

Groundline Garden Edging

INSTALLATION GUIDE

Materials & Parts

Parts List:

Edging Panel

Ground Stake

Structural Triangle

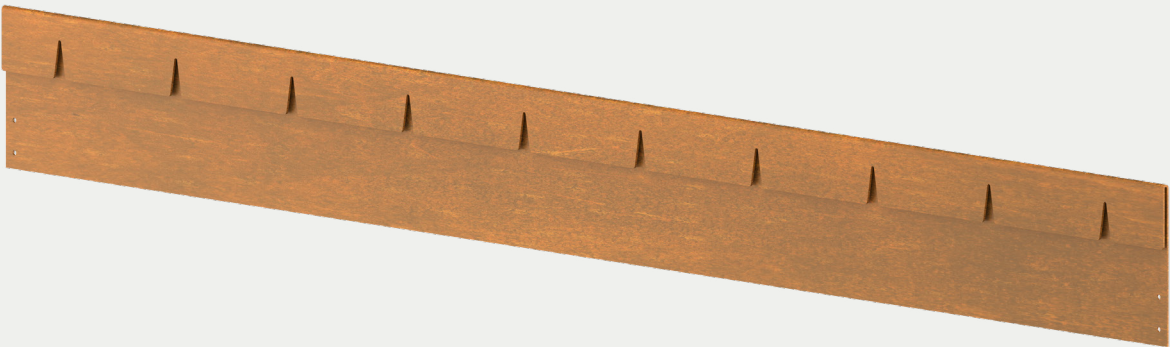

Equipment Required:

