Wireless Video Equipment

TERK **L-30S** 2.4 GHz Wireless Audio/Video Transmitter and Receiver System

Imagine having your A/V components (satellite receiver, DVR, DVD player or a camcorder) in one room and the ability to watch them in another room, even multiple rooms, without running wires. Or being able to listen to your computer's MP3 collection on a pair of powered speakers in another room? Terk's Leapfrog LF-30S is a wireless transmitter/receiver system that does just that. It also gives you the ability to control the A/V source from the other room, so you can actually change the channels on your satellite receiver from the second TV's location. With the purchase of additional receivers, you can use it with multiple TV's throughout your home. *(TELF30S)* **62.18**

DIGITAL LIVING

There's no doubt we live in the digital era. Music, photography, video — it is all digital, and it is at our fingertips. Digital technology has transformed the way we work, play and communicate. From the pictures we take with our digital cameras, to the music we listen to on our digital music players, and all the information stored on our computers, PDAs, and mobile phones, everything is based on some type of digital file format.

Whether we are traveling by train, plane, automobile, or boat; while studying, jogging, working out—and even swimming—we obviously want our videos, music, movies, TV programs, and podcasts with us. The industry overall has made great progress toward developing innovative products and services that are helping make digital living a reality for consumers.

iPad

More powerful than ever. The new Retina display contains 4x more pixels than the iPad 2 for outstanding clarity and sharpness with both text and images. Dual-core A5X chip with quad-core graphics provides a great deal of processing power and speed to compensate for the increase in resolution and delivers the same responsive feeling of the former models. This increase in power and resolution doesn't come at the expense of battery life—the iPad still features up to 10 hours of power between charging.
The rear-facing iSight camera incorporates a 5 megapixel backside illuminated sensor for increased lowlight sensitivity as well as great performance in bright situations. Autofocus, tap-to-focus, and tap to set exposure settings allow you to achieve the best exposure possible in a quick and intuitive manner. Face detection is also supported and recognizes up to 10 different faces for improved exposure and focus settings when photographing people. iSight camera also supports full HD 1080p video recording with automatic image stabilization. The camera utilizes a 5-element f/2.4 lens for sharpness and integrates a hybrid infrared filter for greater color fidelity. For even greater functionality, dictation simply talk in order to type. Speak your emails, texts, notes, or web searches and have the written words automatically appear.

ASUS® ZENBOOK
13.3- and 15.6" Ultrabooks

Astonishingly thin, these ultra portables are made possible through the use of a strong but light aluminum alloy shell with a unique 'spun' finish on polished surfaces. The artistry of the series draws inspiration from luxury timepieces, displaying sharp edges, an oversized keyboard and smartphone-like touchpad for added comfort, as well as reinforced hinges for extended longevity. For audio, they incorporate SonicMaster technology, co-developed by Bang & Olufsen ICEpower.

- Elegant and durable aluminum with a hairline spun finish reflects a cool, infinite look of limitless depth. 12" thin and 2.87 lbs.
- ASUS Super Hybrid Engine II with Instant On enables 2-second resume of the notebook from sleep, with up to two weeks of standby time with open files and other pending data kept safe in memory.
- Dedicated Battery Saving Mode conserves power whenever possible to increase battery life by as much as 25%.
- Automatic data backup when the battery reaches 5% charge
- PowerWiz utility shows exactly how much charge is left per application – web browsing, gaming, movie watching and more.
- SonicMaster technology delivers breathtaking, lifelike audio that far exceeds the limitations of conventional notebook PC sound performance. Deeper, more impactful and wider in range, SonicMaster delivers four times the sound output of other ultrabooks without increasing the size or weight of the form factor.

Apricorn Padlock

USB 2.0 Encrypted Hard Drive with PIN Access

Stores up to 10 secure PIN passkeys with 256-bit military grade AES hardware encryption for ultimate security. Administrator function allows IT departments to secure its mobile users by assigning admin access to the drive before being distributed. The drive also self destructs after a predetermined number of failed PIN entries.
It assumes it's being attacked and destroys the encryption key and locks itself, rendering the data useless and requiring a total reset to redeploy the Padlock. Variable Time Circuit technology prevents against timing attacks aimed at accessing the drive by studying its behavior and infiltrating the Padlock's electronics.
Additional features include weather resistant key pad, 16-point omni-directional shock mounting system and super tough, epoxy compound protecting the circuitry and encryption chip.

