

Flanged Tank Overflow

Corrugated Tank

Installation and Specification Guide

PRODUCT DETAILS

A flanged overflow fitting for use with corrugated tanks.

The flange provides an ample surface for sealant and fasteners, and the standard fitting matches with our range of mosquito proof screens and standard plumbing fittings.

Code	Size	Country
TATO33	90mm	Australia
TATO34	100mm	
TATO33	90mm	New Zealand

Installation

WHAT'S IN THE BOX?

- Tank Overflow Standard (for Corrugated Tanks)

TOOLS/MATERIALS YOU MAY REQUIRE

- Marker pen
- Hole saw
- Silicone
- Screws
- Screwdriver

NOTE: If space is available consider a High Level Tank Overflow to increase the storage in your rain water tank.

TANK OVERFLOW CORRUGATED

1 - If you do not have an existing tank overflow hole in your tank, use your corrugated overflow as a template to mark the size of the hole you need to cut in the side of your tank, then cut using a holesaw. Ensure that the bottom of the hole you cut sits lower than the bottom of the tank inlet and/or tank inlet screen.

2 - Apply silicone to the flange on your tank overflow, push it into the tank overflow hole, then screw in place through the provided screw hole guides.

Product Specifications

Flanged Tank Overflow - Corro Tank

COUNTRY	CODE	A	B	C	D	E
Australia & New Zealand	TATO33	90 M	103	139	46	63
	TATO34	100 M	121	161	53	82

All dimensions are in mm unless otherwise stated.

Fitting guide:
F = Female / Socket Fitting
M = Male / Spigot Fitting (Pipe size)
IP = In-Pipe Fitting

Maintenance

When properly installed, your tank overflow should be maintenance-free.

We recommend pairing your tank overflow with a mosquito-proof screen or flap valve to prevent mosquitoes and other pests entering your tank through the overflow outlet.

A common misconception about collecting rainwater is that all you need is a roof, a tank and some rain. This 'tanking' approach cannot always be relied on to deliver the volume – or quality – of water that you require. That is where we can help.

With some thought, your rain harvesting system can provide you with cleaner water and lots of it. Whether you're completely reliant on tank water or wanting to keep the garden green, our simple steps will help you achieve your goal.

The Rain Harvesting approach to rainwater collection involves using tested and proven products to make quality rainwater available for use in and around your property. You don't need much to get started and you will be surprised how easy it is to get the most out of your rainwater system.