Hammer

Stringline / Laser Level

Impact Driver

Edging Panel

Ground Stake

To be used for fixing into soil or other soft surfaces

Structural Triangle

To be used for fixing into a concrete plinth

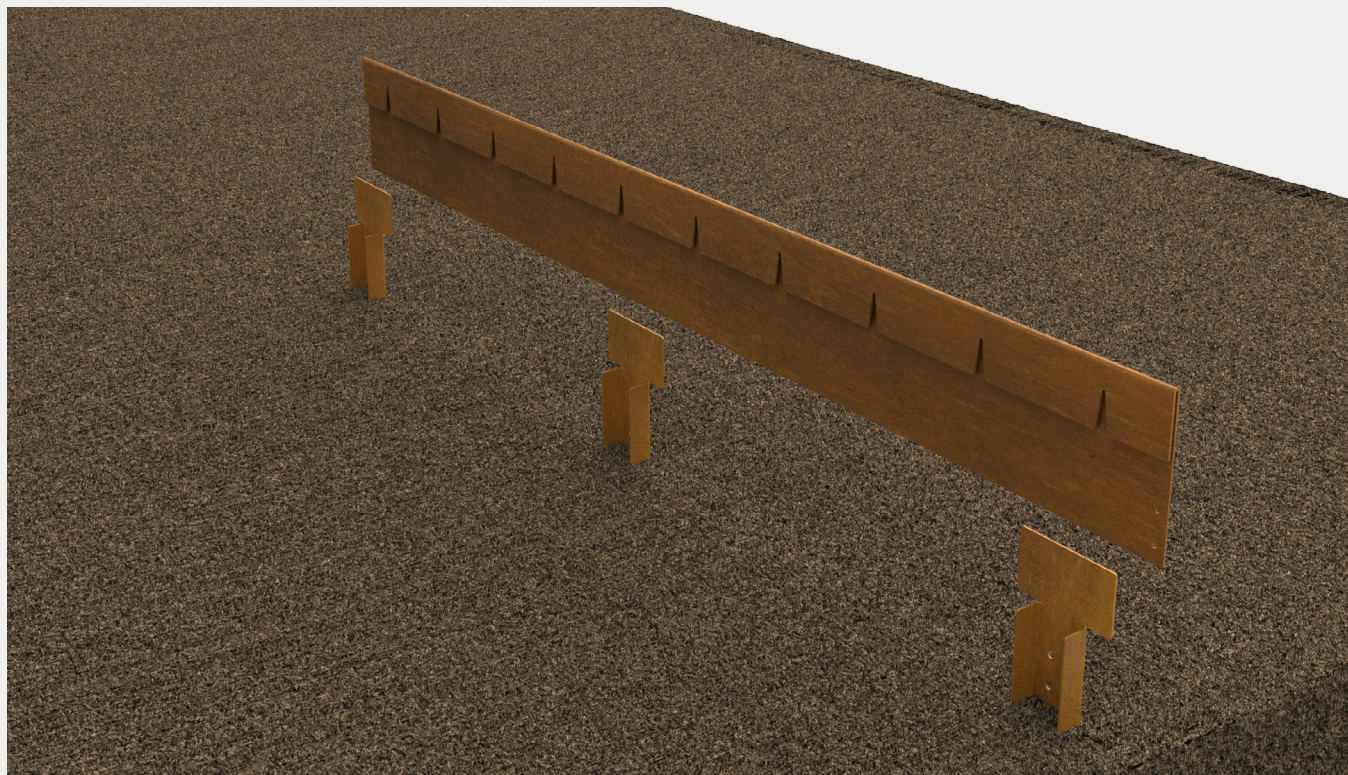

Step 01

Hammer down the support spikes into the ground.

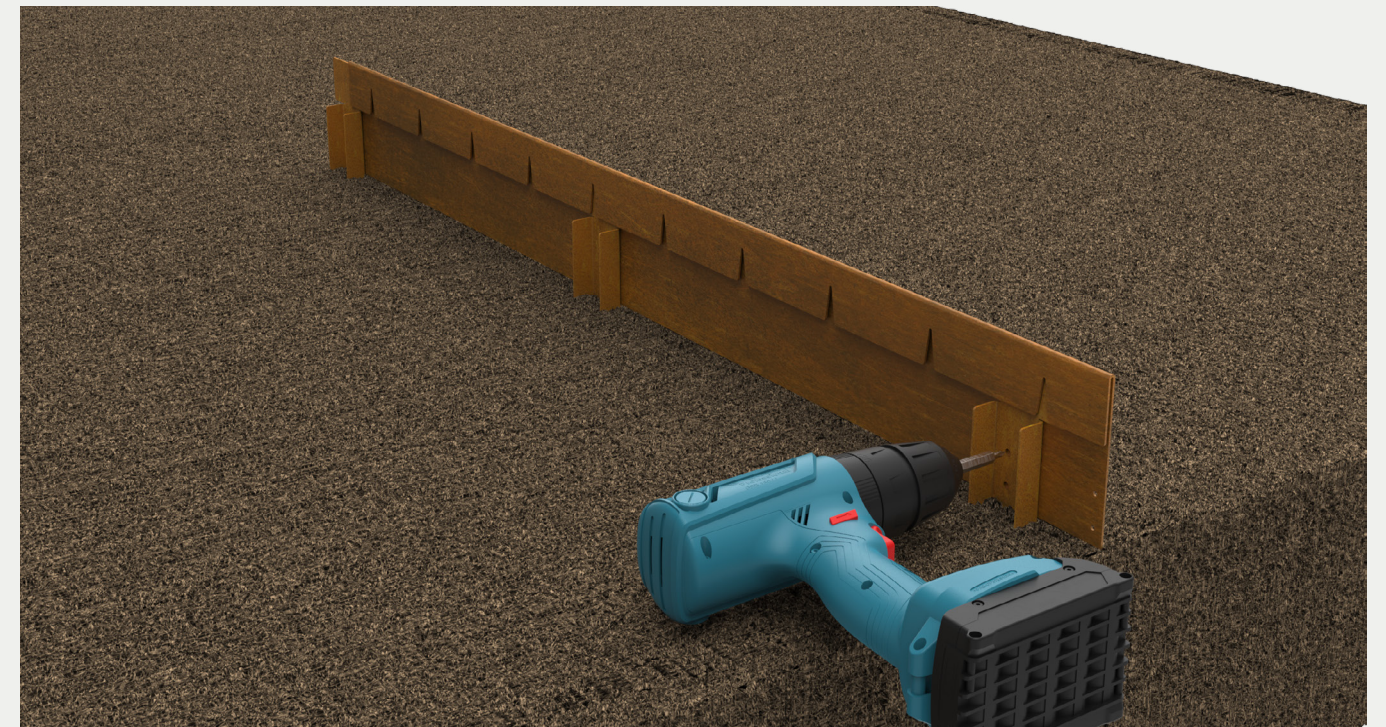

Step 02

Slot the edging section over the support spikes.