Leica Ultravid HD Series

They offer unparalleled image brightness and contrast, thanks to Leica's Fluorite-Ion lenses. These highly developed lenses further reduce chromatic aberrations, and produce high color fidelity. Their specially coated prisms increase light transmission, allowing them to discern fine details in any low light situation. Die-cast, magnesium, rubber-armored body has industry's highest rating for shock resistance. They are nitrogen filled and watertight to a depth of 16.5 feet. Finally, painstaking attention to ergonomic detail results in a beautifully contoured binocular that fits perfectly in your hands.

FinePix X100

The FinePix X100 is a high precision digital compact camera that combines modern technology with a traditional camera design to deliver the ultimate in image quality. Featuring a 12.3 mega-pixel APS-C CMOS sensor, Fujinon 23mm f/2 lens, a 2.8" 460K LCD, and the world's first Hybrid Viewfinder, the FinePix X100 captures exceptionally high quality images.

- When shooting HD movies, the large f/2.0 aperture lets users create a soft out-of-focus image
- Hybrid Viewfinder combines the window-type "bright frame" optical viewfinder with the electronic viewfinder system. Can show both the shooting frame and a variety of electronic shooting data.
- Instantly switch between optical and electronic viewfinder modes
- Motion Panorama function makes it easy to capture 180° and 120° panoramic photos.
- Four types of bracketing functions: AE, ISO, Dynamic Range and Film Simulation. One click of the shutter captures 3 bracketed images of the scene so you know you've captured the moment.

FinePix REAL 3D W3 3D Digital Camera with 3D HD Video

Equipped with dual Fujinon 3x optical zoom lenses (35-105mm), two 10-megapixel sensors and two shutters that work like your eyes, the FinePix REAL 3D W3 captures true 3D with the press of a button. After capturing an image (or video in 3-D), an internal processor merges these two images into one, which can be seen on the back of the camera in a stunning display—no special glasses required. If you want to see photos and videos in 3-D format other than on the camera's 3.5" display, you can view them on a 3D-ready TV or 3D-ready computer while wearing special glasses.

FUJIFILM X-Pro1

Interchangeable Lens Digital Camera System

Featuring a 16MP X-Trans CMOS sensor, proprietary EXR Processor technology, original X-Mount and Hybrid Multi Viewfinder, the X-Pro1 delivers outstanding image quality that rivals high-end DSLR cameras. The camera is designed with a die-cast aluminum top and base, and a leather like finish on the main body for grip and the look and feel of authentic leather. For convience, a natural fitting eyepiece provides excellent shielding from light leakage. Also offers 100-25600 ISO capabilty and 1080p HD video with stereo sound.

- Hybrid Viewfinder can instantly switch between an optical and electronic Viewfinder. When attaching an XF-series lens, both the viewfinder magnification and bright frame size automatically switch to support the lens focal length.
- Incorporating a special anti-reflective coating, the 3-inch LCD (1,230,000 dots) features high water repellency, a stain-resistant acrylic film and superb anti-glare performance.
- Film Simulation - just like choosing the ideal photo film
  - "Studio Ready" professional color negative film modes for perfect portraits
  - Reproduce photo film expression with film simulation mode
  - Enhance monochrome expression with color filters
- Select from four powerful auto bracketing functions (AE, ISO sensitivity, Dynamic Range and film simulation)

EOS 60Da Astrophotography Camera

Perfect for long exposures while gazing up into the sky, the EOS 60Da is tailor made just for astrophotography. It incorporates a modified IR blocking filter that allows the light normally blocked by a typical DSLR's filter to be captured by the camera's sensor. This means that the reddish hydrogen-alpha (Hα) light (656nm) gasses unseen by a normal DSLR are captured brightly and clearly on the EOS 60Da. The result is astrophotography that is sharper, clearer and more accurate in the depiction of naturally occurring reddish hues of diffuse nebulae. Otherwise the same as the EOS 60D, it also includes the RA-E3 Remote Controller Adapter which allows compatibility with the optional TC-80N3 Timer Remote Controller for accurate control of long exposures and automatic shooting of repetitive shots with the interval timer.

