To use the internet feature, the machine must first be set up with WiFi*.

1. To get to the WiFi settings, press the WiFi icon at the top of the screen.
2. Choose the proper WiFi signal and enter password if applicable.
3. You may also press the Hello Guest button 10 times to enter the Maintenance Mode. Next, choose WiFi to continue setting up your connection.
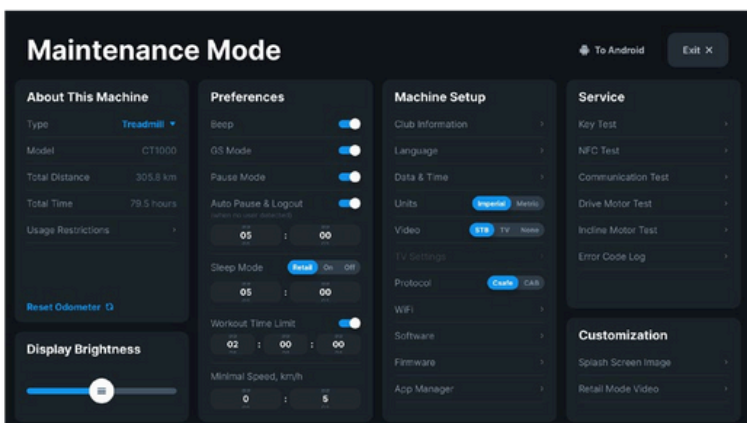

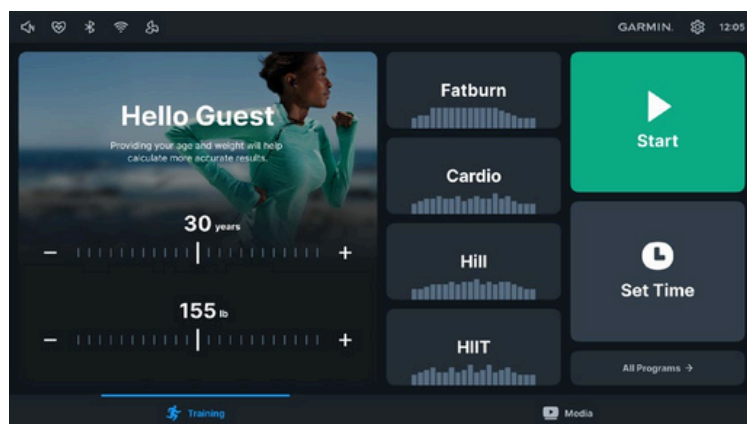

Updating the Software

Now that you are connected to WiFi, you can check for any needed updates to the equipment software.

To activate any software updates:
1. Tap on the Hello Guest button 10 times.
2. Select Machine Setup.
3. Select Software.
4. Complete any necessary updates.

NOTE:

• WiFi bandwidth of 1.5Mbps or greater for every 4 units is recommended to ensure proper bandwidth to support the use of streaming apps across multiple machines.
• For screen mirroring functionality, the machine and the user's phone must be connected to the same WiFi signal.
• To allow screen mirroring, the WiFi signal must be accessible to users either by facilitating an open network or by providing the WiFi password to potential users.