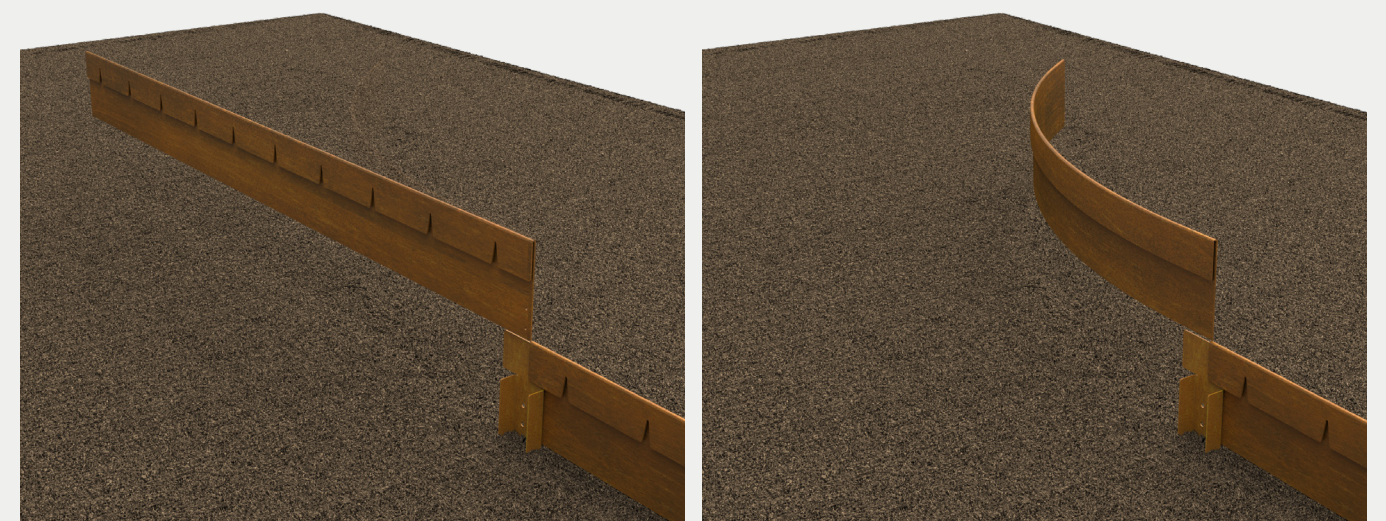

Step 03

If required, install fixings through the pre-drilled holes to lock the edge in place.

Step 04

Edge sections can be curved on-site for a flowing perimeter.

