

CUSTOM BADGE CUT INSTRUCTIONS

Step 1:

Place your badge centered on a blank piece of paper.

Step 2:

Trace your badge with a pen, avoid moving the badge or making correction lines.

Step 3:

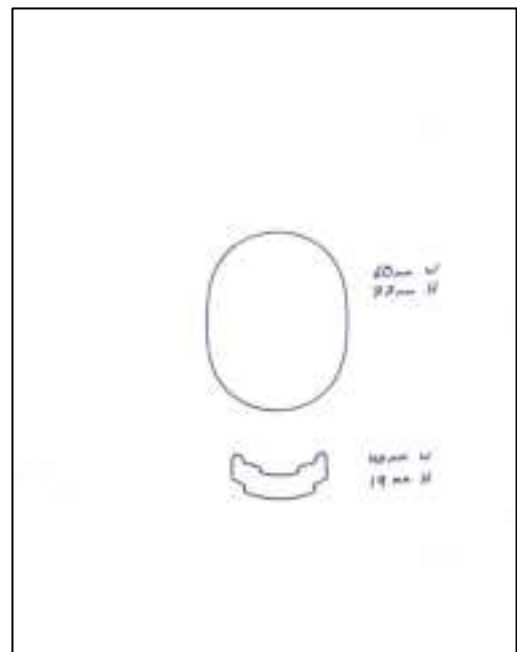

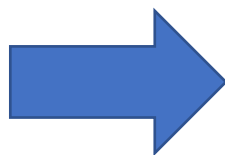

After completing the tracing, measure the lowest and highest points to get the total **Height**. Then measure the widest points of the badge to get overall **Width**.

Tip: You can measure the badge itself or measure the outlines on the paper.

Step 4:

Once complete, scan the finished tracing either using a scanner, or scanner app on your phone.

Step 5:

Email us the scanned tracing to **info@911dutygear.com**

Don't have a scanner?

Use iPhone or Android to scan!

iPhone	Android
