

# eero PoE+ Adapter and Mount

## The Quick Read

- Pro-channel only
- Connects via Ethernet for reliable WiFi
- Uses PoE+ to power a 2nd gen eero
- Mounts to ceiling or wall
- Installs on new or existing box or cut-in ring
- Designed for retrofits and new construction

## The Whole Story

The eero PoE+ Adapter and Mount is the perfect accessory for pro-grade residential WiFi networks. The adapter connects a 2nd gen eero to the LAN via Ethernet for added reliability, and splits out the PoE+ power onto a mini-USB cable used to power the eero, eliminating the need for a separate power source.

The installed look is a wire-free residential WAP that is both elegant and professional. Install additional eeros on ceilings and walls throughout the home to build a robust WiFi network. The eero PoE+ Adapter and Mount is perfect for both new construction and retrofits.

## Easy Install

1. Connect the adapter to a home-run Ethernet cable.
2. Attach the mounting plate to a low-voltage box or cut-in ring.
3. Connect a 2nd gen eero using the Ethernet and USB cables.
4. Use the shroud to lock the eero in place and hide the cables.

# The Tech Specs

## Compatibility:

For use with 2nd gen eero (sold separately)

## Product Power Requirements:

24W @ 48 VDC

## LAN Requirements:

PoE+ LAN (Certified PoE+ injector or Certified PoE+ switch)

CAT5E or higher Ethernet cable (CAT6A recommended; max length 100m/328ft)

## Installation Requirements:

Single, double, round or octagonal junction box or cut-in ring

Philips screwdriver

## WiFi Setup Requirements:

eero Pro Account