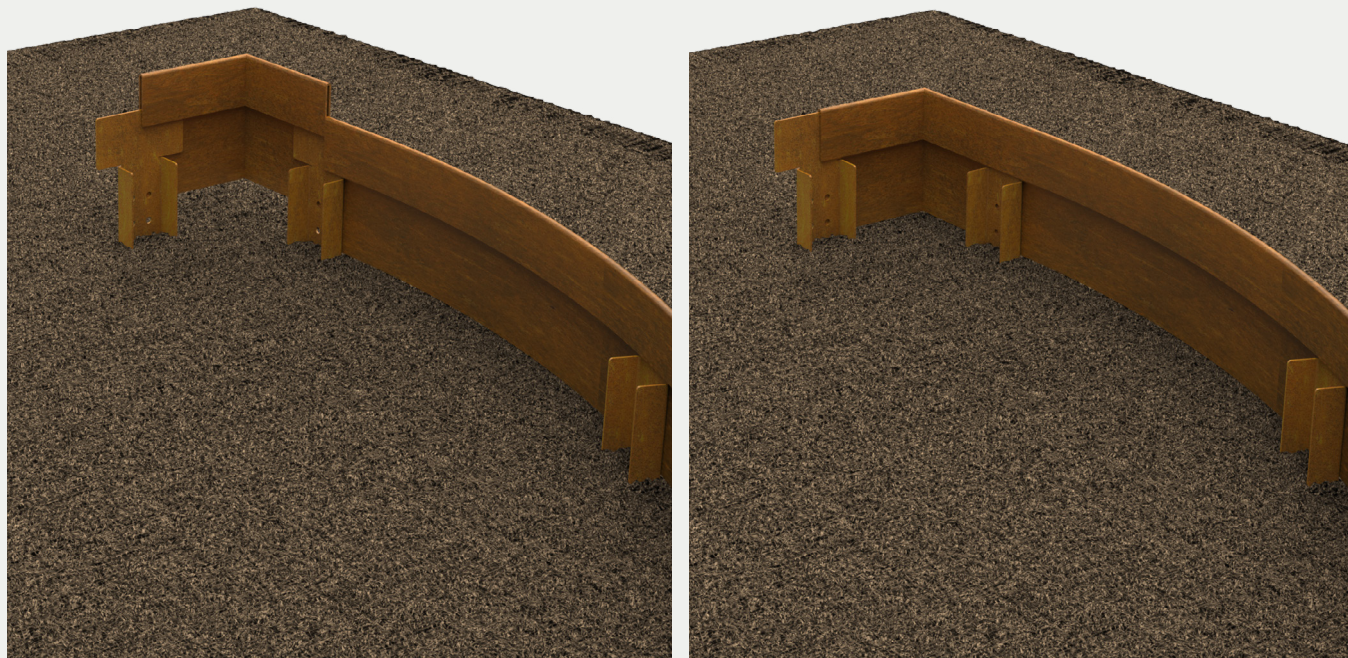

Step 05

Repeat this process to form your desired boarder shape.

