## Installation

### 1. Method 1: Install with Back Clip

- ① Use the screwdriver to loosen the screws of the back clip so that it can open to a proper extent.
- ② Open the helmet liner, insert the clip into the right position on the left side of the helmet and tighten the screw.
- ③ Slide the intercom into the back clip slot to make sure it locks firmly.
- ④ Open the helmet liner (ear position), clean the EPS surface of the helmet, and stick a piece of horn Velcro on the left and right sides of the helmet.
- ⑤ Stick the speaker on the fixed Velcro surface and the speaker with short line should be installed close to the machine. Fix the microphone and arrange the helmet lining and cable.
- ⑥ Insert the headset into the jack of the intercom and tie up the headset cable.

### Method 2: Install with Velcro Clip

Separate the hook and loop fasteners. First stick the hook onto the Velcro clip; choose the right installation position on the helmet and stick the loop to the position. Install the intercom onto the Velcro clip.

The installation of speakers can refer to the description above.

## 2. How to Remove the Intercom from Helmet

First unplug the headset, then press the fixed buckle in the middle of the back clip with one finger (push towards the side of the helmet), so that the back clip hook is detached from the intercom, and push the intercom upwards to let it slide out of the back clip smoothly to complete the disassembly.

### 3. How to Fix the Headset Plug (If necessary)

Unscrew the screws on the back of intercom with screwdriver, open the buckle flap, plug in the headset plug and tighten the screws. If you need to plug out the headset, please open the buckle flap by unscrewing the screws.
