

# ThermoWorks WAND™ Clinical

## Quick Reference

---

### Measuring Forehead Temperatures Quick, Easy, and Reliable!

- 1 Power on device**
- 2 Point at center of forehead less than 3 inches away**
- 3 Press the SCAN button for 1 second—two short beeps tells you it's done**

WAND Clinical is pre-set to forehead mode and to display temperature in Fahrenheit. Three short beeps followed by one long beep while taking a forehead reading means that the temperature exceeded 99.5°F (37.5°C). Check Zone Indicator for more information. Please wait 2 seconds between measurements.

# Functions

---

**Power Off Device** – Device will auto-off after 60 seconds to save battery life. Or, press and hold ON/MEM for about 10 seconds. 'Off' will flash before powering off.

**View Readings** – With device turned on, press ON/MEM momentarily to see the last reading, which is reading number 1. Each subsequent press of ON/MEM will show up to 25 readings in order. The reading number will flash before displaying the value.

**Mute** – With device turned on, press and hold ON/MEM for 3 seconds until speaker icon flashes, then release. Repeat steps to unmute.

**Change to Surface Mode** – With device turned on, press and hold ON/MEM, then press SCAN button to toggle between modes. Device will automatically return to forehead mode after powered off and back on again.

**Change from °F to °C** – With instrument turned off, press and hold the SCAN button, then press the ON/MEM for 3 seconds, icon "°F" will be switched to icon "°C". It can also be used the same process to change the LCD display from °C to °F. Complete the process again to switch back to °F. Please note: stored readings will be deleted when switching between units.

## Cautions

---

- Forehead should be clean, dry, and unobstructed before taking readings.
- WAND Clinical is not waterproof. Avoid wet areas and splashes.
- Do not expose device to temperatures above 100°F (38°C) or below 50°F (10°C).
- Replace batteries when battery icon flashes.
- Store device at room temperature where readings will be taken for best results.
- Avoid drops, bumps, and rough handling that could damage device.
- Sensor lens area is the most delicate part; keep clean and free from debris.
- Consult user manual before cleaning lens.
