – excellent
- Anti-ageing – outstanding
- Resistant to pure water
- Flexibility – good to excellent
- FDA and ROHS compliant, low toxic and free from hazardous substances
- Silicone and cadmium free
- Service temperatures from –15˚C to +60˚C

By insisting on only the highest quality hoses, free of heavy metals and other hazardous substances, you can be confident of success in delivering a 'crystal clear' finish to your windows.

🔴 Hot Water Hose	🔵 Cold Water Hose

Pole Tubing PVCT8-5 Clear Tubing

- Outstanding resistance to ageing and with good flexibility, this is the most popular pole tubing choice.
- Inside diameter 5mm
- Operating Temperature –15°C to +60°C
- Available in a multitude of lengths to suit standard pole sizes.

PART NO
SFC16-240

Digital Variable Controller V16

This V16 controller helps reduce both the energy and the water consumption of your system by allowing you to choose the correct flow of your water, this protects the usage of the system, as well as offering faster and more accurate dead-end detection. Being kitted with new advanced technology, the V16 controller now runs smoother, quieter and has expanded its lifetime. One of the key features of the V16 controller is that it will not be damaged if it is wired incorrectly, it simply will not work. However, once it is wired correctly, the unit will recover and will work normally. This benefit will only work on the V16 controller.

Features

- Offers faster and more accurate dead-end detection.
- Pressure switch shutdown
- Over Current Detection
- Short-Circuit Detection
- Designed to save power and water.
- The pump runs smoother and quieter.
- The pump can be driven slower, faster, and harder than before.

PART NO	
SFC16	
SFC16-B	Back Entry Controller

On / Off Button

Polarity Protect

This feature means that the V16 will not be damaged if it is wired incorrectly, it simply will not work. Once it has been wired correctly, the unit will recover and work normally.

Higher Current

Pump Smooth

The advanced pump drive system runs the pump much more smoothly and quietly, and extends its life. With the V16 pumps can be driven slower, faster and harder than ever before.

Pump Precision

Thanks to the new pump control technology, the pump is monitored with far greater precision, saving water and energy and offering faster and more accurate dead end detection.

Pump Protect

Incorporating features such as dead end protection, pressure switch shutdown, over current detection and short circuit detection, the V16 protects the whole system and helps save power and water.
