

# SmallRig

## Top Handle with Cold Shoe (Lite)

Operating Instruction

SmallRig Top Handle with Cold Shoe (Lite) 3764 is designed to facilitate low-angle shot and reduce burdens on arms. The ergonomic handle, featuring anti-slip and anti-freeze silicone, feels comfortable and weighs only 129g because of a hollowed-out structure. It has 3 front cold shoes and 2 rear cold shoes that allow simultaneously mounting microphone, LED light, monitor, and other accessories. ARRI 3/8" -16 locating holes support Monitor Mount 2903, 2348 to attach monitors; 1/4 "-20 threaded holes support Magic Arm 2070 for monitors and Remote Control 2924 for recording. An Allen Wrench helps tighten the locking screw, making it easy to assemble and disassemble.

## Safety Guidelines

### 1. Environment

Do not use the product underwater, in extreme temperatures (e.g., freezing or direct heat), corrosive environments, or excessive dust. Dry metal parts immediately after liquid contact to prevent corrosion.

### 2. Load Capacity

Do not exceed the maximum weight capacity indicated on the product. Overloading risks structural failure, deformation, or accidental drops.

### 3. Cleaning & Maintenance

Clean surfaces with a dry, soft cloth. Avoid chemicals like alcohol or solvents. Ensure dry and ventilated conditions for long-term storage.

### 4. Structural Integrity

Do not modify the product (e.g., drilling, cutting)—this compromises structural integrity and increases drop risks.

### 5. Malfunctions

Stop use immediately if you notice deformation, unusual noises, or loose components, and contact support.
