Two Modes

Wall Mounting

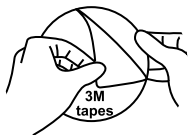

Floor Mounting

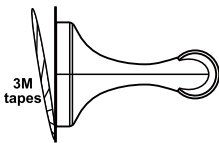

Self Adhesive Guide

Step 1: Clean all the dust/lint off the surface you want to stick on, and wait until it dries completely. (Recommend alcohol)

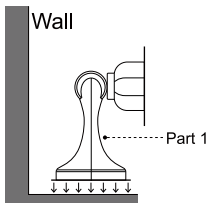

(1)

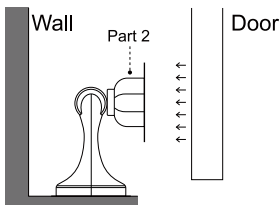

(2)

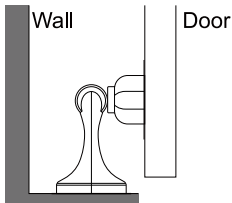

Step 2: Peel off and stick the 3M tapes to 2 baseplates of the doorstop. Press the stickers firmly for 1 minute.

Step 3: Choose the right position and stick part 1 on the floor.

Step 4: Peel off the outward tape of part 2, push the door to stick on the tape.

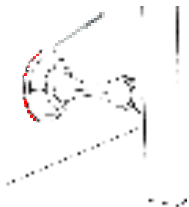

Step 5: Complete. Wait for 24 hours before using, the doorstop will work better and longer.
(Tip: Wrapped with thick tissue for not working temporarily)

Note: When in sticking, please slowly push and remove the air out. Please line two magnets up connected together to make sure stuck correctly.

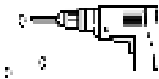

Wall/Floor Installation Guidelings

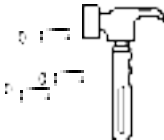

With a pencil, denote where the baseboard should be on the wall/floor

After twisting off the mountings, mark where the three holes are

With a 6mm drill bit on your electric drill, make the holes

Twist the expansion screws into their respective holes

Fasten the baseboard with screws

Spin the mountings to attach them

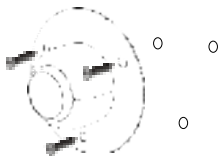

Door Side Installation Guidelings

Indicate the location of the baseboard on the door

Unscrew the door piece and mark the position of two holes

Fasten the base with screws

Finish the door side installation

Note: If installed on a wood baseboard, just drill 3 screws to fix the baseplate, then twist the part 1, no need the expansion bolt. The same way to install on the floor with screws.

FAQ

Q: Is there any restriction on the surface?

A: Yes, the 3M sticker is suitable for flat and dry surface, like PVC surface, metal, wood plank and ceramic tile. To make adhesive work better, please use alcohol to clean all the dust/lint off the surface, and wait until it dries completely. If installed on drywall/cement wall/latex paint wall or any uneven surface, please use screws, otherwise, it will remove the paint.

Q: How can I remove the 3M stickers if placed wrongly or want to reinstall to new house?

A: Take a hair dryer to heat it, it will be removed easily. And if the sticker peeled off, heat it, it will be more sticky after pressing.

Q: Are there two modes? How do I choose?

A: Yes, it can be mounted vertically to the floor or horizontally to the baseboard. When installed on floor, you can choose the max distance between the door and wall. Another point, the magnet is stronger when installed horizontally.

Q: Can I use the 3M stickers first?

A: Sure, easy to install with 3M stickers, or use screws for a more permanent mount. If the 3M stickers didn't work one day, you can install with screws for longer service life.

Q: If the magnet is too strong for my door, what should I do?

A: To reduce the power of the magnet, you can place a piece of clear tape/electrical tape/felt dot over the magnet.

Q: I am not good at installing, any tips?

A: You can search “how to install magnetic door stop” on youtube for more videos about installation. Or you can email us.
