VS PUMPS

Why Jandy®?

Why settle for sufficient when you can get superior...

With Jandy equipment, you're getting a product that's easy to install on most pool pads, compatible with most existing setups and provides unparalleled performance and efficiency.

TRADE SERIES
EXCLUSIVE

Protecting Your Bottom Line

We've got your back. Our equipment is **NOT** available for purchase on the internet. Only through you.

Drops In with Ease

Jandy equipment is engineered to easily replace most existing equipment on the pool pad with little to no plumbing adjustments. Jandy is a trade-up, not just a trade out.

Built to Last

Our equipment is designed for durability so you can get the job done and can trust that it will perform for the long haul.

Support You Can Count On

With our superior customer service and dedicated training team available to you when you need it most, you'll never be caught off-guard on-site.

Why Jandy® VS FloPro™ is the First Choice When Replacing a Pump

The Right Dimensions

Jandy VS FloPro pumps include an adjustable base so you can be certain the plumbing lines up to the Pentair® or Hayward® pump you're replacing.

Small for Service

No need to make more room. At just 24.5" long, Jandy VS FloPro pumps take up less space in your truck and on the equipment pad.

Everything You Need

VS FloPro pumps include 2" unionized fittings or utilize the 2" internal threads. Using the unionized fittings is recommended as they allow for micro adjustments for the perfect drop in fit and make future maintenance easier.

115V

230V

The Power Play

Whether the pre-existing pump is wired for 230V or 115V, it doesn't matter with Jandy "Dual Voltage" Series VS FloPro pumps. They feature an autosensing, dual-voltage design that allows them to work with both — without having to rewire.

VS FloPro™ Dual-Voltage, 2-AUX Relay Pump Models

Standout Features

- 1.85 And 2.7 HP Models
- SpeedSet VS Controller Preinstalled
- 2" Unionized Fittings + 2" Internal Threads
- 115V/230V Autosensing Operation
- Two Programmable Auxiliary Relays
- 4-Speed Dry Contact Relay Control
- Zero-Clearance TEFC Motor Design

VS FloPro™ 1.85 HP Pump Curves

VS FloPro 2.7 HP Pump Curves

Specifications	THP	WEF	Voltage	Max Watts	Amps
VSFHP185DV2AS	1.85	8.5	230V 115V	1,700W 1,800W	7.5 15.5
VSFHP270DV2AS	2.7	7.3 8.7	230V 115V	2,550W 1,840W	10.5 16.0

Using the Adjustable Base with Spacers

The small base + spacers are used when replacing a Pentair® WhisperFlo, IntelliFlo VSF, or Sta-Rite® Dyna-Glas pump.

1. Use a cutting tool to remove the spacers from the base.
2. Insert the pins on the spacers into the holes on the base as shown above.

When Replacing...

Jandy
JMF
POOL & SPA HEATER

Why JXi™ is the First Choice When Replacing a Heater

Best Retrofit Option

3-port header for easy plumbing
and drop-in replacement of
Pentair® MasterTemp®.

Heater Shown with Optional VersaFlo Integrated Bypass
(Not Available with ASME® Compliant Models)

Flexible Installation

Top can be easily removed for increased
accessibility and rotated 180 degrees
so you never need to rotate headers.

Easy to Service

Includes a flip up electrical panel for convenient setup and service.

Keeps Critters Out

The JXi is made with a fully encased shell to protect against rodent intrusion and damage.

Suggested Tools

- Pipe Wrench
- Channel Locks
- Phillips Screwdriver
- PVC Pipe Cutter
- Multimeter
- Monometer
- Impact Drill with Proper Bit
- Wire Cutter/Strippers

NOTE: Fluidra equipment must be installed and serviced by qualified or licensed pool professionals. Please see the installation manual for complete step-by-step instructions.

Why Jandy® JXi™ is the Best Gas Heater

VersaFlo™ Integrated Bypass Technology

The JXi with VersaFlo is the first and only swimming pool heater that automatically directs the flow of water through the heat exchanger when heat is needed and around the heater when heating is not needed — allowing you to save money on the filtration pump electric bill.

VersaFlo Integrated bypass is available factory-installed on select models or can easily be added to any JXi on site.

Bypass Mode

VersaFlo integrated bypass diverts water flow around the heat exchanger when not heating water.

Heat Mode

When there is a call for heat, water is automatically directed through the heat exchanger.