Canon

EF 50mm f/1.2L USM

Ideal for low-light photography, the high-performance EF 50mm f/1.2L USM is a standard focal length optic featuring an ultra-large aperture for a narrow depth of field that produces a soft background blur. Its weather-resistant with lens coating and construction that are designed to minimize the ghosting and flare that frequently occur with DSLRs, to deliver superb image resolution and contrast.

100mm f/2.8 EF USM Macro Lens

The 100mm f/2.8 macro lens will focus over the full range from infinity down to life size (1:1 reproduction ratio). A high-performance ring-type ultrasonic motor provides fast and silent operation throughout its focus range. It also allows full-time manual focusing. An advanced optical formula with a three-group floating element system provides exceptional close-up performance, and a wide manual focusing ring offers smooth action and full-time manual focus override, even in the AF mode.

8-15mm f/4.0 L USM Fisheye

Delivers 180° diagonal angle of view images for all EOS SLRs. When used with full-frame cameras you can choose between a circular fisheye image or full-frame image by using the zoom. When used with EOS bodies featuring APS-C or APS-H sensors, the lens produces a more traditional, full frame fisheye view. A zoom-lock mechanism on the lens body allows the range to be limited to the focal length that ensures the best possible full-frame view without unsightly vignetting around the edge. *(CA8154L)*....**Call or Log-on**

EF-S 17-40mm f/4.0 L USM

Delivers optical performance equal to similar fixed focal length lenses, with silent, high-speed focusing. High-precision molded glass aspherical lens and two replica aspherical lenses achieve the extended zoom range, while also correcting for aberrations that arise during zooming. Super UD (ultra-low dispersion) glass element help eliminate color bleed along the edges of the subject and achieve high image contrast and resolution.

24-70mm f/2.8L II USM

Super UD and two UD lens elements minimize chromatic aberration in the periphery at wide-angle, as well as reducing color blurring around the edges of the subject. Dust sealed and water resistantant, while fluorine coatings on the front and rear lens reduce fingerprints and smearing. A circular 9-blade diaphragm gives beautiful, soft backgrounds. A zoom lock lever locks the zoom position at the wide end for safe transporting while attached to an EOS DSLR camera over the shoulder.

70-200mm f/2.8L IS II USM

Incorporating Canon's second generation two-stage Image Stabilization technology, this telephoto zoom responds in as little as 0.5 seconds, while providing up to three stops of correction for camera shake. Its AF system has been refined for better response time and tracking speed. And even the new 8-blade circular aperture offers a more pleasing out-of-focus image. Constructed to pro standards, this fast zoom is also highly resistant to dust and moisture.

FM10

Lightweight, affordable, fully-manual film SLR that introduces the studet or beginner photographer to the fundamentals of exposure, aperture, and shutter speed controls. Exposure settings, film advance and rewind are all done manually. Focusing manually while viewing through the lens is an exciting way for a budding photographer to develop a sense of composition. Built-in hot shoe accepts just about any Nikon Speedlight in manual or non-TTL auto modes, plus the FM10's built-in center-weighted light meter couples with a vast array of Nikon manual focus and autofocus ("D" type) lenses.

DSC-RX1 Full-Frame 24MP CMOS Camera

The DSC-RX1 is the world's first fixed lens 35mm full-frame digital camera which offers an uncompromising design with intuitive, user-friendly operation. The camera fits in the palm of your hand and and can be carried nearly everywhere to capture any shooting opportunity that arises. Featuring a 24.3 MP 35mm full-frame sensor, sensitivity up to ISO 25600, and a sophisticated balance of high resolving power, gradation and low noise, the DSC-RX1 will help you shoot a whole new world of high-quality images. Newly developed large-diameter F2.0 Zeiss Sonnar T* lens delivers refined background defocusing – bokeh, and macro capabilities. A premium multi-layered T* coating also dramatically reduces ghost and flare caused by light reflection.