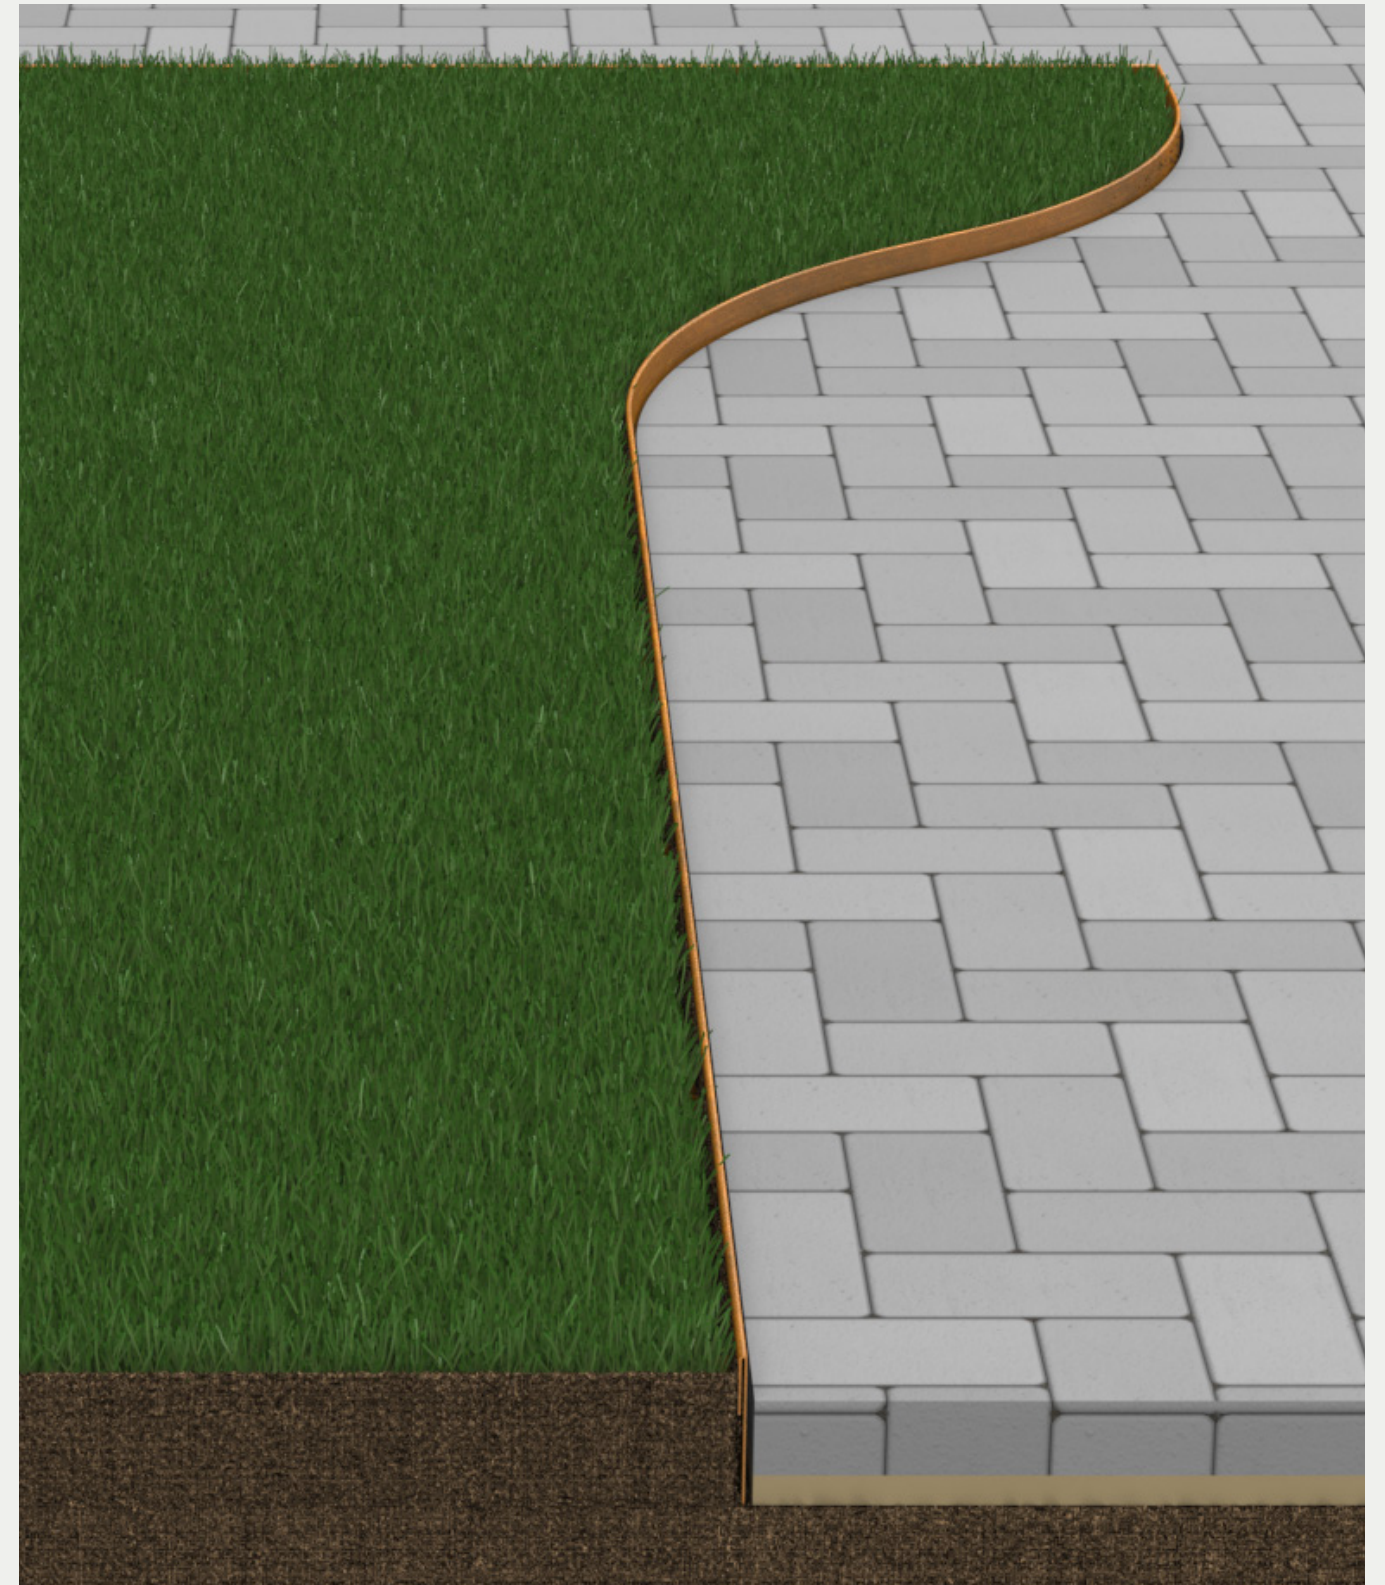

Step 06

Use a pre-formed corner section for perfect 90-degree corners.

Step 07

Finally, proceed with soil infill and paving.
