

FW46

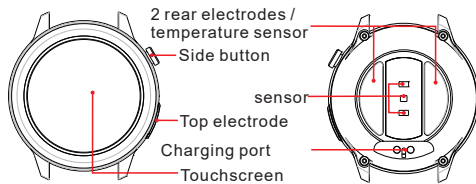

User Guide

Thank you for choosing this smart watch. This watch will provide higher help and enjoyment for your exercise and health. For your convenience, please read the instructions carefully and follow the steps in the instructions.

Introduction

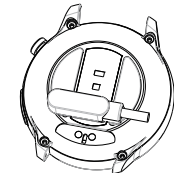

Watch description

Long pressing the side button turns on the watch

Charging instructions

Charge the battery before use. To do this, use the attached cable connected to the USB socket of the computer or a 5v / 2.1A max USB charger.

Xenon App

Scan the QR code or download the SmartHealth application from the Play Store / App Store.

1 English

The application requires iOS 9.0 or higher or Android 4.4 or higher. The application communicates via Bluetooth 4.0

Open the application to set personal information

Click the "Settings" tab, then "Device Status"

Select by clicking from the list FW46

Binding completed

Watch interface

Screen wallpaper

Holding the touchscreen activates the feature of choosing its appearance from among 7 patterns.

By moving the screen up or pressing the side button, you access the menu. Sliding down / pressing the button again takes you back to the main wallpaper interface.

Pedometer / Distance / Calories

Xenon allows you to monitor steps, distance, calories burn in real time. After synchronizing the watch with the application, you get more detailed analysis of activities taken.

2 English

Body temperature

Switch to the temperature interface to activate real-time measurement.

Note: metal sensors must be in contact with the skin during measurement. The result of this measurement is indicative, not medical

Heart rate monitor

Switch to the heart rate interface, heart rate is measured in real time and the measurement result can be analyzed in the app.

ECG

Carefully hold the upper electrode while pressing the watch to your hand to ensure contact with the lower electrodes. Graph and analysis only available in the app.

Blood pressure measurement

sit back and relax, switch to the blood pressure monitor interface and rest your hand with the watch freely, e.g. on the table, at the level of your heart.

Note: The measurement results are not medical values, they are for reference only.

3 English

Saturation

Switch to the saturation interface, after sending the data to the application, you can perform the analysis.

Breathing Rate (BR)

Switch to BR interface, the result is the number of breaths per minute.

Sports modes

Switch to the sport activity selection interface. Click the icon of the sport you want to practice to start activity monitoring. Slide the screen right to finish.

Weather information

Shows the current weather, air quality information and the forecast for the next day. Obtaining this information requires connection to a phone with an active location function.

Note: Some smartphone software versions may not work properly with this feature.

4 English

Sleep monitor

When you fall asleep, the watch detects this condition and automatically goes into sleep monitoring mode. After synchronizing the data, the application provides data on the duration of sleep, divided into deep and light sleep.

Note: The watch must be worn on the wrist to monitor your sleep status.

Stopwatch

Exit: Move the screen to the right.

Music

You can control the music player while the phone is connected. Note: Feature depends on smartphone software

The camera

Run the app and then you can remotely control the shutter release.

Shortcut menu