- BIONZ image processor enables up to 5 fps continuous shooting and 14-bit RAW image data recording.
- While shooting movies and stills, users can use Program Auto, Aperture- and Shutter-Priority or manual (P/A/S/M) mode. Enjoy clear sound recording and playback via built-in stereo mic and speaker. Or connect an optional microphone into the camera.
- Sensitivity is selectable up to ISO 25600, plus the camera can capture six images in a fraction of a second. It then combines the data from all six, creating single image with a reduction in noise equivalent to two additional steps of ISO sensitivity.
- 3" (1,229k dots) Xtra Fine LCD with WhiteMagic technology to increase visibility in bright daylight.
- Nine aperture blades form a nearly perfect circle throughout the normally used aperture range of F2.0 to F22, resulting in background defocusing that is smooth and genuinely beautiful.
- MR (memory recall) mode can memorize up to three groups of preferred settings. Settings include zoom white balance, exposure compensation, shutter speed, drive and metering modes.
- Fast, DSLR-like focusing speeds even in low light. Focus as fast as 0.13 seconds with high speed AF.
- 13 picture effects and 15 finishing styles
- Auto HDR mode; Sweep Panorama mode; Auto portrait framing
- Face detection/registration technology
- Built in pop-up flash
- Capture JPEG files, RAW files, or both
- Four focusing modes; MF assist and peaking
- Digital level gauge to allow easier leveling of the camera
- Multi interface shoe allows connection with optional accessories including a external flash unit, electronic viewfinder, optical viewfinder, thumb grip, clip-on LCD monitor, etc.

SLT-A99 Full-Frame 24.3MP Camera

35mm full frame digital camera equipped with Sony's translucent mirror technology, the SLT-A99 can shoot without the delay of a reflex mirror, plus its Dual Autofocus System continuously monitors and altera its focus in real time. 24.3MP full-frame Exmor CMOS sensor lets you capture high quality images in low-light. ISO range of 100 to 25600 with area-specific noise reduction lets you shoot at the higher end of that sensitivity range. 3.0" TruBlack LCD (1,228,000-dots) features Shot Result Preview, for previewing the effects of your camera's settings before the exposure is even captured. It is also able to tilt up to 180° vertically and can rotate up to 270° horizontally. Tru-Finder Electronic Viewfinder features a 1,440K-dot resolution, 100% field of view, and a wide 31.9° viewing angle.

Using sensor-shift image stabilization, Sony's SteadyShot technology takes place inside the camera rather than in the lenses you attach. Achieve shake reduction of up to 2.5 to 4.5 stops, so your shutter speed will not need to be set as low as it would without the stabilization. Full HD 1080p video is supported with this camera and makes use of the high-speed Translucent Mirror technology for continuous autofocus, even while using Live View to monitor your shooting. The 24p frame rate allows you to create movies with a more cinematic feel, and for even greater control ISO sensitivity, P/A/S/M manual shooting modes, and Picture Effects are available.

Model Types

DG Models

Optimized for Digital SLR's

These are large aperture, wide angle lenses with short minimum focusing distances and an abundance of peripheral illumination. While they are ideal lenses for digital SLR cameras, they are also suitable for traditional 35mm SLR's.

DC Models

For Digital SLR's Only

These lenses feature an image circle matched to the small sensor found in digital SLR cameras. This method results in a lens ideally suited to digital reproduction with the added bonus of reduced weight.

SIGMA

Model Features

HSM - HyperSonic Motor. Enables virtually silent, highly-responsive auto and manual focusing, as well as manual-focus-only override.

ASP - Aspherical Lens. The aspherical lens complex allows freedom of design, improved performance, a reduced number of component lenses and a compact size.

EX - EX Lens. The exterior of this lens is EX-finished to denote the superior build and optical quality, and to enhance its appearance.

OS Function - Optical Stabilizer. This function utilizes a built-in mechanism that compensates for camera shake. It dramatically expands photographic possibilities by alleviating camera movement when shooting by hand-held camera.

APO - APO Lens. In order to attain the highest quality images, the APO lens has been made using special low-dispersion (SLD) glass and is designed to minimize color aberration.

IF - Inner Focusing. To ensure stability in focusing, this lens moves the inner lens group or groups without changing the lens' physical length.

RF - Rear Focusing. This lens is equipped with a system that moves the rear lens group for high-speed, silent focusing.

RFS - Rear Filter Slot. This lens has a rear slip-in gelatin filter slot.

LensCoat Lens Covers

Manufactured from 100% closed-cell neoprene, offering protection from bumps, jars, and nicks, with a camouflage-pattern fabric cover. Lens Covers also provide a thermal barrier, protecting your hands from cold lenses in lower temperatures. They are easy to install and remove, leaving no residue on the lens. Moving a big white (or black) lens near skittish wildlife is like waving your arms – a sure way to flush your subject and ruin what could be a once-in-a-lifetime photo opportunity. LensCoat™ Lens Covers mask your large lens, giving you a better chance at getting the shot.

