

Use & Care Manual

Product Name: Metal Garden Trellis – Rustproof Trellis for Climbing Plants Outdoor Flower Support

Model: [Add your specific model code or SKU if applicable]

Product Overview

The Metal Garden Trellis is a rustproof support structure designed to guide and support the vertical growth of climbing plants. Made with galvanized round pipe and finished with a durable powder coating, it is built to withstand outdoor conditions while enhancing your garden aesthetics.

Specifications

-

Material: Galvanized steel pipe

-
-

-
-

Application: Outdoor use – gardens, patios, yards

-
-

Plant Support: Ideal for climbing plants such as roses, clematis, jasmine, peas, morning glories, etc.

-
-

Assembly Instructions

1.

Unpack all components and ensure all parts are present.

2.

3.

Align the sections of the trellis per the diagram (if provided).

4.

5.

Use the pre-drilled holes and included hardware to secure the parts together.

6.

7.

Ensure the trellis is **firmly pressed into the ground** or secured with anchors if used on hard surfaces.

8.

9.

Multiple units can be **joined side-by-side or angled** to form a screen or corner for added plant support and visual effect.

10.

Tip: Assembly is quick and can be done by a single person in under 15 minutes.

Care & Maintenance

-

Cleaning: Wipe down periodically with a damp cloth to remove dirt or debris. Mild soap may be used.

-

-

Rust Prevention: Although the product is rust-resistant, avoid prolonged water pooling at the base. Check annually for any scratches in the coating and touch up with outdoor paint if needed

-