Classics are works that clash with the present.They are never modified – instead they are re-interpreted on the basis of a changed world. With the M7, a classic camera has been infused with modern electronic advantages that results in a camera that is faster than ever while still having the soul of a Leica.

- Choose between three viewfinder magnifications: the standard 0.72x, an 0.85x viewfinder magnification for longer focal lengths, and an 0.58x viewfinder magnification for wide-angle.

X2 Digital Compact Camera with Elmarit 24mm f/2.8 ASPH. Lens

Lightweight (only 10 oz.) and compact, the X2 is equipped with a 16.1MP CMOS sensor similar to those used in semi-professional DSLR cameras. Combined with the all-purpose Leica Elmarit 1:2.8/24mm lens, the X2 offers outstanding picture quality that need not fear comparisons with professional cameras. It also features automatic and manual controls, low noise and high dynamic range, sensitivity up to ISO 12500, Live View with 2.7" display, and of course, legendary Leica precision engineering.

M Monochrom Digital Camera

A black-and-white version of its M9 full-frame rangefinder, the M-Monochrom has no color filter array in front of the sensor, meaning it captures more of the available light but cannot perceive color. It also means there is no need for demosaicing (the process of combining color information from adjacent pixels), so higher levels of detail are retained. In most other respects, the M-Monochrom is similar to the M9.The camera can add three toning colors to its monchrome output or its uncompressed DNG files can be edited using the included copy of Photoshop Lightroom. A full version of the mono processing software Silver Efex 2 is also included. *(LEMM)*..... **7950.00**

HASSELBLAD

H5D-40 40-Megapixel Medium Format DSLR Camera

Delivers unsurpassed image quality via powerful features and precision optics. True Focus technology with Absolute Position Lock (APL) allows you to capture close distance shots with a unique yaw sensor to measure angular velocity. The low noise color filter of the H5D-40's sensor provides for increased clarity and increased depth of field. The Natural Color Solution (HNCS) achieves consistent color reproduction using a single color profile, and digital lens correction perfects each image captured through HC/HCD lenses by removing any trace of distortion, vignetting, or chromatic aberrations.

Voigtländer

35mm Rangefinder Cameras

Voigtlander Bessa cameras are light, unobtrusive cameras that are ideal for handheld lowlight conditions. These rangefinder cameras have a smaller distance between the film and the lens mount than SLRs, which makes for inherently sharper lenses.

B+W

The industry-standard for demanding professionals and amateur photographers for creative imaging with optimal quality. Choose from correction and effect filters for color and B&W photography; Käsemann polarizing filters; close-up lenses; special-effect- and trick lenses; filters with SLIM mounts for vignette-free exposures with wide-angle zoom- and fixed focal length lenses.

B+W uses the very best glass and filter mounts, and machines them with CNC-controlled fabrication machines to make sure that the filters perform their functions optimally without jeopardizing image quality.

Most other filter manufacturers start with ordinary window glass that has been poured in thin sheets and cooled quickly, introducing internal flaws. B+W starts with a cylinder of Schott German optical glass from which the filters are diamond cut, precision ground, and then polished to ensure flatness on both surfaces and uniform thickness throughout. Every B+W filter is interferometrically tested for plane parallelism. This process is used routinely by the world's leading lens makers, but only rarely by filter manufacturers.

HOYA

Wouldn't you rather spend your time attaching the right filter than retouching every photo? Attaching the right filter can replace the need to retouch each digital photo you take. Using filters allows you to spend more time taking photos and less time in front of the computer!

Digital camera CCD or CMOS sensors are highly susceptible to reflections - this stray light can ruin your photographs! Don't risk your valuable photos by using bare-glass filters. Now try a HOYA Digital Multi-Coated filter and see how the benefit of substantially reduced reflections can improve your image. Reduced internal reflections mean a clearer image with greater contrast

Hahnemühle
FINEART

INKJET PAPER

The Hahnemuhle paper mill has been producing quality mould made artists papers for over 400 years. Since its founding they have developed a tradition of excellence in art materials that have now been brought to the digital age. The result is the Hahnemuhle collection of Digital Fine Art papers. Designed for discerning users, these grades of Digital Fine Art paper can be used to create limited editions, giclees, original digital art, traditional output, photographic and historic photographs on a choice of paper textures, multiple colors and a huge variety of sheet sizes and weights. These are available in cut sheet sizes of A4, A3, A2 and are compatible with all inkjet printers up to a printed resolution of 1440 dpi, while printers that feed flat from the bottom and bending the paper up round only being recommended up to 210 gsm. The Hahnemuhle papers work equally well with both dye and pigmented based inks on a wide variety of printers providing a color intensity and crispness not possible with non-coated art papers. The Hahnemuhle collection is manufactured in the traditional mould-made and fourdrinier techniques that artists value for its unique rich look, feel and texture. No longer does the digital artist have to compromise on paper quality when producing or reproducing their work digitally. Surface coating in combination with the traditional paper base and the right inks will produce sharp, high resolution output with the warmth and quality of the hand generated artwork. In many cases it is difficult to identify the original with the copy.

PICTORICO
Inkjet Media

A division of Mitsubishi Paper Mills, Pictorico Inkjet Media was established in 1998 with a single goal: to offer a wide variety of the highest quality output media to the broadest range of inkjet printer users. Today, Pictorico (derived from the Spanish word for "picturesque") serves professionals and enthusiasts with inkjet media of unrivaled performance. Whether for industrial and commercial output or the needs of the digital imaging arts, Pictorico is the choice.

Pro Hi-Gloss White Film

The best choice for any application where output quality is paramount. The film substrate provides a luminous gloss even in areas of the image where there is heavy ink coverage. In addition to its gloss, a high brightness level ensures that your colors will jump off the page. For convenience, it drys very quickly.

PAL Camcorders

In the U.S., the TV system is known as NTSC, which uses 525 scan lines at 30 fps (frames per second). However, PAL uses 625 scan lines at 25 fps. So while camcorders can record video anywhere in the world, its where the video is played back that makes a difference. PAL camcorders are designed to play back in Europe, China, the Middle East, and South Africa. This means that these camcorders don't play back on American televisions.

SYMPLA
Highly Adjustable DSLR Shoulder Rig

With 3 axis you can slide the camera up and down the rods, offset the camera from the plate's center, and align the plate higher and lower. This allows the camera to be set up for different types of shots and the viewfinder to be positioned right in front of your eye. Swivel-joint adjustable handles can be set in almost any position — vertical, horizontal, up-side down, and every other in between. They can be set closer together, wider apart, and rotated 360°, allowing comfort and precision. Once you find the right position, just lock it in place — each handle has its own locking dial (and each handle can be positioned differently). The Handles also help incorporate optional remote controls to the rig. SYMPLA offers two different remote control units for adjusting focus on DSLRs.

Every component of the rig is easily detachable thereby giving you the flexibility to reconfigure your rig with other optional components should you ever want to.

Simultalk 24G

Full-Duplex Wireless Intercom with Slimline Headsets

Ideal for production work or houses of worship, the Simultalk 24G is a wireless intercom system that enables two people to communicate freely in real-time, without having to push a button to talk, and without having to wait for the other person to stop talking before they respond. Supplied single-sided Slimline headsets are preferred by video camera operators (dual-sided headsets tend to get in the way when the video camera is mounted on the operator's shoulder). More people can be added to the Simultalk 24G system with the purchase of additional belt-packs and Eartec headsets.

Canadian Shipping

B&H offers ground service into Canada via Purolator. To expedite the entry and customs process, B&H consolidates all Purolator shipments daily into Canada. When shipping with Purolator, B&H is the Importer of Record as a Non-Residential Importer (NRI) into Canada. Duties and Taxes are therefore the responsibility of, and are paid by, B&H. B&H will charge the customer a fee equivalent to the duties, tax, and other applicable cross border fees at the time of order. Once you have paid B&H, your merchandise will be delivered to you without interruption.

All orders are imported to Canada as casual goods and are subjected to Provincial Sales Tax (PST). If you are a business or corporation or otherwise exempt from duties/tax, please contact the B&H customer service department to obtain documentation to file a claim for reimbursement.

Items we sell are subject to U.S. export control laws and regulations, including the Export Administration Regulations and the International Traffic in Arms Regulations, and may require a license or other authorization from the U.S. Government to be exported from the United States. Without limitation, parties purchasing from B&H are solely responsible for determining applicable export licensing requirements and for obtaining any licenses or other authorizations from the appropriate agencies of the U.S. Government that are necessary for exporting items from the United States, such as the U.S. Department of Commerce or the U.S. Department of State.
